Introduction	1
 Part I Theoretical Antecedents	 7
 1 The Normal Trunk – Evolutionary and Anatomical Considerations	 9
1.1 The Vertebral Column	12
1.1.1 Movements of the Vertebral Column	12
1.1.2 Movements of the Rib Cage	14
1.2 Conclusion	15
 2 Aspects of Trunk Control	 16
2.1 The Bridge	17
2.2 The Tentacle	17
2.3 The Bridge-Tentacle	18
2.3.1 Muscular Control of the Trunk	19
2.3.2 Anatomical Considerations	21
2.3.2.1 Extension	21
2.3.2.2 Shoulder Girdle	21
2.3.2.3 Abdominal Muscles	24
2.3.2.4 Respiration	27
2.4 Types of Muscle Action	28
2.5 Conclusion	30
 3 Problems Associated with the Loss of Selective Trunk Activity in Hemiplegia	 31
3.1 Possible Reasons for the Bilateral Loss of Abdominal Muscle Activity and Tone	33
3.2 Loss of Selective Activity	34
3.2.1 Muscles of the Trunk	34

3.2.2	Muscles of the Trunk and Limbs Acting Simultaneously	35
3.3	Inability to Move in Normal Patterns	35
3.4	The Most Commonly Observed Problems Seen in Relation to Normal Motor Development	35
3.4.1	Difficulties with Breathing and Speaking	36
3.4.1.1	Distorted Configuration of the Rib Cage	37
3.4.2	Difficulties Observed in Lying	37
3.4.3	Difficulties in Moving Between Lying and Sitting	43
3.4.4	Difficulties in Sitting	48
3.4.5	Difficulties in Standing Up from Sitting	49
3.4.6	Difficulties in Standing	49
3.4.7	Some Difficulties Observed in Walking	53
3.4.7.1	The Stance Phase	53
3.4.7.2	The Swing Phase	54
3.4.7.3	Slow and Effortful Walking with the Stride Width Increased	58
3.4.7.4	Associated Reactions in the Arm	61
3.4.8	Difficulties in Moving the Arm	61
3.5	Conclusion	65

Part II Therapeutic Activities 67

4	Activities in Lying	69
4.1	Facilitating Breathing	69
4.1.1	Moving the Chest Passively	69
4.1.2	Assisting Expiration	70
4.1.3	Facilitating Diaphragmatic Breathing	70
4.2	Flexion/Rotation of the Upper Trunk	72
4.2.1	Assisting Passive Movement	72
4.2.2	Facilitating Active Movement	73
4.3	Retraining Active Protraction of the Scapula with Activation of the Oblique Abdominal Muscles	75
4.3.1	Lifting the Elbows into the Air	77
4.4	Rolling to Prone	78
4.4.1	Rolling Towards the Hemiplegic Side	78
4.4.2	Rolling Towards the Sound Side	81
4.5	Flexion/Rotation of the Lower Trunk	83
4.6	Activating the Oblique Abdominal Muscles in Crook Lying	85
4.7	Position of the Arms	86
4.8	Bridging, a Useful Activity for Regaining Selective Extension of the Hip Together with Abdominal Muscle Activity	89

4.9	Actively Controlling the Hemiplegic Leg Through Its Range of Movement	92
4.10	Conclusion	93
5	Moving Between Lying and Sitting	95
5.1	Sitting Up over the Side of the Bed	95
5.1.1	Fully Supported	97
5.1.2	Less Assistance	97
5.1.3	No Support	97
5.2	Lying Down from Sitting	97
5.3	Rocking in Crook Sitting	100
5.4	Moving the Trunk in Long Sitting	101
5.4.1	Long Sitting with Isolated Knee Extension	102
5.4.2	Moving Towards Supine Lying	103
5.4.3	Lying Down with the Trunk Rotated	104
5.5	Conclusion	106
6	Activities in Sitting	107
6.1	Sitting with Both Legs over the Side of the Plinth	107
6.1.2	Selective Flexion and Extension of the Lower Trunk	107
6.1.3	Trunk Rotation with Flexion	109
6.2	Rotation of the Trunk with Both Arms Supported on the Same Side	113
6.2.1	Rotating Towards the Sound Side	113
6.2.2	Rotating Towards the Hemiplegic Side	116
6.3	Active Movements of the Hemiplegic Arm Following the Inhibition of Spasticity	118
6.4	Weight Transference Sideways	120
6.4.1	Moving Towards the Hemiplegic Side	122
6.4.1.1	A Progressive Sequence to Teach the Correct Movement	124
6.4.2	Moving Towards the Sound Side	126
6.4.2.1	A Progressive Sequence to Teach the Correct Movement	127
6.5	Selective Side Flexion of the Lower Trunk	130
6.6	Active Side Flexion of the Trunk Against Gravity	132
6.7	Moving Forwards and Backwards	135
6.8	Conclusion	136
7	Standing Up from Sitting	140
7.1	Therapeutic and Functional Activities	142
7.1.1	Bringing the Extended Trunk Forwards	142
7.1.2	Standing Up from Sitting	146
7.1.2.1	Supported by the Therapist	146

7.1.2.2	Hands Supported on a Stool	148
7.1.2.3	Weight Bearing on the Hemiplegic Leg Alone	150
7.1.3	Alternating Between Selective Extensor and Flexor Activity of the Trunk and Hips	152
7.1.3.1	Incorporating Active Plantar Flexion of the Foot	157
7.1.3.2	Legs Crossed	158
7.1.3.3	Performing an Additional Task	158
7.1.4	Standing Up from a High Plinth or Bed	158
7.1.4.1	Transferring the Patient onto a High Bed	158
7.1.5	Standing Up and Returning to Sitting from a High Plinth or Bed	161
7.1.5.1	Weight Taken on the Hemiplegic Leg	161
7.1.5.2	Weight Taken on the Sound Leg	163
7.2	Conclusion	164
8	Activities in Standing	166
8.1	Important Considerations Before Standing Activities Are Begun	166
8.2	Activities to Train Selective Trunk and Leg Movement	168
8.2.1	Tilting the Pelvis Forwards and Backwards	168
8.2.2	Weight Bearing on the Hemiplegic Leg with Abduction and Adduction of the Contra-lateral Hip	169
8.2.3	Bending the Trunk Forwards and Bringing It to the Vertical Again	171
8.2.4	Bending the Trunk Forwards and Returning to an Upright Position While Standing on a Sloping Surface	174
8.2.5	Weight Bearing on the Hemiplegic Leg While Placing the Sound Foot on a Step	177
8.2.6	Weight Bearing on the Hemiplegic Leg with the Sound Leg Abducting	182
8.2.7	Hip Extension with Abduction and Outward Rotation	185
8.2.8	Active Plantar Flexion of the Ankles with Flexed Knees	186
8.2.9	Controlling the Hemiplegic Leg Actively Against Gravity	189
8.2.10	Active Control of the Hemiplegic Leg when the Hip Is Extended	194
8.2.11	Moving the Arms Actively While Standing	194
8.2.11.1	Holding a Pole in Both Hands	194
8.2.11.2	Hitting a Ball with a Pole	194
8.2.11.3	Hitting a Balloon Away with the Hemiplegic Hand	196
8.3	Conclusion	196

9	Ball Activities	197
9.1	Ball Activities in Supine Lying	198
9.1.1	Lifting the Ball off the Bed with Both Legs	201
9.1.2	Abducting and Adducting One Leg with the Other Leg Supported on the Ball	205
9.2	Ball Activities in Prone Lying	209
9.2.1	Lying Prone on the Ball with Weight Supported Through Both Arms	209
9.2.2	Lower Trunk and Hip Flexion with Both Knees Supported on the Ball	209
9.2.3	Rotating the Trunk Until Only One Trochanter Is Supported on the Ball	212
9.3	Ball Activities in Sitting	213
9.3.1	Flexing and Extending the Lumbar Spine	214
9.3.2	Lateral Flexion of the Lumbar Spine	215
9.3.3	Bouncing on the Ball	218
9.3.4	Walking Both Feet Forwards Until Only the Shoulders Are Supported on the Ball	219
9.4	Ball Activities in Standing	221
9.4.1	Standing on One Leg with the Other Foot on a Moving Ball	221
9.5	Conclusion	223
 10	 Walking	 224
10.1	Observing, Analysing, and Facilitating Walking – Theoretical Considerations	225
10.1.1	Rhythm and Cadence	225
10.1.2	Step Length	225
10.1.3	Position of the Feet on the Floor	226
10.1.4	The Knee	226
10.1.5	The Pelvis	227
10.1.6	The Trunk	227
10.1.7	The Arms	227
10.1.8	The Head	227
10.1.9	Maintaining Balance	228
10.2	Facilitating Walking – Practical Considerations	228
10.2.1	Footwear	228
10.2.2	Assisting Hip Extension	229
10.3	Facilitating Walking Backwards	230
10.3.1	Tipped Backwards Without Taking a Step	230
10.3.2	Taking Steps Backwards	231
10.4	Facilitating Walking Sideways	235
10.4.1	Towards the Sound Side	235
10.4.2	Towards the Hemiplegic Side	236

10.5	Facilitating Walking Forwards	239
10.5.1	Stabilising the Thorax and Moving the Trunk Forwards	239
10.5.2	Facilitation to Prevent Side Flexion of the Trunk and Associated Reactions in the Arm	242
10.5.2.1	Supporting the Hemiplegic Arm	242
10.5.2.2	Holding a Ball	243
10.5.2.3	Holding a Pole in Both Hands	244
10.5.2.4	Applying Pressure to the Patient's Chest	244
10.5.3	Facilitation Using Stimulating and Inhibitory Tapping	248
10.5.3.1	Stimulating Tapping over the Hip Extensors	248
10.5.3.2	Stimulating Tapping for the Lower Abdominal Muscles	250
10.5.3.3	Inhibitory Tapping	250
10.5.4	Facilitation to Narrow the Stride Width	252
10.5.4.1	Walking Along a Line	252
10.5.4.2	Walking Along a Plank	254
10.5.5	Facilitation to Re-establish Rhythm	255
10.5.5.1	Using a Tambourine	255
10.5.5.2	Bouncing a Ball with the Sound Hand	257
10.5.5.3	Bouncing a Large Ball with Both Hands	257
10.5.5.4	Imitating the Therapist's Steps	259
10.5.6	Facilitating Walking on the Toes	260
10.5.7	Walking with the Head Moving Freely	261
10.5.7.1	Throwing and Catching a Ball	263
10.5.7.2	Beating a Tambourine	265
10.6	Conclusion	265
