Invited Lecture

A Case for Message Oriented Middleware	1
<i>Guruduth Banavar, Tushar Chandra, Robert Strom, Daniel Sturman</i>	

Regular Papers

Revisiting the Weakest Failure Detector for Uniform Reliable Broadcast (<i>Won the Best Student Paper Award</i>)	19
<i>Marcos Kawazoe Aguilera, Sam Toueg, Borislav Deianov</i>	
Efficient Algorithms to Implement Unreliable Failure Detectors in Partially Synchronous Systems	34
<i>Mikel Larrea, Sergio Arevalo, Antonio Fernández</i>	
Solving Consensus Using Chandra-Toueg’s Unreliable Failure Detectors: A General Quorum-Based Approach	49
<i>Achour Mostéfaoui, Michel Raynal</i>	
A Dynamic Primary Configuration Group Communication Service	64
<i>Roberto De Prisco, Alan Fekete, Nancy Lynch, Alex Shvartsman</i>	
Asynchronous Group Membership with Oracles	79
<i>Kal Lin, Vassos Hadzilacos</i>	
Generic Broadcast	94
<i>Fernando Pedone, André Schiper</i>	
Non-Blocking Asynchronous Byzantine Quorum Systems	109
<i>Rida A. Bazzi</i>	
Byzantine Agreement Secure Against General Adversaries in the Dual Failure Model	123
<i>Bernd Altmann, Matthias Fitzi, Ueli Maurer</i>	
Randomness Recycling in Constant-Round Private Computations	138
<i>Carlo Blundo, Clemente Galdi, Pino Persiano</i>	
Abuse-free Multi-Party Contract Signing	151
<i>Juan A. Garay, Philip MacKenzie</i>	
Fair and Efficient Mutual Exclusion Algorithms	166
<i>K. Alagarsamy, K. Vidyasankar</i>	

Fast <i>and</i> Scalable Mutual Exclusion	180
<i>James H. Anderson, Yong-Jik Kim</i>	
The Congenial Talking Philosophers Problem in Computer Networks	195
<i>Yuh-Jzer Joung</i>	
Software Fault Tolerance of Concurrent Programs Using Controlled Re-execution	210
<i>Ashis Tarafdar, Vijay K. Garg</i>	
DUALITY: An Architecture Independent Design Model for Parallel Systems Based on Partial Order Semantics	225
<i>Camelia Zlatea, Tzilla Elrad</i>	
A New Rewrite Method for Proving Convergence of Self-Stabilizing Systems	240
<i>Joffroy Beauquier, Béatrice Bérard, Laurent Fribourg</i>	
Stabilization-Preserving Atomicity Refinement	254
<i>Mikhail Nesterenko, Anish Arora</i>	
Self-Testing/Correcting Protocols	269
<i>Matthew Franklin, Juan A. Garay, Moti Yung</i>	
Randomization Helps to Perform Tasks on Processors Prone to Failures . . .	284
<i>Bogdan S. Chlebus, Dariusz R. Kowalski</i>	
A New Scheduling Algorithm for General Strict Multithreaded Computations	297
<i>Panagiota Fatourou, Paul Spirakis</i>	
Consensus Numbers of Transactional Objects	312
<i>Eric Ruppert</i>	
Linearizability in the Presence of Drifting Clocks and Under Different Delay Assumptions	327
<i>Maria Eleftheriou, Marios Mavronicolas</i>	
Maintenance of a Spanning Tree in Dynamic Networks	342
<i>Shay Kutten, Avner Porat</i>	
Author Index	357
