

Table of Contents

1. Introduction	1
1.1 Interacting Program Optimisations	2
1.2 Interacting Code Motion Transformations	3
1.2.1 Interactions in Expression Motion	4
1.2.2 Interactions in Assignment Motion	5
1.3 Code Motion in the Presence of Critical Edges	6
1.4 Structure of the Monograph	7
2. Basic Formalisms and Definitions	9
2.1 Graph Theoretical Foundations	9
2.1.1 Undirected Graphs	9
2.1.2 Directed Graphs	10
2.2 Programs and Flow Graphs	10
2.2.1 Expressions	10
2.2.2 Statements	11
2.2.3 Flow Graphs	12
2.2.4 Program Points	12
2.2.5 Code Patterns	13
2.2.6 Critical Edges	14
2.3 Program Transformations	15
2.3.1 Admissibility	15
2.3.2 Optimality	15

Part I. Expression Motion

3. Optimal Expression Motion: The Single-Expression View	21
3.1 Expression Motion	22
3.1.1 Safety and Correctness	22
3.2 Busy Expression Motion	24
3.2.1 Computational Optimality	24
3.2.2 The Transformation	25
3.3 Lazy Expression Motion	26
3.3.1 Lifetime Optimality	26

3.3.2	The Transformation	27
3.4	A Classification of $COEM_\varphi$	30
3.5	Computing BEM_φ and LEM_φ	31
3.6	The Complexity	35
4.	Optimal Expression Motion: The Multiple-Expression View	37
4.1	Flat Expression Motion	37
4.1.1	Flat Busy and Lazy Expression Motion	38
4.2	Structured Expression Motion	39
4.2.1	Defining Structured Expression Motion	40
4.2.2	Computationally Optimal Structured Expression Motion	41
4.2.3	Lifetime Optimal Structured Expression Motion	46
4.3	A Graph Theoretical View on Trade-Offs between Lifetimes	50
4.3.1	Motivation	50
4.3.2	Tight Sets in Bipartite Graphs	51
4.3.3	An Efficient Decision Procedure	51
4.3.4	Efficient Computation of Tight Sets	53
4.4	Levelwise Flexible Expression Motion	59
4.4.1	Defining $LFEM_\Phi$	60
4.4.2	Proving Admissibility	62
4.4.3	Proving Computational Optimality	67
4.4.4	Proving Inductive Lifetime Optimality	70
4.4.5	Computing $LFEM_\Phi$	83
4.5	Fully Flexible Expression Motion	84
4.5.1	A Classification of Expressions	85
4.5.2	Limitations of Inductive Lifetime Optimality	88
4.5.3	General Trade-Offs	88
4.5.4	Defining $FFEM_\Phi$	93
4.5.5	Proving Admissibility	95
4.5.6	Proving Computational Optimality	98
4.5.7	Proving Lifetime Optimality	98
4.5.8	Computing $FFEM_\Phi$	105
4.6	The Complexity	109
4.6.1	The Complexity of BEM_Φ and LEM_Φ	109
4.6.2	The Complexity of $LFEM_\Phi$	109
4.6.3	The Complexity of $FFEM_\Phi$	110
4.6.4	Bit-Vector Complexity of BEM_Φ , LEM_Φ , $LFEM_\Phi$ and $FFEM_\Phi$	111
5.	Expression Motion in the Presence of Critical Edges	113
5.1	The Single-Expression View	113
5.1.1	Computational Optimal Expression Motion	114
5.1.2	Busy Expression Motion	115
5.1.3	Lazy Expression Motion	117
5.1.4	Computing $CBEM_\varphi$ and $CLEM_\varphi$	118
5.1.5	The Complexity	122

5.2	The Multiple-Expression View	126
5.2.1	Flat Expression Motion	126
5.2.2	Structured Expression Motion	126
5.2.3	The Complexity	128

Part II. Assignment Motion

6.	Program Transformations Based on Assignment Motion ..	137
6.1	Assignment Motion	137
6.1.1	Admissibility	138
6.2	Partial Dead Code Elimination	140
6.2.1	Motivation	140
6.2.2	Defining Partial Dead Code Elimination.....	141
6.2.3	Second Order Effects in Partial Dead Code Elimination	142
6.3	Partial Faint Code Elimination	145
6.4	Partially Redundant Assignment Elimination	146
6.5	The Uniform Elim. of Part. Redundant Assignments and Expressions	147
7.	A Framework for Assignment Motion Based Program Transformations	153
7.1	The Setting	153
7.1.1	Motion-Elimination Couples	153
7.1.2	A Note on the Correctness of Motion-Elimination Couples	154
7.1.3	Notational Conventions	155
7.1.4	Uniform Motion-Elimination Couples	156
7.2	Confluence of Uniform Motion-Elimination Couples	157
7.2.1	The General Case	157
7.2.2	Consistent Motion-Elimination Couples	157
7.2.3	Confluence of Consistent Motion-Elimination Couples .	166
7.2.4	The Applications	169
7.3	The Complexity of Exhaustive Iterations	171
7.3.1	Simultaneous Iteration Steps.....	173
7.3.2	Conventions	175
7.3.3	The General Case: Weakly Consistent UMECs	175
7.3.4	Consistent UMECs	178
7.4	<i>UPRE</i> as an Advanced Application of MECs.....	187
7.4.1	Computationally Optimal <i>UPRE</i>	188
7.4.2	<i>UPRE</i> and Code Decomposition	194
7.4.3	<i>UPRE</i> with Trade-Offs between Lifetimes of Variables	194

8. Assignment Motion in the Presence of Critical Edges 199

 8.1 Straightforward Adaption of MECs 199

 8.1.1 Adequacy 199

 8.1.2 Confluence 200

 8.1.3 Efficiency 201

 8.2 Enhanced UMECs 202

 8.2.1 Adequacy 203

 8.2.2 Confluence 204

 8.2.3 Efficiency 205

9. Conclusions and Perspectives 211

 9.1 Summary of the Main Results 211

 9.2 Perspectives 212
