I. FUNCTION SPACES AND ELLIPTIC DIFFERENTIAL EQUATIONS

1.	Spaces of Entire Analytic Functions	11
1.1.	Introduction	11
1.2.	Preliminaries	12
1.2.1.	Distributions	12
1.2.2.	L_p -Spaces and Quasi-Banach Spaces	13
1.2.3.	Maximal Inequalities	14
1.2.4.	Admissible Borel Measures	15
1.3.	Inequalities of Plancherel-Polya-Nikol'skij Type	15
1.3.1.	A Maximal Inequality	15
1.3.2.	Inequalities for the Lebesgue Measure	17
1.3.3.	Inequalities for Atomic Measures	19
1.3.4.	Inequalities for Admissible Borel Measures	20
1.3.5.	A Representation Formula	20
1.4.	L_p -Spaces of Analytic Functions	22
1.4.1.	Definition and Main Inequalities	22
1.4.2.	Basic Properties	23
1.4.3.	Further Properties	24
1.5.	Fourier Multipliers for L_p -Spaces	25
1.5.1.	Definition and Criterion	25
1.5.2.	A Multiplier Theorem	26
1.5.3.	Convolution Algebras	28
1.5.4.	Further Multiplier Assertions	28
1.6.	$L_p(l_q)$ -Spaces of Analytic Functions	29
1.6.1.	Definition and Basic Properties	29
1.6.2.	Maximal Inequalities	29
1.6.3.	A Multiplier Theorem	31
1.6.4.	Further Multiplier Assertions	32
2.	Function Spaces on R_n	33
2.1.	Introduction	33
2.2.	The Historical Background, Motivations, and Principles	33
2.2.1.	On the History of Function Spaces	33
2.2.2.	The Constructive Spaces	35
2.2.3.	The Criterion	38
2.2.4.	Decomposition Method, the Principle	40
2.2.5.	Approximation Procedures	43
2.3.	Definition and Fundamental Properties	45
2.3.1.	Definition	45
2.3.2.	Equivalent Quasi-Norms and Elementary Embeddings	46
2.3.3.	Basic Properties	47
2.3.4.	The Spaces $F_{\infty,q}^s(R_n)$	50
2.3.5.	An Orientation and Some Historical Remarks	51
2.3.6.	Maximal Inequalities	52
2.3.7.	A Fourier Multiplier Theorem	57
2.3.8.	Lifting Property and Related Equivalent Quasi-Norms	58
2.3.9.	Diversity of the Spaces $B_{p,q}^s(R_n)$ and $F_{p,q}^s(R_n)$	61
2.4.	Interpolation	62
2.4.1.	Preliminaries	62
2.4.2.	Real Interpolation for the Spaces $B_{p,q}^s(R_n)$ and $F_{p,q}^s(R_n)$ with Fixed p	64
2.4.3.	Real Interpolation for the Spaces $B_{p,p}^s(R_n)$	66
2.4.4.	Complex Interpolation: Definitions	66
2.4.5.	Complex Interpolation: Properties	68

2.4.6.	Some Preparations	68
2.4.7.	Complex Interpolation for the Spaces $B_{p,q}^s(R_n)$ and $F_{p,q}^s(R_n)$	69
2.4.8.	Fourier Multipliers for the Spaces $F_{p,q}^s(R_n)$	73
2.4.9.	The Spaces $L_p^2(R_n, l_q)$: Complex Interpolation and Fourier Multipliers	77
2.5.	Equivalent Quasi-Norms and Representations	78
2.5.1.	An Orientation	78
2.5.2.	Nikol'skij Representations	79
2.5.3.	Characterizations by Approximation	80
2.5.4.	Lizorkin Representations	85
2.5.5.	Discrete Representations and Schauder Bases for $B_{p,q}^s(R_n)$	86
2.5.6.	The Bessel-Potential Spaces $H_p^s(R_n)$ and the Sobolev Spaces $W_p^m(R_n)$	87
2.5.7.	The Besov Spaces $A_{p,q}^s(R_n)$ and the Zygmund Spaces $\mathcal{C}^s(R_n)$	89
2.5.8.	The Local Hardy Spaces $h_p(R_n)$, the Space $bmo(R_n)$	91
2.5.9.	Characterizations by Maximal Functions of Differences	94
2.5.10.	Characterizations of the Spaces $F_{p,q}^s(R_n)$ by Differences	101
2.5.11.	Characterizations of the Spaces $F_{p,q}^s(R_n)$ by Ball Means of Differences	105
2.5.12.	Characterizations of the Spaces $B_{p,q}^s(R_n)$ by Differences; the Spaces $A_{p,q}^s(R_n)$ and $\mathcal{C}^s(R_n)$	109
2.5.13.	Fubini Type Theorems	114
2.6.	Fourier Multipliers	117
2.6.1.	Definitions and Preliminaries	117
2.6.2.	The Classes \mathfrak{N}_p and \mathfrak{N}_p^H	120
2.6.3.	Properties of the Classes \mathfrak{N}_p	120
2.6.4.	Properties of the Classes \mathfrak{N}_p^H	124
2.6.5.	Convolution Algebras	127
2.6.6.	The Classes $\mathfrak{N}_{p,q}$	128
2.7.	Embedding Theorems	129
2.7.1.	Embedding Theorems for Different Metrics	129
2.7.2.	Traces	131
2.8.	Pointwise Multipliers	140
2.8.1.	Definition and Preliminaries	140
2.8.2.	General Multipliers	140
2.8.3.	Multiplication Algebras	145
2.8.4.	The Classes $P_{p,\alpha}(R_n)$	146
2.8.5.	Special Multipliers for $B_{p,q}^s(R_n)$	149
2.8.6.	Two Propositions	154
2.8.7.	Characteristic Functions as Multipliers	158
2.8.8.	Further Multipliers	165
2.9.	Extensions	166
2.9.1.	The Spaces $B_{p,q}^s(R_n^+)$ and $F_{p,q}^s(R_n^+)$	166
2.9.2.	The Case $\min(p, q) > 1$	167
2.9.3.	The Case $0 < p \leq q < \infty$ and $n = 1$	170
2.9.4.	The Extension Theorem	171
2.9.5.	The Case $q < p$	172
2.10.	Diffeomorphic Maps	173
2.10.1.	Preliminaries	173
2.10.2.	The Main Theorem	174
2.11.	Dual Spaces	176
2.11.1.	Preliminaries	176
2.11.2.	The Case $1 \leq p < \infty$	178
2.11.3.	The Case $0 < p < 1$	180
2.12.	Further Properties	182
2.12.1.	Characterizations of $F_{p,q}^s(R_n)$ via Lusin and Littlewood-Paley Functions	182

2.12.2.	Characterizations via Gauss-Weierstrass and Cauchy-Poisson Semi-Groups . .	183
2.12.3.	Characterizations via Spline Functions	184
3.	Function Spaces on Domains	188
3.1.	Preliminaries, Motivations, and Methods	188
3.1.1.	Motivations	188
3.1.2.	The Problem of Inner Descriptions	189
3.1.3.	The Localization Method	190
3.2.	Definitions and Basic Properties	191
3.2.1.	C^∞ -Domains	191
3.2.2.	Definitions	192
3.2.3.	Quasi-Banach Spaces	193
3.2.4.	Elementary Embeddings	194
3.3.	Main Properties	195
3.3.1.	Embeddings	195
3.3.2.	Pointwise Multipliers	197
3.3.3.	Traces	199
3.3.4.	Extensions	200
3.3.5.	Equivalent Quasi-Norms	202
3.3.6.	Interpolation	203
3.4.	Further Properties	206
3.4.1.	A Special Multiplication Property	206
3.4.2.	Inner Descriptions, Equivalent Quasi-Norms	208
3.4.3.	The Spaces $\dot{B}_{p,q}^s(\Omega)$ and $\dot{F}_{p,q}^s(\Omega)$	209
4.	Regular Elliptic Differential Equations	212
4.1.	Definitions and Preliminaries	212
4.1.1.	Introduction	212
4.1.2.	Definitions	213
4.1.3.	Basic Properties of Elliptic Operators	215
4.1.4.	Basic Properties of Regular Elliptic Systems	216
4.2.	A Priori Estimates	217
4.2.1.	Introduction and the Spaces $F_{p,q}^{s,r}(R_n^+)$	217
4.2.2.	A Priori Estimates, Part I: R_n^+ , constant coefficients, Dirichlet problem	220
4.2.3.	A Priori Estimates. Part II: R_n^+ , constant coefficients, general boundary problem	224
4.2.4.	A Priori Estimates. Part III: Bounded domain, variable coefficients, general boundary problem	227
4.3.	Boundary Value Problems	230
4.3.1.	Introduction and Hypothesis	230
4.3.2.	The Basic Theorem	232
4.3.3.	The Main Theorem	233
4.3.4.	Boundary Value Problems in Zygmund Spaces	235
II.	FURTHER TYPES OF FUNCTION SPACES	
5.	Homogeneous Function Spaces	237
5.1.	Definitions and Basic Properties	237
5.1.1.	Introduction (to Part II)	237
5.1.2.	The Spaces $Z(R_n)$ and $Z'(R_n)$	237
5.1.3.	Definitions	237
5.1.4.	The Spaces $\dot{F}_{\infty,q}^s(R_n)$	239
5.1.5.	Basic Properties	240
5.2.	Further Properties	240
5.2.1.	Maximal Inequalities	240
5.2.2.	Fourier Multipliers	241
5.2.3.	Equivalent Norms	241

5.2.4.	The Hardy Spaces $H_p(R_n)$, the Spaces $BMO(R_n)$	243
5.2.5.	Miscellaneous Properties	244
6.	Ultra-Distributions and Weighted Spaces of Entire Analytic Functions	245
6.1.	Ultra-Distributions	245
6.1.1.	Introduction (to Chapters 6 and 7)	245
6.1.2.	Definitions	245
6.1.3.	Basic Properties	247
6.1.4.	Paley-Wiener-Schwartz Theorems for Ultra-Distributions	248
6.2.	Inequalities of Plancherel-Polya-Nikol'skij Type	249
6.2.1.	Admissible Weight Functions	249
6.2.2.	Some Inequalities	250
6.2.3.	The Basic Inequality	251
6.3.	L_p -Spaces of Analytic Functions	252
6.3.1.	Definition and Main Inequalities	252
6.3.2.	Basic Properties	252
7.	Weighted Function Spaces on R_n	254
7.1.	Maximal Inequalities, Fourier Multipliers and Littlewood-Paley Theorems	254
7.1.1.	The Spaces $L_p^Q(R_n, \varrho(x), l_q)$	254
7.1.2.	The Spaces $L_p(R_n, \varrho(x), l_q)$	255
7.1.3.	The Spaces $L_p(R_n, \varrho(x))$	256
7.2.	Weighted Spaces of Type $B_{p,q}^s$ and $F_{p,q}^s$	257
7.2.1.	Definition	257
7.2.2.	Basic Properties	257
7.2.3.	Weighted Sobolev Spaces	258
7.2.4.	Characterizations by Approximation	258
8.	Weighted Function Spaces on Domains and Degenerate Elliptic Differential Equations	260
8.1.	Weighted Function Spaces on Domains	260
8.1.1.	Introduction and Definitions	260
8.1.2.	Basic Properties	261
8.1.3.	Inner Descriptions	262
8.2.	Degenerate Elliptic Differential Equations	263
8.2.1.	Definition and A Priori Estimate	263
8.2.2.	A Mapping Property	263
9.	Periodic Function Spaces	264
9.1.	Introduction and Definitions	264
9.1.1.	Introduction	264
9.1.2.	Periodic Distributions on R_n	264
9.1.3.	Function Spaces on T_n	265
9.1.4.	Periodic Function Spaces on R_n	266
9.2.	Properties	266
9.2.1.	The Main Theorem	266
9.2.2.	Fourier Multipliers and Maximal Inequalities	267
9.2.3.	Periodic Sobolev Spaces	267
9.2.4.	The Problem of Strong Summability	267
10.	Further Types of Function Spaces	269
10.1.	Anisotropic Function Spaces	269
10.2.	Generalizations	270
10.3.	Abstract Spaces and Spaces Related to Orthogonal Expansions	271
References	274
