13140  hypospadias

Eponyms:

Inheritance:  genetic heterogeneity
supposed autosomal dominant
supposed autosomal recessive

Semeiological Synthesis:  Genito-urological disorder. Urethral meatus not at the tip of the glans penis, resulting penile downward curvature (chordee), and classified into glandular/penile/scrotal/perineal hypospadias. Normal virilization and fertility. Overall incidence: 1 in 1000 males. Recurrence risk in male sib or offspring: around 10%.

Group Sub group Signs:

GENITAL DISORDERS  
- ambiguous genitalia, male  
- pseudohermaphroditisms, male  
  male genitalia, modifications not including ambiguity
- hypospadias

OTHERS
- inheritance
  - inheritance, genetic heterogeneity

PRENATAL-NEONATAL MODIFIED DATA
- foetal changes
  - foetal changes, recognized by ultrasound techniques
- prenatal diagnosis
  - prenatal diagnosis, echographic

Super group:

Super aggreg. Aggregations:  foetal changes, recognized by ultrasound techniques

OTHER
isolated genital disorders
isolated urinary tract defects

PSEUDO-HERMAPHRODITISM
pseudohermaphroditisms, male

Differential diagnosis:
