

# Contents

<b>Introduction</b>	1
<b>Chapter I. Hilbert Schemes and Chow Varieties</b>	5
I.1 Construction of the Hilbert Scheme	8
I.2 Infinitesimal Study of the Hilbert Scheme	20
I.3 Chow Varieties	40
I.4 Chow Varieties in Positive Characteristic	62
I.5 Related Moduli Problems	73
I.6 Comparing Chow Varieties and Hilbert Schemes	78
I.7 Appendix: Some Results from Commutative Algebra	83
<b>Chapter II. Curves on Varieties</b>	90
II.1 Deformations of Morphisms of Curves	92
II.2 Families of Rational Curves	103
II.3 Free Morphisms of Curves	113
II.4 Cone of Curves	121
II.5 Bend and Break	134
II.6 Application: A Vanishing Theorem for $H^1$	148
II.7 Smoothing of Morphisms of Curves	154
<b>Chapter III. The Cone Theorem and Minimal Models</b>	159
III.1 The Cone Theorem	160
III.2 Minimal Models of Surfaces	167
III.3 Del Pezzo Surfaces	171
<b>Chapter IV. Rationally Connected Varieties</b>	179
IV.1 Ruled and Uniruled Varieties	181
IV.2 Minimizing Families of Rational Curves	192
IV.3 Rationally Connected Varieties	198
IV.4 Growing Chains of Rational Curves	209
IV.5 Maximal Rationally Connected Fibrations	222
IV.6 Rationally Connected Varieties over Nonclosed Fields	228

<b>Chapter V. Fano Varieties</b> .....	238
V.1 Low Degree Rational Curves on Fano Varieties .....	239
V.2 Boundedness of Fano Varieties .....	250
V.3 Characterizations of $\mathbb{P}^n$ .....	257
V.4 Lines on Fano Hypersurfaces .....	265
V.5 Nonrational Fano Varieties .....	272
 <b>Chapter VI. Appendix</b> .....	 285
VI.1 Rational Curves on Exceptional Loci .....	286
VI.2 Intersection Numbers of Divisors and Asymptotic Riemann-Roch .....	292
 <b>References</b> .....	 308
<b>Index</b> .....	318
