

Contents

Chapter I. Domains of Positivity	1
§1. Some notions and notations	1
§2. The notion of a domain of positivity	5
§3. The automorphisms of a domain of positivity	9
§4. Norms of a domain of positivity	12
§5. Examples	14
§6. Differential operators	17
§7. An invariant line element	21
§8. The map $y \mapsto y^\sharp$	23
§9. Homogeneous domains of positivity	29
Notes	32
Editors' Notes	32
Chapter II. Omega Domains	35
§1. The notion of an ω -domain	35
§2. Some examples	38
§3. The geodesies of an ω -domain	40
§4. Non-associative algebras	45
§5. ω -domains and Jordan algebras	48
Notes	50
Editors' Notes	51

Chapter III. Jordan Algebras	53
§1. Jordan algebras	53
§2. The radical of a Jordan algebra.	58
§3. The unit element of a Jordan algebra	61
§4. The decomposition theorem	64
§5. The inverse	66
§6. Constructions of Jordan algebras	68
Notes	71
Editors' Notes	71
 Chapter IV. Real and Complex Jordan Algebras	 73
§1. The quadratic representation	73
§2. Mutations	76
§3. A generalization of the fundamental formula	78
§4. The exponential	82
§5. The associated Lie algebra	85
§6. Direct sums	89
Notes	90
Editors' Notes	91
 Chapter V. Complex Jordan Algebras	 93
§1. Minimal polynomial and eigenvalues	93
§2. Minimal relations	95
§3. The minimal decomposition	97
§4. Applications of the minimal decomposition	99
§5. The eigenvalues of $L(u)$ and $P(u)$	102
§6. The embedding of real Jordan algebras	105
Notes	107
Editors' Notes	108

Chapter VI. Jordan Algebras and Omega Domains	109
§1. The ω -domain of a Jordan algebra	109
§2. The Jordan algebra of an ω -domain	113
§3. Jordan algebras with equivalent ω -domains	115
§4. Formally real Jordan algebras	117
§5. Homogeneous domains of positivity	119
§6. Elementary functions on formally real Jordan algebras	122
§7. Direct sums	124
Notes	125
Editors' notes	126
 Chapter VII. Half-Spaces	127
§1. The half-space of a semisimple Jordan algebra	127
§2. The isotropy group \tilde{H}_0	131
§3. Application to the set H	135
§4. Biholomorphic automorphisms of half-spaces	140
§5. Formally real Jordan algebras	142
§6. The bounded symmetric domain \tilde{Z}	145
§7. Remarks on classification	147
§8. One typical example	148
Notes	153
Editors' Notes	153
 Appendix: The Bergman kernel function	157
§1. Reproducing kernels	157
§2. Domains in complex number space	159
Notes	161
Editors' Notes	161
 Bibliography	163
 Index	171
 Biography	175

The Minnesota Notes on Jordan Algebras and Their
Applications

Koecher, M. - Krieg, A.; Walcher, S. (Eds.)

1999, XII, 184 p., Softcover

ISBN: 978-3-540-66360-7
