

Volume 1
Physical Properties of Rocks

Subvolume B

	Title Page, Contributors, Survey	
3	Elasticity and inelasticity	1
3.1	Elastic wave velocities and constants of elasticity of rocks and rock forming minerals	1
3.1.1	Introduction (H. GEBRANDE)	1
3.1.2	Elastic wave velocities and constants of elasticity at normal conditions (H. GEBRANDE)	8
3.1.2.1	Rocks	8
3.1.2.2	Influence of porosity and pore content	12
3.1.2.3	Velocity-density relations	17
3.1.2.4	Various materials of geophysical interest	21
3.1.2.5	Rock forming minerals	22
3.1.3	Elastic wave velocities and constants of elasticity of rocks at room temperature and pressures < 1 GPa (H. GEBRANDE)	35
3.1.3.1	Isotropic and quasi-isotropic rocks	38
3.1.3.2	Anisotropic rocks	87
	References for 3.1.1 - 3.1.3	96
3.1.4	Elastic wave velocities and constants of elasticity of rocks at elevated pressures and temperatures (H. KERN)	99
3.1.4.0	Introduction	99
3.1.4.1	Symbols and abbreviations	100
3.1.4.2	Experimental techniques	100
3.1.4.3	Sample description	101
3.1.4.4	Velocity-temperature relations at confining pressure	109
3.1.4.5	References for 3.1.4	139
3.2	Fracture and flow of rocks and minerals (F. RUMMEL)	141
3.2.1	Strength and deformability	141
3.2.2	Friction	195
3.2.3	Rheology	205
3.2.4	References for 3.2	233
4	Thermal properties (See Vol. 1A)	
5	Electrical properties	239
5.1	Electrical conductivity (resistivity) of minerals and rocks at ordinary temperatures and pressures (M. BEBLO)	239
5.2	The dielectric constant of minerals and rocks (M. BEBLO)	254

5.3	Electrical conductivity of moisture containing rocks	262
5.3.1	Electrical conductivity of pure salt solutions and natural waters (A. BERKTOLD)	262
5.3.2	Electrical conductivity of rocks containing electrolytes (J.R. SCHOPPER)	276
5.4	Electrical conductivity of minerals and rocks at high temperatures and pressures (V. HAAK)	291
5.4.1	Introduction	291
5.4.2	Olivines and pyroxenes	295
5.4.3	Basalts	299
5.4.4	Ultramafic rocks	302
5.4.5	Other minerals	304
5.4.6	Bibliography for 5.4	307
6	Magnetic properties	308
6.1	Magnetic properties of natural minerals (U. BLEIL, N. PETERSEN)	308
6.1.1	General introduction	308
6.1.2	Diamagnetism	310
6.1.3	Paramagnetism	312
6.1.4	Ferromagnetism, ferrimagnetism, antiferromagnetism	320
6.1.5	References for 6.1	360
6.2	Magnetic properties of rocks (N. PETERSEN, U. BLEIL)	366
6.2.1	General remarks	366
6.2.2	Induced magnetization	368
6.2.3	Remanent magnetization	382
6.2.4	Magnetic hysteresis curves and related parameters	409
6.2.5	Curie temperature	415
6.2.6	References for 6.2	429
7	Radioactivity of rocks	433
7.1	Radioactive isotopes in rocks (U. HAACK)	433
7.1.1	Introductory remarks	433
7.1.2	Isotopic composition of K, Th and U	434
7.1.3	Natural transuranic elements	435
7.1.4	Radioactivity of rocks	435
7.1.5	K, Th and U content of the earth's crust	464
7.1.6	K, Th and U in minerals	467
7.1.7	Distribution coefficients of Th and U	469
7.1.8	References for 7.1	471
7.2	The age of the rocks (B. GRAUERT)	561
7.2.1	Introduction	561
7.2.2	The methods for age determination of minerals and rocks	564
7.2.3	Geological time table	585
7.2.4	References for 7.2	594

8	Physical properties of ice (H. MILLER)	482
8.0	Introduction	482
8.1	Thermal properties	484
8.2	Electrical properties	487
8.3	Optical properties	493
8.4	Mechanical properties	496
8.5	References for 8	506
9	Physical properties of lunar rocks (J. POHL)	508
9.0	Introduction	508
9.1	Density and porosity of lunar rocks and soil	513
9.2	Compressional waves and shear waves in lunar rocks and soil	514
9.3	Elastic moduli	525
9.4	Thermal properties of lunar rocks	529
9.5	Electrical properties of lunar rocks	538
9.6	Magnetic properties of lunar rocks	548
9.7	References for 9	557

Subject index for volumes 1A, 1B and 2A, 2B (see Vol. 2B)

Physical Properties of Rocks

Beblo, M.; Berktold, A.; Bleil, U.; Gebrande, H.; Grauert, B.; Haack, U.; Haak, V.; Kern, H.; Miller, H.; Petersen, N.; Pohl, J.; Rummel, F.; Schopper, J.R.

1982, 604 p., Hardcover

ISBN: 978-3-540-11070-5
