

Table of Contents

Invited Lectures

Theoretical Views of Boosting	1
<i>Robert E. Schapire</i>	

Open Theoretical Questions in Reinforcement Learning	11
<i>Richard S. Sutton</i>	

Learning from Random Examples

A Geometric Approach to Leveraging Weak Learners	18
<i>Nigel Duffy, David Helmbold</i>	

Query by Committee, Linear Separation and Random Walks	34
<i>Ran Bachrach, Shai Fine, Eli Shamir</i>	

Hardness Results for Neural Network Approximation Problems	50
<i>Peter Bartlett, Shai Ben-David</i>	

Learning from Queries and Counterexamples

Learnability of Quantified Formulas	63
<i>Víctor Dalmau, Peter Jeavons</i>	

Learning Multiplicity Automata from Smallest Counterexamples	79
<i>Jürgen Forster</i>	

Exact Learning when Irrelevant Variables Abound	91
<i>David Guijarro, Víctor Lavín, Vijay Raghavan</i>	

An Application of Codes to Attribute-Efficient Learning	101
<i>Thomas Hofmeister</i>	

Learning Range Restricted Horn Expressions	111
<i>Roni Khardon</i>	

Reinforcement Learning

On the Asymptotic Behavior of a Constant Stepsize Temporal-Difference Learning Algorithm	126
<i>Vladislav Tadić</i>	

On-line Learning and Expert Advice

Direct and Indirect Algorithms for On-line Learning of Disjunctions 138
D. P. Helmbold, S. Panizza, M. K. Warmuth

Averaging Expert Predictions 153
Jyrki Kivinen, Manfred K. Warmuth

Teaching and Learning

On Teaching and Learning Intersection-Closed Concept Classes 168
Christian Kuhlmann

Inductive Inference

Avoiding Coding Tricks by Hyperrobust Learning 183
Matthias Ott, Frank Stephan

Mind Change Complexity of Learning Logic Programs 198
Sanjay Jain, Arun Sharma

Statistical Theory of Learning and Pattern Recognition

Regularized Principal Manifolds 214
Alex J. Smola, Robert C. Williamson, Sebastian Mika, Bernhard Schölkopf

Distribution-Dependent Vapnik-Chervonenkis Bounds 230
Nicolas Vayatis, Robert Azencott

Lower Bounds on the Rate of Convergence of Nonparametric Pattern
 Recognition 241
András Antos

On Error Estimation for the Partitioning Classification Rule 253
Márta Horváth

Margin Distribution Bounds on Generalization 263
John Shawe-Taylor, Nello Cristianini

Generalization Performance of Classifiers in Terms of Observed Covering
 Numbers 274
John Shawe-Taylor, Robert C. Williamson

Entropy Numbers, Operators and Support Vector Kernels 285
Robert C. Williamson, Alex J. Smola, Bernhard Schölkopf

Computational Learning Theory

4th European Conference, EuroCOLT'99 Nordkirchen,

Germany, March 29-31, 1999 Proceedings

Fischer, P.; Simon, H.U. (Eds.)

1999, X, 299 p., Softcover

ISBN: 978-3-540-65701-9
