

Landolt-Börnstein
Group VII: Biophysics

Volume 1
Nucleic Acids

Subvolume A
Crystallographic and Structural Data I

Title Page, Contributors, Preface, Errata

1	Nomenclature, definitions and geometry of basic structure elements (W. SAENGER)	1
1.1	Abbreviations and symbols	1
1.2	Description of conformation	6
1.3	Geometry of helices	14
1.4	Geometry of bases, sugars, and phosphate groups	18
1.5	References for 1	21
2	Structures of nucleic acids and their constituents	22
2.1	Crystal structures of bases, nucleosides, and nucleotides (M. SUNDARALINGAM, T.P. HAROMY)	22
2.1.1	Introduction	22
2.1.1.1	General remarks	22
2.1.1.2	Experimental procedures	22
2.1.1.3	Summary of data compilation	22
2.1.1.4	Nucleoside and nucleotide conformation	23
2.1.1.5	Analog structures	31
2.1.2	Data	33
2.1.2.1	Overview	33
2.1.2.2	Base crystal structures	35
2.1.2.3	Nucleoside crystal structures	134
2.1.2.4	Mononucleotide crystal structures	183
2.1.2.5	Di-(tri-) nucleotide crystal structures	205
2.1.2.6	Conformational angles for nucleoside crystal structures	211
2.1.2.7	Conformational angles for mononucleotide crystal structures	221
2.1.2.8	Conformational angles for di-(tri-) nucleotide crystal structures	227
2.1.3	References for 2.1	231
2.2	Crystal structures of oligonucleotides (O. KENNARD, W.N. HUNTER)	255
2.2.1	Introduction	255
2.2.2	Data	262
2.2.2.1	Experimental details	262
2.2.2.2	Average helical (or global) parameters	264
2.2.2.3	Hydration	265
2.2.2.4	Local parameters	267
2.2.3	References for 2.2	359
