

Table of Contents

Invited Papers

The Melting Pot of Automated Discovery: Principles for a New Science . . <i>Jan M. Żytkow</i>	1
Expressive Probability Models in Science <i>Stuart Russell</i>	13

Contributed Papers

Weighted Majority Decision among Several Region Rules for Scientific Discovery <i>Akihiro Nakaya, Hideharu Furukawa, and Shinichi Morishita</i>	17
CAEP: Classification by Aggregating Emerging Patterns <i>Guozhu Dong, Xiuzhen Zhang, Limsoon Wong, and Jinyan Li</i>	30
An Appropriate Abstraction for an Attribute-Oriented Induction <i>Yoshimitsu Kudoh and Makoto Haraguchi</i>	43
Collaborative Hypothesis Testing Processes by Interactive Production Systems <i>Kazuhisa Miwa</i>	56
Computer Aided Discovery of User's Hidden Interest for Query Restructuring <i>Wataru Sunayama, Yukio Ohsawa, and Masahiko Yachida</i>	68
Iterative Naive Bayes <i>João Gama</i>	80
Schema Design for Causal Law Mining from Incomplete Database <i>Kazunori Matsumoto and Kazuo Hashimoto</i>	92
Design and Evaluation of an Environment to Automate the Construction of Inductive Applications <i>Akihiro Suyama, Naoya Negishi, and Takahira Yamaguchi</i>	103
Designing Views in HypothesisCreator: System for Assisting in Discovery <i>Osamu Maruyama, Tomoyuki Uchida, Kim Lan Sim, and Satoru Miyano</i>	115
Discovering Poetic Allusion in Anthologies of Classical Japanese Poems <i>Kouichi Tamari, Mayumi Yamasaki, Takuya Kida, Masayuki Takeda, Tomoko Fukuda, and Ichirō Nanri</i>	128

Characteristic Sets of Strings Common to Semi-structured Documents. . .	139
<i>Daisuke Ikeda</i>	
Approximation of Optimal Two-Dimensional Association Rules for Categorical Attributes Using Semidefinite Programming	148
<i>Katsuki Fujisawa, Yukinobu Hamuro, Naoki Katoh, Takeshi Tokuyama, and Katsutoshi Yada</i>	
Data Mining of Generalized Association Rules Using a Method of Partial-Match Retrieval	160
<i>Kazunori Matsumoto, Takeo Hayase, and Nobuyuki Ikeda</i>	
Adaptive Sampling Methods for Scaling Up Knowledge Discovery Algorithms	172
<i>Carlos Domingo, Ricard Gavaldà, and Osamu Watanabe</i>	
Scheduled Discovery of Exception Rules	184
<i>Einoshin Suzuki</i>	
Learning in Constraint Databases	196
<i>Teddy Turmeaux and Christel Vrain</i>	
Discover Risky Active Faults by Indexing an Earthquake Sequence	208
<i>Yukio Ohsawa and Masahiko Yachida</i>	
Machine Discovery Based on the Co-occurrence of References in a Search Engine	220
<i>Tsuyoshi Murata</i>	
Smoothness Prior Approach to Explore the Mean Structure in Large Time Series Data	230
<i>Genshiro Kitagawa, Tomoyuki Higuchi, and Fumiyo N. Kondo</i>	
Automatic Detection of Geomagnetic Sudden Commencement Using Lifting Wavelet Filters	242
<i>Shigeru Takano, Teruya Minamoto, Hiroki Arimura, Koichi Niijima, Toshihiko Iyemori, and Tohru Araki</i>	
A Noise Resistant Model Inference System	252
<i>Eric McCreath and Mark Reid</i>	
A Graphical Method for Parameter Learning of Symbolic-Statistical Models	264
<i>Yoshitaka Kameya, Nobuhisa Ueda, and Taisuke Sato</i>	
Parallel Execution for Speeding Up Inductive Logic Programming Systems	277
<i>Hayato Ohwada and Fumio Mizoguchi</i>	

Discovery of a Set of Nominally Conditioned Polynomials	287
<i>Ryohei Nakano and Kazumi Saito</i>	
H-Map: A Dimension Reduction Mapping for Approximate Retrieval of Multi-dimensional Data	299
<i>Takeshi Shinohara, Jianping Chen, and Hiroki Ishizaka</i>	
Normal Form Transformation for Object Recognition Based on Support Vector Machines	306
<i>Shinsuke Sugaya and Einoshin Suzuki</i>	
Posters	
A Definition of Discovery in Terms of Generalized Descriptonal Complexity	316
<i>Hideo Bannai and Satoru Miyano</i>	
Feature Selection Using Consistency Measure	319
<i>Manoranjan Dash, Huan Liu, and Hiroshi Motoda</i>	
A Model of Children's Vocabulary Acquisition Using Inductive Logic Programming	321
<i>Koichi Furukawa, Ikuo Kobayashi, Tomonobu Ozaki, and Mutsumi Imai</i>	
Automatic Acquisition of Image Processing Procedures from Sample Sets of Classified Images Based on Requirement of Misclassification Rate .	323
<i>Toshihiro Hamada, Akinobu Shimizu, Toyofumi Saito, Jun-ichi Hasegawa, and Jun-ichiro Toriwaki</i>	
"Thermodynamics" from Time Series Data Analysis	326
<i>Hiroshi H. Hasegawa, Takashi Washio, and Yukari Ishimiya</i>	
Developing a Knowledge Network of URLs	328
<i>Daisuke Ikeda, Tsuyoshi Taguchi, and Sachio Hirokawa</i>	
Derivation of the Topology Structure from Massive Graph Data	330
<i>Akihiro Inokuchi, Takashi Washio, and Hiroshi Motoda</i>	
Mining Association Algorithm Based on ROC Convex Hull Method in Bibliographic Navigation System	333
<i>Minoru Kawahara and Hiroyuki Kawano</i>	
Regularization of Linear Regression Models in Various Metric Spaces . . .	335
<i>Vladimir V. Krepets</i>	
Argument-Based Agent Systems	338
<i>Shinya Maeda, Yuichi Umeda, Cyunyang Guan, and Hajime Sawamura</i>	

Graph-Based Induction for General Graph Structured Data	340
<i>Takashi Matsuda, Tadashi Horiuchi, Hiroshi Motoda, Takashi Washio, Kohei Kumazawa, and Naohide Arai</i>	
Rules Extraction by Constructive Learning of Neural Networks and Hidden-Unit Clustering	343
<i>Marghny H. Mohamed and Koichi Niijima</i>	
Weighted Majority Decision among Region Rules for a Categorical Dataset	345
<i>Akihiro Nakaya and Shinichi Morishita</i>	
Rule Discovery Technique Using GP with Crossover to Maintain Variety .	347
<i>Ayahiko Niimi and Eiichiro Tazaki</i>	
From Visualization to Interactive Animation of Database Records	349
<i>Makoto Ohigashi and Yuzuru Tanaka</i>	
Extraction of Primitive Motion for Human Motion Recognition	351
<i>Ryuta Osaki, Mitsuomi Shimada, and Kuniaki Uehara</i>	
Finding Meaningful Regions Containing Given Keywords from Large Text Collections	353
<i>Kunihiko Sadakane and Hiroshi Imai</i>	
Mining Adaptation Rules from Cases in CBR Systems	355
<i>Shadan Saniepour and Behrouz H. Far</i>	
An Automatic Acquisition of Acoustical Units for Speech Recognition based on Hidden Markov Network	357
<i>Motoyuki Suzuki, Takafumi Hayashi, Hiroki Mori, Shozo Makino, and Hirotomo Aso</i>	
Knowledge Discovery from Health Data Using Weighted Aggregation Classifiers	359
<i>Toru Takae, Minoru Chikamune, Hiroki Arimura, Ayumi Shinohara, Hitoshi Inoue, Shun-ichi Takeya, Keiko Uezono, and Terukazu Kawasaki</i>	
Search for New Methods for Assignment of Complex Molecular Spectra . .	362
<i>Takehiko Tanaka and Takashi Imajo</i>	
Automatic Discovery of Definition Patterns Based on the MDL Principle .	364
<i>Masatoshi Tsuchiya and Sadao Kurohashi</i>	
Detection of the Structure of Particle Velocity Distribution by Finite Mixture Distribution Model	366
<i>Genta Ueno, Shinobu Machida, Nagatomo Nakamura, Tomoyuki Higuchi, and Tohru Araki</i>	

Mutagenes Discovery Using PC GUHA Software System	369
<i>Premysl Zak and Jaroslava Halova</i>	
Discovering the Primary Factors of Cancer from Health and Living Habit Questionnaires	371
<i>Xiaolong Zhang and Tetsuo Narita</i>	
Author Index	373

Discovery Science

Second International Conference, DS'99, Tokyo, Japan,

December 6-8, 1999 Proceedings

Arikawa, S.; Furukawa, K. (Eds.)

1999, XII, 380 p., Softcover

ISBN: 978-3-540-66713-1
