

Table of Contents

I Invited Papers

Probabilistic Relational Models <i>D. Koller</i>	3
Inductive Databases (Abstract) <i>H. Mannila</i>	14
Some Elements of Machine Learning (Extended Abstract) <i>J.R. Quinlan</i>	15

II Contributed Papers

Refinement Operators Can Be (Weakly) Perfect <i>L. Badea, M. Stanciu</i>	21
Combining Divide-and-Conquer and Separate-and-Conquer for Efficient and Effective Rule Induction <i>H. Boström, L. Asker</i>	33
Refining Complete Hypotheses in ILP <i>I. Bratko</i>	44
Acquiring Graphic Design Knowledge with Nonmonotonic Inductive Learning <i>K. Chiba, H. Ohwada, F. Mizoguchi</i>	56
Morphosyntactic Tagging of Slovene Using Progol <i>J. Cussens, S. Džeroski, T. Erjavec</i>	68
Experiments in Predicting Biodegradability <i>S. Džeroski, H. Blockeel, B. Kompare, S. Kramer, B. Pfahringer, W. Van Laer</i>	80
1BC: A First-Order Bayesian Classifier <i>P. Flach, N. Lachiche</i>	92
Sorted Downward Refinement: Building Background Knowledge into a Refinement Operator for Inductive Logic Programming <i>A.M. Frisch</i>	104
A Strong Complete Schema for Inductive Functional Logic Programming <i>J. Hernández-Orallo, M.J. Ramírez-Quintana</i>	116
Application of Different Learning Methods to Hungarian Part-of-Speech Tagging <i>T. Horváth, Z. Alexin, T. Gyimóthy, S. Wrobel</i>	128

Combining LAPIS and WordNet for the Learning of LR Parsers with Optimal Semantic Constraints <i>D. Kazakov</i>	140
Learning Word Segmentation Rules for Tag Prediction <i>D. Kazakov, S. Manandhar, T. Erjavec</i>	152
Approximate ILP Rules by Backpropagation Neural Network: A Result on Thai Character Recognition <i>B. Kijssirikul, S. Sinthupinyo</i>	162
Rule Evaluation Measures: A Unifying View <i>N. Lavrač, P. Flach, B. Zupan</i>	174
Improving Part-of-Speech Disambiguation Rules by Adding Linguistic Knowledge <i>N. Lindberg, M. Eineborg</i>	186
On Sufficient Conditions for Learnability of Logic Programs from Positive Data <i>E. Martin, A. Sharma</i>	198
A Bounded Search Space of Clausal Theories <i>H. Midelfart</i>	210
Discovering New Knowledge from Graph Data Using Inductive Logic Programming <i>T. Miyahara, T. Shoudai, T. Uchida, T. Kuboyama, K. Takahashi, H. Ueda</i>	222
Analogical Prediction <i>S. Muggleton, M. Bain</i>	234
Generalizing Refinement Operators to Learn Prenex Conjunctive Normal Forms <i>S.-H. Nienhuys-Cheng, W. Van Laer, J. Ramon, L. De Raedt</i>	245
Theory Recovery <i>R. Parson, K. Khan, S. Muggleton</i>	257
Instance Based Function Learning <i>J. Ramon, L. De Raedt</i>	268
Some Properties of Inverse Resolution in Normal Logic Programs <i>C. Sakama</i>	279
An Assessment of ILP-Assisted Models for Toxicology and the PTE-3 Experiment <i>A. Srinivasan, R.D. King, D.W. Bristol</i>	291

Inductive Logic Programming

9th International Workshop, ILP-99, Bled, Slovenia, June

24-27, 1999, Proceedings

Dzeroski, S.; Flach, P.A. (Eds.)

1999, VIII, 312 p., Softcover

ISBN: 978-3-540-66109-2
