

**Landolt-Börnstein**  
**Group I: Elementary Particles, Nuclei and Atoms**

**Volume 4**  
**Numerical Tables for Beta-Decay and Electron Capture**

	Introductory material	
1	Introduction	1
2	Formulae for beta-decay and electron capture	3
2.1	Classification of beta-decays	3
2.2	General formulae for beta-decay	3
2.3	Special formulae for allowed, first forbidden, L-th non unique forbidden, and (L-1)-th-unique forbidden beta-decays	9
2.4	ft-value and integrated Fermi function	16
2.5	General formulae for electron capture	17
2.6	Special formulae for allowed and first forbidden electron captures	20
3	Description of the tables, including the calculation methods	21
4	Tables and diagrams	29
	Table I. Relations between electron momentan total energies, kinetic energies and B rho values	30
	Table II. Unscreened beta-decay Coulomb functions	31
	Table III. Ratio of screened to unscreened beta-decay Coulomb functions	235
	Table IV. Integrated statistical factor	293
	Diagrams I and II. Integrated Fermi-function divided by the integrated statistical factor	295
	Diagrams III and IV. Screening corrections to the integrated Fermi-function	298
	Table V. Coulomb functions of the bound orbital electron for electron capture	301
5	References	315

Numerical Tables for Beta-Decay and Electron Capture /  
Numerische Tabellen für Beta-Zerfall und  
Elektronen-Einfang
