

Title Page, Preface, Survey, Errata

1	Introduction	1
2	Sound velocity in gases and liquids	6
2.1	Pure gases and liquids	6
2.1.1	Sound velocity in gases and vapors	6
2.1.2	Sound velocity in liquids	12
2.2	Mixtures of gases, mixtures of liquids, and solutions	74
2.2.0	Introduction	74
2.2.1	Sound velocity in binary mixtures and solutions	76
2.2.2	Sound velocity in aqueous solutions of electrolytes	109
2.2.3	Sound velocity in nonaqueous solutions of electrolytes	126
3	Sound absorption and dispersion in gases and liquids	127
3.1	Absorption and dispersion in gases	127
3.1.0	Introduction and definitions	127
3.1.1	Translation relaxation in monoatomic gases	128
3.1.2	Rotation relaxation in diatomic gases	129
3.1.3	Vibration relaxation in diatomic gases	134
3.1.4	Vibration relaxation in triatomic gases	136
3.1.5	Vibration relaxation in vapors of polyatomic substances	138
3.1.6	Dissociation relaxation	147
3.1.7	Absorption and dispersion in gases with foreign-gas additions	147
3.2	Sound absorption in chemically homogeneous liquids	155
3.2.0	Introduction	155
3.2.1	Sound absorption in liquid elements	155
3.2.2	The frequency-independent portions of sound absorption in organic liquids	157
3.2.3	Sound absorption in nonassociated inorganic liquids of simple molecules	169
3.2.4	Sound absorption in nonassociated aliphatic hydrocarbons	170
3.2.5	Sound absorption in cyclic hydrocarbons and in some of their derivatives (without associations)	174
3.2.6	Sound absorption in aliphatic halogen containing carbon compounds without associations	178
3.2.7	Sound absorption in nonassociated ethers, aldehydes, and ketones	181
3.2.8	Sound absorption in nonassociated esters	183
3.2.9	Sound absorption in diethylamine and triethylamine	187
3.2.10	Sound absorption in water, H ₂ O	188
3.2.11	Sound absorption in alcohols (associating liquids)	189
3.2.12	Sound absorption in fatty acids	192

3.3	Sound absorption in mixtures and solutions	195
3.3.0	Introduction	195
3.3.1	Mixtures of components without association properties	196
3.3.2	Mixtures containing one component with association properties	199
3.3.3	Absorption in aqueous solutions	209
3.3.4	Specific absorption in solutions of higher molecular substances	211
3.3.5	Sound absorption and sound absorption anomalies in liquids of higher viscosity, especially in oils	213
3.4	Sound absorption in solutions of electrolytes	215
3.5	Sound propagation and depolymerization effect in polymers	222
4	Sound propagation in liquid helium	227
4.1	Phase diagram of helium He-4	227
4.2	Velocity and absorption of the ordinary sound: u_1 and α_1	228
4.3	Velocity of the second sound: u_2 (second-sound-effect)	232
5	Sound propagation in isotropic or quasi-isotropic solids	234
5.0	Introduction	234
5.1	Inorganic solids	236
5.2	Organic solids	244
5.3	Solid high polymers	245
6	Velocity of shock waves	252
6.0	Definitions	252
6.1	Measurements in gases	253
6.2	Measurements in water, mercury, and in organic liquids	254
6.3	Measurements in metals	256
	Index of substances	259
	A Elements and inorganic compounds	259
	B Organic compounds	262
	C Solutions and mixtures	274
