

Contents

Chapter 1	How To Measure Smoothness	1
1.1	Introduction	1
1.2	Derivatives and differences of functions	2
1.3	The spectral approach	9
1.4	Hardy spaces	20
1.5	The Fourier-analytical approach	27
1.6	Interpolation methods	36
1.7	Local approximation spaces	46
1.8	Local means, traces of harmonic and thermic functions	52
1.9	A new device: Atoms as building blocks	59
1.10	Spaces on domains	68
1.11	Spaces on Riemannian manifolds and Lie groups	75
1.12	Epilogue	85
Chapter 2	The Spaces B_{pq}^s and F_{pq}^s : Definitions and Characterizations	87
2.1	Introduction	87
2.2	Prerequisites	87
2.3	Definitions and basic properties	92
2.4	General characterizations for F_{pq}^s	100
2.5	General characterizations for B_{pq}^s	131
2.6	Concrete characterizations	139
Chapter 3	Atoms, Oscillations, and Distinguished Representations	159
3.1	Introduction	159
3.2	Atomic decompositions of F_{pq}^s	160
3.3	Distinguished representations	173
3.4	Oscillations	179
3.5	Characterizations via oscillations and differences	186
Chapter 4	Key Theorems	199
4.1	Introduction	199
4.2	Pointwise multipliers	201
4.3	Diffeomorphisms	206
4.4	Traces	212
4.5	Spaces on \mathbb{R}_+^n , extensions	221

Chapter 5	Spaces on Domains	237
5.1	Preliminaries	237
5.2	Intrinsic characterizations	240
5.3	Morrey–Campanato spaces, the spaces C_p^s	246
5.4	Further problems	252
Chapter 6	Mapping Properties of Pseudodifferential Operators	255
6.1	Introduction	255
6.2	An approach via local means	256
6.3	An approach via atoms	261
Chapter 7	Spaces on Riemannian Manifolds and Lie Groups	281
7.1	Introduction	281
7.2	The spaces F_{pq}^s on manifolds	281
7.3	The spaces B_{pq}^s on manifolds	308
7.4	Further properties of the spaces F_{pq}^s and B_{pq}^s on manifolds	313
7.5	Characterizations of spaces on manifolds via differences and derivatives	325
7.6	Spaces on Lie groups	337
