

Contents

1. Temperature and Frequency Dependent Surface Impedance	1
1.1 Physical Framework	1
1.1.1 Field Equations and Characteristic Lengths	1
1.1.2 Surface Resistance and Surface Reactance	5
1.1.3 Effect of Finite Film Thickness and Metallic Cap Layers	8
1.2 Extended Two-Fluid Model	10
1.2.1 Equivalent Circuits and Interpretation for a Homogeneous Superconductor	11
1.2.2 Interpretation for a Granular Superconductor	12
1.2.3 Scaling Laws	16
1.3 Microscopic Picture	19
1.3.1 BCS Theory: Cooper Pairs, Energy Gap and Density of States	20
1.3.2 BCS Theory: Complex Conductivity and Surface Impedance	23
1.3.3 Non-BCS Densities of States and Consequences for the Surface Impedance	27
1.3.4 Tunneling Spectroscopy of the Density of States in $\text{Y}(\text{Yb})\text{Ba}_2\text{Cu}_3\text{O}_{7-x}$	41
2. Measurements of the Surface Impedance at Linear Response	43
2.1 Measurement Methods	43
2.1.1 Characteristic Parameters of Superconducting Resonators	44
2.1.2 Modes of Operation	50
2.1.3 Selected Examples of Integral Measurement Systems	55
2.1.4 Survey of Local Measurement Systems	63
2.2 Surface Impedance of Nb_3Sn Films on Sapphire	68
2.2.1 Properties of Nb_3Sn Thin Films on Dielectric Substrates	69
2.2.2 Superconductive Properties of the Nb_3Sn Films Prepared by Tin Diffusion	71

2.2.3	Effect of Film Thickness and Grain Size on the Surface Impedance	78
2.3	Surface Impedance of Oxide Superconductor Films	82
2.3.1	Granular $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ Films	83
2.3.2	Epitaxial $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ and Tl-Ba-Ca-Cu-O Films ...	85
2.3.3	Effects of Composition	94
2.3.4	Theoretical Description	96
3.	Field and Power-Dependent Surface Impedance	103
3.1	Critical Field Levels and Corresponding Surface Impedance ..	104
3.1.1	Overview	105
3.1.2	Thermodynamic and Upper Critical Fields	110
3.1.3	Adiabatic Superheating	114
3.1.4	Lower Critical Fields.....	117
3.1.5	Implications of Film Thickness, Anisotropy and Unconventional Pairing.....	126
3.2	Microwave Heating	130
3.2.1	Description of the Problem	132
3.2.2	Analytical Approach	136
3.2.3	Numerical Simulations	139
3.3	Dynamic Nonlinear Surface Impedance	146
3.3.1	Dynamic (Nonequilibrium) Microwave Response.....	146
3.3.2	Two-Tone Frequency Intermodulation in the Adiabatic Limit	150
3.3.3	Two-Tone Frequency Intermodulation in Dynamic Systems	155
3.4	Summary: Consequences for Nb_3Sn and $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$	159
3.4.1	Anomalous Field-Effect in Superconductors: Coupled-Grain Models	159
3.4.2	Anomalous Field-Effect in Superconductors: Pair Breaking Effects	163
3.4.3	Typical Field Ranges for Nb_3Sn and YBCO	166
4.	Measurements of the Surface Impedance at Nonlinear Response.....	171
4.1	Microwave Field Dependence of the Surface Impedance.....	171
4.1.1	Phenomenological Picture	172
4.1.2	Critical Field Levels and Power-Law Behavior.....	176
4.1.3	Local Measurements of the Nonlinear Surface Impedance	185
4.1.4	Survey of Data on Nb_3Sn Films	194
4.2	DC Magnetic Field Dependence of the Surface Impedance ...	199
4.2.1	Phenomenological Description of $Z_s(B_{\text{DC}})$	199
4.2.2	Flux Penetration and Surface Impedance in Perpendicular Fields.....	204

4.2.3	Surface Impedance in Parallel Fields	213
4.3	Identification of Magnetic and Thermal Field Limitations in YBCO Films	218
4.3.1	Identification of Magnetically Induced Nonlinearities . .	218
4.3.2	Anomalous Field Effect in $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ Films	225
4.3.3	Identification of Thermally Induced Nonlinearities . . .	231
4.3.4	Summary	236
5.	Technology of High-Temperature Superconducting Films and Devices	239
5.1	Thin-Film Deposition Techniques	239
5.1.1	Nb_3Sn Films on Sapphire Substrates	240
5.1.2	Preparation of $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ Films	247
5.1.3	Preparation of $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ Grain Boundary Junctions	260
5.2	Integration of Films into Devices	264
5.2.1	Choice of Substrate Materials: Structural Compatibility	264
5.2.2	Choice of Substrate Materials: Complex Permittivity . .	267
5.2.3	Microwave Design	271
5.3	Refrigeration	273
5.3.1	General Considerations	273
5.3.2	Liquid Coolants	278
5.3.3	Closed-Cycle Cryocoolers	279
6.	Passive High-Temperature Superconducting Microwave Devices	283
6.1	Basic Features of Filters	283
6.1.1	From Resonators to Filters	284
6.1.2	Different Types of Filter Characteristics	288
6.1.3	Relations Between the Properties of Filters and the Constituting Resonators	296
6.2	Passive Devices Related to Resonant Elements	299
6.2.1	Survey of Passive Microwave Device Applications	300
6.2.2	Remaining Challenges	307
6.3	Passive Devices Based on Josephson Junctions	318
6.3.1	Unique Features of Josephson Junctions and SQUIDs .	318
6.3.2	Survey of Josephson Junction Microwave Devices	325
6.3.3	Single-Junction SQUIDs Coupled to Microwave Devices	332
	Appendix	345
A.1	Fundamental Constants	345
A.2	Frequently used Abbreviations, Symbols and Definitions	346

XIV Contents

A.3 Physical Quantities	347
A.4 HTS Compounds, Substrates and Deposition Techniques	348
References	349
Subject Index	391

High-Temperature-Superconductor Thin Films at
Microwave Frequencies

Hein, M.

1999, XIV, 394 p., Hardcover

ISBN: 978-3-540-65646-3
