II/24 Molecular Constants

Subvolume A

1	Introduction	1
1.1	General remarks	1
1.2	Review articles and tables	1
1.3	Arrangement of tables, substances and parameters	2
1.3.1	Arrangement of chapters and sections	2
1.3.2	Arrangements within the sections of chapters 2 and 3	2
1.3.3	Explanation of the columns of the tables in chapters 2 and 3	2
1.3.4	Notation of experimental error	3
1.4	Selection of data	3
1.5	Abbreviations used for experimental methods	3
1.6	Selected fundamental constants and conversion factors	4
1.7	References for 1	6
2	Constants of diamagnetic molecules	7
2.1	Survey	7
2.2	Diatomic molecules: Rotational constants, centrifugal distortion constants, rotation-vibration interaction constants, Dunham energy parameters and potential coefficients, parameters of the breakdown of the Born-Oppenheimer approximation and of the nuclear field shift, and equilibrium internuclear distances (H. HÜBNER)	7
2.2.1	Preliminary remarks	7
2.2.2	Data	13
2.2.3	References for 2.2.2	146
2.3	Linear molecules: Rotational constants, centrifugal distortion constants, ℓ -type doubling constants, higher-order rotation-vibration and Fermi interaction constants (G. WŁODARCZAK)	157
2.3.1	Preliminary remarks	157
2.3.2	Data	162
2.3.3	References for 2.3.2	197
2.4	Symmetric top molecules: Rotational constants, centrifugal distortion constants, ℓ -type doubling constants, higher-order rotation-vibration and Fermi interaction constants (J. DEMAISON)	200
2.4.1	Preliminary remarks	200
2.4.2	Data	207
2.4.3	References for 2.4.2	281

Rotational, l-type, Centrifugal Distortion and Related
Constants of Diamagnetic Diatomic, Linear, and
Symmetric Top Molecules

1998, VII, 286 p. With CD-ROM., Hardcover

ISBN: 978-3-540-63267-2
