# Contents

Preface .....	v
Contributors .....	xi
1 UV-Visible Spectroscopy as a Tool to Study Flavoproteins <b>Peter Macheroux</b> .....	1
2 Identifying and Quantitating FAD and FMN in Simple and in Iron– Sulfur-Containing Flavoproteins <b>Alessandro Aliverti, Bruno Curti, and Maria Antonietta Vanoni</b> ....	9
3 Fluorescence Analysis of Flavoproteins <b>Andrew W. Munro and Michael A. Noble</b> .....	25
4 Potentiometric Measurement of Oxidation–Reduction Potential <b>Stephen G. Mayhew</b> .....	49
5 Flavoprotein Kinetics <b>Willem J. H. van Berkel, Jacques A. E. Benen, Michel H. M. Eppink, and Marco W. Fraaije</b> .....	61
6 Application of Freeze Quenching to the Study of Rapid Reactions in Flavoproteins <b>W. John Ingledew</b> .....	87
7 Application of Electron Spin Resonance (ESR) for Detection and Characterization of Flavoprotein Semiquinones <b>Marat B. Murataliev</b> .....	97
8 Circular Dichroism Studies of Flavoproteins <b>Andrew W. Munro, Sharon M. Kelly, and Nicholas C. Price</b> .....	111
9 Vibrational Spectroscopy of Flavoproteins <b>Iain D. G. Macdonald</b> .....	125
10 NMR of Flavoproteins <b>Jacques Vervoort and Marco Hefti</b> .....	139
11 Flavoprotein Resolution and Reconstitution <b>Florence Lederer, Heinz Rüterjans, and Garrit Fleischmann</b> .....	149
12 Flavoenzyme Structure and Function: <i>Approaches Using Flavin Analogues</i> <b>Dale Edmondson and Sandro Ghisla</b> .....	157

13	Identification of Covalent Flavoproteins and Analysis of the Covalent Link <b>Nigel S. Scrutton</b> .....	181
14	Flavin Synthesis and Incorporation into Synthetic Peptides <b>R. Eryl Sharp and P. Leslie Dutton</b> .....	195
15	Computational Methods in Flavin Research <b>Lars Ridder, Hans Zuilhof, Jacques Vervoort, and Ivonne M. C. M. Rietjens</b> .....	207
16	Flavins and Flavoenzymes in Diagnosis and Therapy <b>Katja Becker, Markus Schirmer, Stefan Kanzok, and R. Heiner Schirmer</b> .....	229
	Index .....	247
