Preface	ix
List of Symbols	xiii
1 Basic Concepts	
1.1 Semisimple rings and modules	1
1.2 Local and semilocal rings	5
1.3 Serial rings and modules	9
1.4 Pure exact sequences	12
1.5 Finitely definable subgroups and pure-injective modules	18
1.6 The category $({}_R\text{FP}, \text{Ab})$	25
1.7 Σ -pure-injective modules	28
1.8 Notes on Chapter 1	31
2 The Krull-Schmidt-Remak-Azumaya Theorem	
2.1 The exchange property	33
2.2 Indecomposable modules with the exchange property	36
2.3 Isomorphic refinements of finite direct sum decompositions	39
2.4 The Krull-Schmidt-Remak-Azumaya Theorem	43
2.5 Applications	45
2.6 Goldie dimension of a modular lattice	51
2.7 Goldie dimension of a module	55
2.8 Dual Goldie dimension of a module	57
2.9 \aleph -small modules and \aleph -closed classes	61
2.10 Direct sums of \aleph -small modules	65
2.11 The Loewy series	68
2.12 Artinian right modules over commutative or right noetherian rings	70
2.13 Notes on Chapter 2	71

3	Semiperfect Rings	
3.1	Projective covers and lifting idempotents	75
3.2	Semiperfect rings	79
3.3	Modules over semiperfect rings	82
3.4	Finitely presented and Fitting modules	86
3.5	Finitely presented modules over serial rings	92
3.6	Notes on Chapter 3	96
4	Semilocal Rings	
4.1	The Camps-Dicks Theorem	99
4.2	Modules with semilocal endomorphism ring	103
4.3	Examples	108
4.4	Notes on Chapter 4	110
5	Serial Rings	
5.1	Chain rings and right chain rings	113
5.2	Modules over artinian serial rings	115
5.3	Nonsingular and semihereditary serial rings	118
5.4	Noetherian serial rings	121
5.5	Notes on Chapter 5	128
6	Quotient Rings	
6.1	Quotient rings of arbitrary rings	129
6.2	Nil subrings of right Goldie rings	132
6.3	Reduced rank	134
6.4	Localization in chain rings	140
6.5	Localizable systems in a serial ring	142
6.6	An example	147
6.7	Prime ideals in serial rings	149
6.8	Goldie semiprime ideals	152
6.9	Diagonalization of matrices	155
6.10	Ore sets in serial rings	158
6.11	Goldie semiprime ideals and maximal Ore sets	161
6.12	Classical quotient ring of a serial ring	162
6.13	Notes on Chapter 6	169
7	Krull Dimension and Serial Rings	
7.1	Deviation of a poset	171
7.2	Krull dimension of arbitrary modules and rings	175
7.3	Nil subrings of rings with right Krull dimension	177
7.4	Transfinite powers of the Jacobson radical	182
7.5	Structure of serial rings of finite Krull dimension	187
7.6	Notes on Chapter 7	191

8 Krull-Schmidt Fails for Finitely Generated Modules and Artinian Modules	
8.1 Krull-Schmidt fails for finitely generated modules	193
8.2 Krull-Schmidt fails for artinian modules	201
8.3 Notes on Chapter 8	205
9 Biuniform Modules	
9.1 First properties of biuniform modules	209
9.2 Some technical lemmas	212
9.3 A sufficient condition	216
9.4 Weak Krull-Schmidt Theorem for biuniform modules	218
9.5 Krull-Schmidt holds for finitely presented modules over chain rings	220
9.6 Krull-Schmidt fails for finitely presented modules over serial rings	222
9.7 Further examples of biuniform modules of type 1	225
9.8 Quasi-small uniserial modules	227
9.9 A necessary condition for families of uniserial modules	231
9.10 Notes on Chapter 9	233
10 Σ-pure-injective Modules and Artinian Modules	
10.1 Rings with a faithful Σ -pure-injective module	237
10.2 Rings isomorphic to endomorphism rings of artinian modules	240
10.3 Distributive modules	244
10.4 Σ -pure-injective modules over chain rings	249
10.5 Homogeneous Σ -pure-injective modules	251
10.6 Krull dimension and Σ -pure-injective modules	254
10.7 Serial rings that are endomorphism rings of artinian modules	257
10.8 Localizable systems and Σ -pure-injective modules over serial rings	260
10.9 Notes on Chapter 10	264
11 Open Problems	267
Bibliography	271
Index	283

Module Theory

Endomorphism rings and direct sum decompositions in
some classes of modules

Facchini, A.

1998, XIII, 285 p., Softcover

ISBN: 978-3-0348-0302-1

A product of Birkhäuser Basel
