Foreword	9
Chapter 1	
Childhood and Youth. Road to Science	13
Chapter 2	
In the Leningrad University (1926–1932)	19
2.1. Entering the University	19
2.2. The Jazz-Band	20
2.3. The Abbot and his Astronomer Friends	22
2.4. First Works in Astrophysics, Geophysics and Popular Science	26
2.5. At the Shenroks on the Vasiliev Island	29
Chapter 3	
At the Leningrad Physicotechnical Institute	33
3.1. Theoretical Physics in St. Petersburg and Petrograd	33
3.2. The Physicotechnical Institute and Its Seminars	34
3.3. “Quantising Free Electrons in a Magnetic Field”	37
3.4. “A New Crisis in the Theory of Quanta”	39
3.5. Science and Society	43
3.6. Quantum Mechanics in the Early Thirties	45
3.7. Cosmology in the Early Thirties	47
3.8. The Ether and the Theory of Relativity	50
3.9. Styles and Generations	53
3.10. The Physics of Semiconductors and Nuclear Physics	57
Chapter 4	
Hard Times for the Laws of Conservation and for Theoreticians	63
4.1. Three Attempts to Topple the Law of Conservation of Energy	64
4.2. The Hypothesis of Non-conservation and the Arguments of its Supporters	66
4.2.1. Waiting for a Relativistic Theory of Quanta	66
4.2.2. The Neutrino Alternative	68

4.2.3. Non-conservation of Energy, General Relativity, Cosmology and Astrophysics	69
4.3. Non-Physical Arguments Applied to Physics	74
4.4. A Duel in <i>Sorena</i>	77
4.5. The Death of a Non-conservation Hypothesis	80
Chapter 5	
cGħ-Physics in Bronstein's Life	83
5.1. An Unsuitable Thesis	83
5.2. The Roots of Bronstein's Interest in cGħ-physics	86
5.2.1. Quantum Gravity before Bronstein	86
5.2.2. "The Relationship Between the Physical Theories and Their Relation to the Cosmological Problem"	88
5.2.3. At the Sources of Quantum Relativistic Astrophysics	93
5.3. The Quantum Theory of the Weak Gravitational Field	95
5.4. "The Fundamental Differences Between Quantum Electrodynamics and the Quantum Theory of Gravitational Field". The Quantum Gravitational Limits	99
5.4.1. The Problem of cħ Measurability	99
5.4.2. cGħ Measurability and GR Quantum Limits	102
5.4.3. The Planck Scales in cGħ-physics	106
5.4.4. Reception of the Quantum-Gravitational Limits	108
5.5. Physics and Cosmology	112
5.5.1. Cosmology in the Thirties	112
5.5.2. Bronstein's Attitude to Cosmology	115
5.5.3. Red shift, the Relativity Principle and Polarisation of the Vacuum	117
Chapter 6	
Creative Personality	123
6.1. Perceiving the World	123
6.2. Vocation of a Teacher	127
6.3. Science and Literature	132
6.4. Personality	138
Afterword	143
Afterword to the English Edition. Half a Century Later	144
1. From the KGB-NKVD Archives	144
2. The Last Days in the Cell	146
3. Subnuclear Physics, Matvei Bronstein and Ettore Majorana	148

Chronology	153
Notes	155
Bibliography	161
Appendix 1. Extract from M.P.Bronstein's paper "Quantentheorie schwacher Gravitationsfelder", 1936	173
Appendix 2. M.P.Bronstein's note "Über den Spontanen Zerfall der Photonen", 1936	183
Appendix 3. M.P.Bronstein "Inventors of Radiotelegraph" (First chapters of the book)	187
Photographs	195
Index	205
Bibliography after 1994	209

Matvei Petrovich Bronstein
and Soviet Theoretical Physics in the Thirties

Gorelik, G.; Frenkel, V.Y.

1994, XI, 198 p. 4 illus., Softcover

ISBN: 978-3-0348-0199-7

A product of Birkhäuser Basel
