

Contents

Invited Talks

- Approximations of independent sets in graphs 1
Magnús M. Halldórsson
- Using linear programming in the design and analysis of 15
approximation algorithms: Two illustrative problems
David B. Shmoys
- The steiner tree problem and its generalizations 33
Vijay V. Vazirani

Contributed Talks

- Approximation schemes for covering and scheduling on 39
related machines
Yossi Azar and Leah Epstein
- One for the price of two: A unified approach for 49
approximating covering problems
Reuven Bar-Yehuda
- Approximation of geometric dispersion problems 63
Christoph Baur and Sándor P. Fekete
- Approximating k -outconnected subgraph problems 77
Joseph Cheriyan, Tibor Jordán and Zeev Nutov
- Lower bounds for on-line scheduling with precedence 89
constraints on identical machines
Leah Epstein
- Instant recognition of half integrality and 2-approximations 99
Dorit S. Hochbaum
- The t - vertex cover problem: Extending the half integrality 111
framework with budget constraints
Dorit S. Hochbaum

VIII Table of Contents

A new fully polynomial approximation scheme for the knapsack problem <i>Hans Kellerer and Ulrich Pferschy</i>	123
On the hardness of approximating spanners <i>Guy Kortsarz</i>	135
Approximating circular arc colouring and bandwidth allocation in all-optical ring networks <i>Vijay Kumar</i>	147
Approximating maximum independent set in k -clique-free graphs <i>Ingo Schiermeyer</i>	159
Approximating an interval scheduling problem <i>Frits C.R. Spieksma</i>	169
Finding dense subgraphs with semidefinite programming <i>Anand Srivastav and Katja Wolf</i>	181
Best possible approximation algorithm for MAX SAT with cardinality constraint <i>Maxim I. Sviridenko</i>	193
Author Index	201

Approximation Algorithms for Combinatorial Optimization
International Workshop APPROX'98, Aalborg, Denmark,
July 18-19, 1998, Proceedings
Jansen, K.; Rolim, J. (Eds.)
1998, IX, 207 p., Softcover
ISBN: 978-3-540-64736-2
