

Table of Contents

Invited Talks

Formalisations of Uncertain Reasoning

F. S. C. da Silva, Cidade Universitária, Brazil	1
---	---

Agent-Oriented Software Engineering

N. R. Jennings, University of London, United Kingdom.....	4
---	---

A Unified-Metaheuristic Framework

I. H. Osman, University of Kent, United Kingdom, and Faculty of Administrative Sciences, Kuwait.....	11
--	----

Fuzzy Systems

A Fuzzy Knowledge Representation and Acquisition Scheme for Diagnostic Systems

S.-L. Wang, Y.-H. Wu, I-Shou University, Taiwan.....	13
--	----

Modeling Fuzzy Sets Using Object-Oriented Techniques

G. Y. C. Wong, H. W. Chun, City University of Hong Kong, Hong Kong	23
--	----

A Fuzzy Approach to Map Building

H. Zreak, M. Alwan, M. Khaddour, Higher Institute of Applied Sciences and Technology, Syria.....	33
--	----

Towards an Affirmative Interpretation of Linguistically Denied Fuzzy Properties in Knowledge-Based Systems

D. Pacholczyk, University of Angers, France.....	43
--	----

Representational Hierarchy of Fuzzy Logic Concepts in the OBOA Model

R. Sendelj, Yugoslav Navy; V. Devedzic, University of Belgrade, Yugoslavia.....	54
---	----

Design of Fuzzy Sliding Controller Based on Cerebellar Learning Model

H.-K. Fan, Kuang-Ku Institute of Technology and Commerce; C. Chen, National Taiwan University of Science and Technology; C.-M. Hong, National Taiwan Normal University, Taiwan	64
--	----

A New Fuzzy Flexible Flow-Shop Algorithm for Continuous Fuzzy Domain

T.-P. Hong, T.-T. Wang, I-Shou University, Taiwan	74
---	----

Neural Networks

Testing the Performance of a Neural Networks-Based Adaptive Call Admission Controller with Multimedia Traffic

Y. Dakroury, A. A. El Al, O. Badr, Ain Shams University, Egypt.....	80
---	----

A Combined Neural Network and Mathematical Morphology Method for Computerized Detection of Microcalcifications

D. Manrique, J. Ríos, Universidad Politécnica de Madrid; A. Vilarrosa, University Hospital 12 de Octubre, Spain 92

Study of Weight Importance in Neural Networks Working With Colinear Variables in Regression Problems

A. Martínez, Ciudad Universitaria; J. Castellanos, C. Hernández, Facultad de Informática; F. de Mingo, EUIT de Informática, Spain 101

The Parallel Path Artificial Micronet.

G. Murray, T. Hendtlass, J. Podlena, Swinburne University of Technology, Australia 111

Genetic Algorithms

A Generation Method to Produce GA with GP Capabilities for Signal Modeling

A. Ezzat, N. Inuzuka, H. Itoh, Nagoya Institute of Technology, Japan 118

Preventing Premature Convergence to Local Optima in Genetic Algorithms via Random Offspring Generation

M. Rocha, J. Neves, Universidade do Minho, Portugal 127

Using Self Organizing Maps and Genetic Algorithms for Model Selection in Multilevel Optimization

M. El-Beltagy, A. Keane, University of Southampton, United Kingdom 137

A Genetic Algorithm for Visualizing Networks of Association Rules

F. Guillet, P. Kuntz, IRIN/IRESTE; R. Lehn, IRIN/IRESTE, PerformanSE S.A., France 145

Genetic Algorithms in Solving Graph Partitioning Problem

S. Shazely, H. Baraka, Cairo University; A. Abdel-Wahab, Electronics Research Institute, H. Kamal, Cairo University, Egypt 155

Application of Genetic Algorithms in Power System Stabilizer Design

A. I. Baaleh, A. F. Sakr, Cairo University, Egypt 165

A Study of a Genetic Classifier System Based on the Pittsburgh Approach on a Medical Domain

E. B. Mansilla, Ramon Llull University, Spain; A. Mekaouche, University of Nantes, France; J. M. G. Guiu, Ramon Llull University, Spain 175

Search

A New Gradient-Based Search Method: Grey-Gradient Search Method

C.-M. Chen, National Taiwan University of Science and Technology; C.-M. Hong, National Taiwan Normal University; H. Fan, Kuang-Ku Institute of Technology and Commerce, Taiwan 185

An Improvised A* Algorithm for Mobile Robots to Find the Optimal Path in an Unknown Environment with Minimized Search Efforts

D. A. L. Piriyakumar, P. Levi, University of Stuttgart, Germany 195

Speeding the Vector Search Algorithm for Regional Color Channel Features Based Indexing and Retrieval Systems

A. R. Appas, Electronic Research Institute, A. M. Darwish, Cairo University, A. El-Dessouki, Electronic Research Institute, S. I. Shaheen, Cairo University, Egypt 205

Reasoning

Cost-Based Abduction Using Binary Decision Diagrams

S. Kato, Toyota National College of Technology; S. Oono, H. Seki, H. Itoh, Nagoya Institute of Technology, Japan 215

New Directions in Debugging Hardware Designs

F. Wotawa, Institut für Informationssysteme Wien, Austria 226

Reasoning with Diagrams: The Semantics of Arrows

G. Ligozat, Université Paris-Sud, France 236

MAD: A Real World Application of Qualitative Model-Based Decision Tree Generation for Diagnosis

H. Milde, L. Hotz, J. Kahl, B. Neumann, S. Wessel, University of Hamburg, Germany 246

Expert Systems and Applications

WebMaster: Knowledge-Based Verification of Web-Pages

F. van Harmelen, Vrije Universiteit Amsterdam; J. van der Meer, Administrator, The Netherlands 256

Towards Task-Oriented User Support for Failure Mode and Effects Analysis

G. Peter, University of Ulm (FAW); D. Rösner, Otto-von-Guericke-University, Germany 266

Incremental and Integrated Evaluation of Rule-Based Systems

P. G. Chander, Bell Laboratories, USA; R. Shinghal, T. Radhakrishnan, Concordia University, Canada 276

A Model of Reflection for Developing AI Applications

M. H. Ibrahim, F. A. Cummins, EDS/Leading Technologies and Methods, USA286

A Compositional Process Control Model and Its Application to Biochemical Processes

C. M. Jonker, J. Treur, Vrije Universiteit Amsterdam, The Netherlands296

Visual and Textual Knowledge Representation in DESIRE

C. M. Jonker, Vrije Universiteit Amsterdam, The Netherlands; R. Kremer, University of Calgary, Canada; P. van Leeuwen, Vrije Universiteit Amsterdam, The Netherlands; D. Pan, University of Calgary, Canada; J. Treur, Vrije Universiteit Amsterdam, The Netherlands.....306

Verification of Knowledge Based-Systems for Power System Control Centers

J. Santos, L. Faria, C. Ramos, Z. A. Vale, Polytechnic Institute of Porto; A. Marques, REN - Portuguese Transmission Network, Portugal.....316

Self-Crossover and Its Application to the Traveling Salesman Problem

M. K. Kundu, N. R. Pal, Indian Statistical Institute, India326

Enabling Client-Server Explanation Facilities in a Real Time Expert System

N. Malheiro, Z. A. Vale, C. Ramos, J. Santos, Polytechnic Institute of Porto; A. Marques, REN - Portuguese Transmission Network, Portugal.....333

Using Extended Logic Programming for Alarm-Correlation in Cellular Phone Networks

P. Fröhlich, W. Nejdl, Universität Hannover, Germany; M. Schroeder, Universität Hannover and City University, United Kingdom; C. Damásio, L. M. Pereira, Universidade Nova de Lisboa, Portugal.....343

Knowledge Acquisition Based on Semantic Balance of Internal and External Knowledge

V. Y. Terziyan, S. Puuronen, University of Jyväskylä, Finland353

Alex: A Computer Aid for Treating Alexithymia

R. N. Smith, Northeastern University; W. J. Frawley, University of Delaware, USA.....362

Case-Base Reasoning

Mechanizing Proofs of Integrity Constraints in the Situation Calculus

E. Kounalis, P. Urso, Université de Nice, Sophia-Antipolis, France.....372

Using Cases for Process Modelling: An Example from the Water Supply Industry

G. Saward, University of Hertfordshire, United Kingdom382

Financial Analysis by Case Based Reasoning

E. Aïmeur, K. Boudina, University of Montreal, Canada.....388

Training of the Learner in Criminal Law by Case-Based Reasoning

S. Bélanger, M. A. Thibodeau, E. Aïmeur, University of Montreal, Canada398

Intelligent Agents**Constraint-Based Agent Specification for a Multi-Agent Stock Brokering System**

B. H. Ooi, A. K. Ghose, University of Wollongong, Australia409

A Communication Language and the Design of a Diagnosis Agent - Towards a Framework for Mobile Diagnosis Agents

C. Piccardi, F. Wotawa, Institut für Informationssysteme Wien, Austria420

Information Brokering Agents in Intelligent Websites

C. M. Jonker, J. Treur, Vrije Universiteit Amsterdam, The Netherlands430

Learner-Model Approach to Multi-agent Intelligent Distance Learning System for Program Testing

T. Gavrilova, A. Voinov, I. Lescheva, Institute for High Performance Computing and Databases, Russia440

A Multi-agent Solution for Advanced Call Centers

B. Bauer, Siemens Corporate Technology; C. Klein, Siemens I, C Networks, Germany450

A Multi-agent System for Emergency Management in Floods

J. Cuenca, M. Molina, Technical University of Madrid, Spain.....460

Problem-Solving Frameworks for Sensible Agents in an Electronic Market

K. S. Barber, A. Goel, D. Han, J. Kim, T. H. Liu, C. E. Martin, R. McKay, University of Texas at Austin, USA470

A Model for Distributed Multi-agent Traffic Control

C. Bel, W. van Stokkum, Kenniscentrum CIBIT, The Netherlands480

Smart Equipment Creating New Electronic Business Opportunities

R. Gustavsson, University of Karlskrona/Ronneby, Sweden.....490

Distributed AI**Agent Oriented Conceptual Modeling of Parallel Workflow Systems**

S. Aknine, S. Pinson, Université Paris Dauphine, France.....500

A Distributed Algorithm as Mobile Agents

D. Deugo, Carleton University, Canada510

Why Ontologies are Not Enough for Knowledge Sharing

F. S. C. da Silva, University de São Paulo; W. Weber Vasconcelos, University Estadual do Ceará; Brazil; J. Agustí, Institute d'Investigacióen Intelligencia Artificial; Spain; D. Robertson, Edinburgh University, United Kingdom, A. C. V. de Melo, Universidade de São Paulo, Brazil.520

Pattern Recognition and Vision

A Novel Approach for Detecting and Correcting Segmentation and Recognition Errors in Arabic OCR Systems

K. Mostafa, S. I. Shaheen, A. M. Darwish, I. Farag, Cairo University, Egypt530

Face Recognition Using Principal Component Analysis Applied to an Egyptian Face Database

M. E. Ragab, Electronics Research Institute; A. M. Darwish, Cairo University; E. M. Abed, Electronics Research Institute; S. I. Shaheen, Cairo University, Egypt540

Using Labeled and Unlabeled Data to Train a Multilayer Perceptron for Color Classification in Graphic Arts

A. Verikas, Halmstad University, Sweden, and Kaunas University of Technology, Lithuania; A. Gelzinis, Kaunas University of Technology, Lithuania; K. Malmqvist, Halmstad University, Sweden.....550

A Novel 3D-2D Computer Vision Algorithm for Automatic Inspection of Filter Components

M.A. Rodrigues, Y. Liu, The University of Hull, United Kingdom560

A Robust and Unified Algorithm for Indoor and Outdoor Scenes Based on Region Segmentation

E. Zangrouba, T. Hedidar, A. Jaoua, Universitaire Ras Tabia, Tunisia.....570

SAPIA: A Model Based Satellite Image Interpretation System

F. Ramparany, F. Sandt, Cap Gemini Sogeti Group, France580

Hierarchical Multifeature Integration for Automatic Object Recognition in Forward Looking Infrared Images

S. Shah, Wayne State University; J.K. Aggarwal, The University of Texas at Austin, USA590

Machine Learning

Air-Crew Scheduling through Abduction

A. C. Kakas, A. Michael, University of Cyprus, Cyprus600

Unfold/Fold Inductive Proof: An Extension of a Folding Technique

R. Salem, K. Bsaïes, Campus Universitaire, Tunisia.....612

On Solving the Capacity Assignment Problem Using Continuous Learning Automata

B. J. Oommen, T. D. Roberts, Carleton University, Canada622

Supervised Parameter Optimization of a Modular Machine Learning System

M. Link, M. Ishitobi, Mitsubishi Materials Corporation, Japan632

Non-supervised Rectangular Classification of Binary Data

H. M. Sellami, Institut Supérieur de Gestion, Tunisia; A. Jaoua, King Fahd University of Petroleum and Minerals, Saudi Arabia642

Synthesizing Intelligent Behavior: A Learning Paradigm

M. S. Hamdi, K. Kaiser, Universität Hamburg, Germany649

Automatic Input-output Configuration and Generation of ANN-based Process Models and Their Application in Machining

Z. J. Viharos, L. Monostori, Hungarian Academy of Sciences, Hungary659

DCL: A Disjunctive Learning Algorithm for Rule Extraction

S. M. Abu-Soud, Princess Sumaya University, Jordan, M. R. Tolun, Middle East Technical University, Turkey669

Temporal Reasoning

Modeling and Simulating Breakdown Situation in Telecommunication Networks

A. Osmani, LIPN, Institut Galilée, France679

Handling Context-Sensitive Temporal Knowledge from Multiple Differently Ranked Sources

S. Puuronen, H. Kaikova, University of Jyväskylä, Finland688

Introduction to Reasoning About Cyclic Intervals

A. Osmani, LIPN, Institut Galilée, France698

A Multiple-Platform Decentralized Route Finding System

H. W. Guesgen, University of Auckland, New Zealand; D. Mitra, Jackson State University, USA707

Heuristic Selection of Aggregated-Temporal Data for Knowledge Discovery

H. Hamilton, D. J. Randall, University of Regina, Canada714

Knowledge Representation

Architectoral Knowledge Representation Using the Galois Lattice Technique

D. Chitchian, S. Sariyildiz, H. Koppelaar, Delft University of Technology, The Netherlands.....724

Automated Solving of the DEDS Control Problems

F. Čapkovič, Slovak Academy of Sciences, Slovak Republic735

A More Efficient Knowledge Representation for Allen's Algebra and Point Algebra

J. Kahl, L. Hotz, H. Milde, S. Wessel, University of Hamburg, Germany747

Unified Chromosome Representation for Large Scale Problems

H. H. Baraka, S. Eid, H. Kamal, Cairo University, A. H. AbdelWahab, Electronics Research Institute, Egypt753

A Novel Framework for Hybrid Intelligent Systems

H. A. Hefny, Arab Organization for Industrialization, A. Abdel Wahab, Electronics Research Institut, A. A. Bahnasawi, S. I. Shaheen, Cairo University, Egypt761

Planning and Scheduling

The Design of a Multi-tiered Bus Timetabling System

H. W. Chun, City University of Hong Kong, S. H. C. Chan, Advanced Object Technologies Limited, Hong Kong771

Scheduling of a Production Unit via Critical Block Neighborhood Structures

P. van Bael, M. Rijckaert, Katholieke Universiteit Leuven, Belgium780

An Algorithm for Station Shunting Scheduling Problems Combining Probabilistic Local Search and PERT

N. Tomii, L. J. Zhou, N. Fukumura, Railway Technical Research Institute, Japan...788

Tutoring and Manufacturing Systems

Designing an Intelligent Tutoring Systems in the Domain of Formal Languages

D. Popovic, Mihailo Pupin Institute; V. Devedzic, University of Belgrade, Yugoslavia798

Leveraging a Task-Specific Approach for Intelligent Tutoring System Generation: Comparing the Generic Tasks and KADS Frameworks

E. El-Sheikh, J. Sticklen, Michigan State University, USA.....809

An Object-Oriented Robot Model and Its Integration into Flexible Manufacturing Systems

C. Schaefer, O. Lopez, Universidad Politécnica de Madrid, Spain820

The Economic Benefits of Internet-Based Business Operations in Manufacturing

E. Gide, F. Soliman, University of Technology, Sydney, Australia830

CNC Manufacturing of Complex Surfaces Based on Solid Modeling

A. Elkeran, Mansoura University; M. A. El-baz, Zagazig University, Egypt841

Analysis of Manufacturing Lines Using a Phase Space Algorithm: Open Line Case

T. El-Fouly, N. Zerhoini, M. Ferney, A. El Moundi, Laboratoire d'Automatique Mecatronique Productique et Systémique (L.A.M.P.S), France849

Intelligent Software Engineering

A Formal Approach to Lingware Development

B. Gargouri, M. Jmaiel, A. Ben Hamadou, Laboratoire LARIS, Tunisia859

A Formal Knowledge Level Process Model of Requirements Engineering

D. E. Herlea, C. M. Jonker, J. Treur, Vrije Universiteit Amsterdam, The Netherlands; N. J. E. Wijngaards, University of Calgary, Canada869

Pieces of Mind: Component-Based Software Development of Artificial Intelligence

J. Cakic, Belgrade; V. Devedzic, University of Belgrade, Yugoslavia879

CNC Automatic Programming System for Wire-EDM

T. T. El-Midany, A. Elkeran, H. T. Radwan, Mansoura University, Egypt889

Index897

Multiple Approaches to Intelligent Systems

12th International Conference on Industrial and
Engineering Applications of Artificial Intelligence and
Expert Systems IEA/AIE-99, Cairo, Egypt, May 31 - June
3, 1999, Proceedings

Imam, I.F.; Kodratoff, Y.; El-Dessouki, A.; Ali, M. (Eds.)

1999, XXXVIII, 904 p., Softcover

ISBN: 978-3-540-66076-7
