

Table of Contents

Computing over reals

On-Line Addition in Real Base	1
<i>Christiane Frougny</i>	
Query languages for real number databases based on descriptive complexity over \mathbb{R}	12
<i>Klaus Meer</i>	
The Arithmetical Hierarchy of Real Numbers	23
<i>Xizhong Zheng, Klaus Weihrauch</i>	

Compression techniques

Invited lecture: The Burrows-Wheeler Transform: Theory and Practice .	34
<i>Giovanni Manzini</i>	
Efficiency of Fast Parallel Pattern Searching in Highly Compressed Texts .	48
<i>Leszek Gąsieniec, Alan Gibbons, Wojciech Rytter</i>	

Foundations of programming

Computing and Comparing Semantics of Programs in Four-valued Logics .	59
<i>Yann Loyer, Nicolas Spyratos, Daniel Stamate</i>	
Foundations of Modular SOS	70
<i>Peter D. Mosses</i>	
Message Sequence Graphs and Decision Problems on Mazurkiewicz Traces	81
<i>Anca Muscholl, Doron Peled</i>	

Complexity and algorithms

On the Complexity of Recognizing the Hilbert Basis of a Linear Diophantine System	92
<i>Arnaud Durand, Miki Hermann, Laurent Juban</i>	
The complexity of the extended GCD problem	103
<i>George Havas, Jean-Pierre Seifert</i>	
Complexity Results for Confluence Problems	114
<i>Markus Lohrey</i>	

Model checking

Is your Model Checker on Time?	125
<i>Luca Aceto, François Laroussinie</i>	
Clausal Resolution for CTL*	137
<i>Alexander Bolotov, Clare Dixon, Michael Fisher</i>	
Model Checking and Higher-Order Recursion	149
<i>Hardi Hungar</i>	

Distributed computing

Multipart Communication Complexity: Very Hard Functions	160
<i>Ján Maňuch</i>	
Invited lecture: New Perspectives in Distributed Computing	170
<i>Maurice Herlihy, Sergio Rajsbaum</i>	

Functional programming

An Improved Disjunctive Strictness Analysis for Lazy Functional Languages	187
<i>Grzegorz Grudziński</i>	
Unique Fixed Point Induction for McCarthy's Amb	198
<i>Søren B. Lassen, Andrew Moran</i>	

Automata

On Some Topological Properties of Linear Cellular Automata	209
<i>Luciano Margara</i>	
Real-time language recognition by one-way and two-way cellular automata	220
<i>Katsuhiko Nakamura</i>	
Average state complexity of operations on unary automata	231
<i>Cyril Nicaud</i>	
Fooling Rebound Automata	241
<i>Holger Petersen</i>	

Algorithms and complexity

The Complexity of Minimizing FBDDs	251
<i>Detlef Sieling</i>	
Efficient Strongly Universal and Optimally Universal Hashing	262
<i>Philipp Woelfel</i>	

Lower and Upper Bounds for the Problem of Page Replication in Ring Networks	273
<i>Włodzimierz Głazek</i>	

Security

Invited lecture: Language-Based Security	284
<i>Dexter Kozen</i>	

Logic

An Algebraic Approach to Knowledge Representation	299
<i>Jānis Cīrulis</i>	
On the structure of the monadic logic of the binary tree	310
<i>D. Janin, G. Lenzi</i>	
A New Space Bound for the Modal Logics K4, KD4 and S4	321
<i>Linh Anh Nguyen</i>	

Counting problems

On Approximating the Number of Bases of Exchange Preserving Matroids	332
<i>Anna Gambin</i>	

Processes and bisimulation

The Semantic Foundations of a Compositional Proof Method for Synchronously Communicating Processes	343
<i>F.S. de Boer, W.-P. de Roever, U. Hannemann</i>	
On Plain and Hereditary History-Preserving Bisimulation	354
<i>Sibylle B. Fröschle, Thomas T. Hildebrandt</i>	
Approximating Weak Bisimulation on Basic Process Algebras	366
<i>Jitka Strábrná</i>	

Graph algorithms

Edge Coloring of Bipartite Graphs with Constraints	376
<i>Ioannis Caragiannis, Christos Kaklamanis, Pino Persiano</i>	
An Efficient Exact Algorithm for Constraint Bipartite Vertex Cover	387
<i>Henning Fernau, Rolf Niedermeier</i>	
On Minimum Edge Ranking Spanning Trees	398
<i>Kazuhisa Makino, Yushi Uno, Toshihide Ibaraki</i>	

Complexity

Football Elimination is Hard to Decide Under the 3–Point–Rule 410
 Thorsten Bernholt, Alexander Gülich, Thomas Hofmeister, Niels Schmitt

Generalized Regular Counting Classes 419
 Ulrich Hertrampf

A Foundation of Programming a Multi-Tape Quantum Turing Machine . . . 430
 Tomoyuki Yamakami

Types: theory and applications

Invited lecture: A Type Discipline for Solving Year 2000 Problems in
COBOL programs 442
 Mads Tofte

Type Reconstruction for Functional Programs with Subtyping over a Lat-
tice of Atomic Types 443
 Jerzy Tiuryn

Author Index 455

Mathematical Foundations of Computer Science 1999
24th International Symposium, MFCS'99 Szklarska
Poreba, Poland, September 6-10, 1999 Proceedings
Kutylowski, M.; Pacholski, L.; Wierzbicki, T. (Eds.)
1999, XII, 464 p., Softcover
ISBN: 978-3-540-66408-6
