

Preface

This book features papers first presented at the 8th International Workshop on Field-Programmable Logic and Applications (FPL'98), held in Tallinn, Estonia, August 31 to September 3, 1998.

The FPL'98 workshop was organized by the Tallinn Technical University and the University of Kaiserslautern, in co-operation with the University of Oxford, as a continuation of seven already held workshops in Oxford (1991, 1993, and 1995), in Vienna, Austria (1992), in Prague, Czech Republic (1994), in Darmstadt, Germany (1996), and in London, UK (1997).

Field-programmable logic is no longer merely a niche technology being limited to logic synthesis mainly. An increasing number of papers go toward coarse grain field-programmable platforms. More and more authors view this area as an emerging new computing paradigm. In the future the universities should teach both, procedural programming and structural programming (programming in space vs. programming in time).

The growing importance of field-programmable devices is demonstrated by the wide variety of applications described in the submitted papers for FPL'98. This time, we had 86 submissions, the second largest number in the history of FPL workshops (also see http://xputers.informatik.uni-kl.de/FPL/index_fpl.html). The highest number of submissions was received for FPL'94 in Prague, Czech Republic: 116 submissions (Springer LNCS Vol. 849, also see <http://link.springer.de/series/lncs/>).

The list below shows the distribution of origins of the papers submitted to FPL'98 (some papers were written by an international team):

Australia	2	Latvia	1
Belarus	1	Philippines	1
Belgium	1	Portugal	1
CzechRepublik	1	Russia	1
Estonia	1	Slovenia	1
Finland	2	Spain	4
France	4	Switzerland	1
Germany	20	Tunisie	1
HongKong	2	USA	14
Hungary	3	United Kingdom	17
Israel	1	Yugoslavia	1
Japan	5		

The FPL'98 Technical Program offers an exciting collection of regular presentations and posters covering a wide range of topics. From the 86 submitted papers the very best 39 regular papers and 30 high quality posters were selected. All selected papers are included in this book.

We would like to thank the reviewers and the members of the Technical Program Committee for reviewing the papers submitted to the workshop. Our thanks go also to the keynote speaker and to the authors who wrote the final papers for this issue.

We also gratefully acknowledge all the work done at Springer-Verlag in publishing this book.

Program Committee

Peter Athanas, Virginia Tech, USA
Samary Baranov, Ben Gurion U. Negev, Israel
Stephen Brown, U. of Toronto, CA
Klaus Buchenrieder, Siemens AG, FRG
Steven Casselman, VCC, USA
Bernard Courtois, INPG, Grenoble, France
Carl Ebeling, U. of Washington, USA
Norbert Fristacky, Slovak Technical U., SK
Manfred Glesner, TH Darmstadt, FRG
John Gray, Xilinx, UK
Herbert Grünbacher, Vienna U., Austria
Reiner Hartenstein, U. of Kaiserslautern, FRG
Brad Hutchings, Brigham Young U., UAS
Udo Kebschull, U. of Tübingen, FRG
Andres Keevallik, Tallinn Technical U., Estonia
Wayne Luk, Imperial College, UK
Patrick Lysaght, U. of Strathclyde, Scotland
Toshiaki Miyazaki, NTT Laboratories, Japan
Will Moore, Oxford U., UK
Wolfgang Nebel, U. of Oldenburg, FRG
Paolo Prinetto, Politecnico di Torino, Italy
Jonathan Rose, U. of Toronto, Canada
Zoran Salcic, U. of Auckland, New Zealand
Michal Servit †, Czech T.U., Czech Republic
Marc Shand, Digital Systems Research Center, USA
Stephen Smith, Altera, USA
Steve Trimberger, Xilinx, USA

Organizing Committee

Andres Keevallik, Tallinn Technical University, Estonia, General Chairman
Reiner Hartenstein, University of Kaiserslautern, Germany, Program Chairman

Field-Programmable Logic and Applications. From FPGAs
to Computing Paradigm

8th International Workshop, FPL'98 Tallinn, Estonia,

August 31 - September 3, 1998 Proceedings

Hartenstein, R.W.; Keevallik, A. (Eds.)

1998, XIII, 539 p., Softcover
