

# Contents

Introduction . . . . .	1
1 Preordered and partially ordered rings . . . . .	21
2 Reflective subcategories . . . . .	35
3 Totally ordered and real closed fields . . . . .	43
4 Real spectra of preordered rings . . . . .	45
5 Epimorphisms of reduced porings . . . . .	51
6 Punctions and representable porings . . . . .	55
7 Semi-algebraic functions . . . . .	63
8 Comparing reflectors . . . . .	79
9 Constructing reflectors . . . . .	93
10 $H$ -closed epireflectors . . . . .	107
11 Quotient-closed reflectors . . . . .	125
12 The real closure reflector . . . . .	133
13 Arities of reflectors and approximations by $H$ -closed re- flectors . . . . .	161
14 Epimorphic extensions of reduced porings . . . . .	167
15 Essential monoreflectors . . . . .	183
16 Reflections of totally ordered fields . . . . .	189
17 von Neumann regular $f$ -rings . . . . .	201
18 Totally ordered domains . . . . .	209
19 Reduced $f$ -rings . . . . .	217
20 Rings of continuous piecewise polynomial functions . . . . .	229
21 Rings of continuous piecewise rational functions . . . . .	233
22 Discontinuous semi-algebraic functions . . . . .	241
23 The lattice of $H$ -closed monoreflectors . . . . .	253
Bibliography . . . . .	259
List of categories . . . . .	266
Index . . . . .	275

Semi-algebraic Function Rings and Reflectors of  
Partially Ordered Rings

Schwartz, N.; Madden, J.J.

1999, XIII, 279 p., Softcover

ISBN: 978-3-540-66460-4
