Introduction	ix
1 The Jacobi Group	
1.1 Definition of G^J	1
1.2 G^J as an algebraic group	3
1.3 The Lie algebra of G^J	7
1.4 G^J over the reals	9
2 Basic Representation Theory of the Jacobi Group	
2.1 Induced representations	15
2.2 The Schrödinger representation	18
2.3 Mackey's method for semidirect products	21
2.4 Representations of G^J with trivial central character	22
2.5 The Schrödinger-Weil representation	24
2.6 Representations of G^J with non-trivial central character	28
3 Local Representations: The Real Case	
3.1 Representations of $\mathfrak{g}_{\mathbb{C}}^J$	32
3.2 Models for infinitesimal representations and unitarizability	39
3.3 Representations induced from B^J	48
3.4 Representations induced from K^J and the automorphic factor	51
3.5 Differential operators on $\mathbf{X} = \mathbf{H} \times \mathbb{C}$	59
3.6 Representations induced from \hat{N}^J and Whittaker models	63
4 The Space $L^2(\Gamma^J \backslash G^J(\mathbb{R}))$ and its Decomposition	
4.1 Jacobi forms and more general automorphic forms	76
4.2 The cusp condition for $G^J(\mathbb{R})$	83
4.3 The discrete part and the duality theorem	88
4.4 The continuous part	94

5	Local Representations: The p-adic Case	
5.1	Smooth and admissible representations	105
5.2	Whittaker models for the Schrödinger-Weil representation . . .	107
5.3	Representations of the metaplectic group	112
5.4	Induced representations	115
5.5	Supercuspidal representations	119
5.6	Intertwining operators	121
5.7	Whittaker models	127
5.8	Summary and Classification	132
5.9	Unitary representations	135
6	Spherical Representations	
6.1	The Hecke algebra of the Jacobi group	138
6.2	Structure of the Hecke algebra in the good case	140
6.3	Spherical representations in the good case	148
6.4	Spherical Whittaker functions	153
6.5	Local factors and the spherical dual	163
6.6	The Eichler-Zagier operators	167
7	Global Considerations	
7.1	Adelization of G^J	174
7.2	The global Schrödinger-Weil representation	176
7.3	Automorphic representations	179
7.4	Lifting of Jacobi forms	183
7.5	The representation corresponding to a Jacobi form	193
	Bibliography	201
	Index of Notations	207
	Index	211

Elements of the Representation Theory of the Jacobi
Group

Berndt, R.; Schmidt, R.

1998, XIII, 213 p., Softcover

ISBN: 978-3-0348-0282-6
