3 Alphabetisches Mineralnamenverzeichnis

Das Mineralnamenverzeichnis enthält alle in den Tabellen und Fußnoten der Bände III/7 a.. III/7f auftretenden Mineralnamen, wie sie entweder in der Originalarbeit angegeben oder den „Mineralogischen Tabellen“ von H. Strunz [70Strl] entnommen sind.

Für jeden Mineralnamen ist die zugehörige Substanznummer (Buchstabe des Bandes und laufende Nummer), unter der sie in dem betreffenden Teilband steht, angegeben. Die Übersicht „Anordnung der Substanznummern in den Teilbänden III/7 a.. III/7 f“ erlaubt das schnelle Auffinden im richtigen Teilband.

Sind bei einem Mineralnamen mehrere Nummern angegeben, so verweist die halbfett gedruckte Nummer auf die wichtigste Information für dieses Mineral.

Für das Auffinden von Daten weiterer Minerale wird auf das Mineralnamenverzeichnis in Band 111/14b2 verwiesen.

3 Alphabetical mineral name index

The mineral name index presents all mineral names which are contained in the tables or footnotes of volumes 111/7a...III/7f as given in the original paper or taken from the “Mineralogische Tabellen” from H. Strunz [70Strl].

For each mineral name the respective substance number (letter of the volume and running number) – as listed in the table – is given in the index. The survey “Arrangement of the substance numbers within the subvolumes 111/7a...II/7f” allows the fast localization in the respective subvolume.

If several numbers are listed for a mineral name, the bold face number refers to the most important information for this material.

For information on further minerals, see the mineral name index in volume 111/14b2.
