

Contents

1	Introduction.....	1
1.1	Motivation	1
1.2	Scope.....	7
1.3	Scientific Objectives.....	9
1.4	Terminological Remarks	12
1.5	Organisation of the Book	13
2	Co-ordination	15
2.1	An Informal Characterisation	15
2.2	Analytic Models	16
2.2.1	Organisational Interdependencies	17
2.2.2	Organisational Co-ordination Mechanisms.....	19
2.2.3	Formal and Informal Organisation.....	20
2.3	Formal Approaches	21
2.3.1	Centralised Co-ordination	22
2.3.1.1	Quantitative Models.....	22
2.3.1.2	Qualitative Models.....	22
2.3.2	Decentralised Co-ordination	23
2.3.2.1	The Notion of Games	23
2.3.2.2	Partially Conflicting Games	24
2.3.2.3	Pitfalls of the Co-ordination Process.....	26
2.4	Bottom Line	29
3	Distributed Artificial Intelligence.....	31
3.1	Overview of Research Fields	31
3.1.1	A Short History	32
3.1.2	Autonomous Agents.....	33
3.1.2.1	Characterisation	34
3.1.2.2	Techniques	35
3.1.3	Distributed Problem Solving.....	38
3.1.3.1	Characterisation	39
3.1.3.2	Techniques	40
3.1.4	Multi-Agent Systems	43
3.1.4.1	Characterisation	43
3.1.4.2	Techniques	44

3.2	Co-ordination Mechanisms	48
3.2.1	Organisation.....	48
3.2.2	Multi-Agent Planning	49
3.2.3	Negotiation.....	50
3.2.4	Examples.....	52
3.2.4.1	Shoham and Tennenholtz: Social Laws	52
3.2.4.2	Goldman and Rosenschein: Co-operative Rules	53
3.2.4.3	Sichman et al.: Dependence Situations	53
3.2.4.4	Rosenschein and Zlotkin: Rules of Encounter	54
3.3	Co-ordination Frameworks.....	55
3.3.1	Von Martial: Co-ordination of Autonomous Agents' Plans.....	56
3.3.2	Decker: TÆMS and GPGP	57
3.3.3	Lander: the TEAM Framework.....	59
3.4	Bottom Line	61
4	Analysis.....	65
4.1	Limitations of Present Co-ordination Models	65
4.2	The Approach of this Book	68
5	Emergent Co-ordination by Structural Co-operation.....	71
5.1	The Metaphor: Functionality of Social Structure	71
5.1.1	Structural Functionalism	71
5.1.2	A Constructive Perspective	74
5.2	The Problem: Reactive Co-ordination.....	75
5.2.1	A Formal Model.....	76
5.2.2	The Synchronous Blocks Domain.....	78
5.2.3	An Example Setting	81
5.3	The Mechanism: Structural Co-operation	83
5.3.1	Overview.....	84
5.3.2	The Individual Context	86
5.3.2.1	On the Conception of Goal	86
5.3.2.2	Basic Notions	86
5.3.2.3	Self-Interested Action	87
5.3.3	The Social Context.....	88
5.3.3.1	Basic Notions	88
5.3.3.2	Relations between Plans.....	88
5.3.3.3	Dependence Relations between Agents	90
5.3.3.4	Social Exchange.....	94
5.3.4	The Normative Context.....	95
5.3.4.1	Deontic Notions	96
5.3.4.2	The Effect of Normative Prescriptions	98
5.3.4.3	Social Structure.....	100
5.4	Related Work.....	101
5.5	Bottom Line	103

6	Structural Co-operation and Bargaining.....	105
6.1	Structural Co-operation as a Bargaining Scenario	105
6.1.1	Modelling Co-operation.....	106
6.1.2	Modelling Conflict.....	110
6.1.3	The Associated Bargaining Scenario	112
6.2	Solutions to the Associated Bargaining Scenario.....	113
6.2.1	The Nash Solution.....	113
6.2.2	Alternative Solutions.....	117
6.2.3	Analysis.....	118
6.3	The Role of the Disagreement Point	119
6.4	Related Work.....	121
6.5	Bottom Line	124
7	An Instrumentation of Structural Co-operation.....	127
7.1	The ProsA ₂ Agent Architecture	127
7.1.1	Overview.....	127
7.1.2	Information Model.....	129
7.1.2.1	Self and Acquaintance Models	130
7.1.2.2	Problem-Solving and Deontic Models	130
7.1.2.3	Individual and Social Models	131
7.1.3	Layer Models	132
7.1.3.1	Individual Layer.....	132
7.1.3.2	Social Layer.....	133
7.1.3.3	Normative Layer.....	133
7.2	Social Interaction Strategy	134
7.2.1	Motivation.....	134
7.2.2	Multi-Stage Co-ordination Process	135
7.2.3	Asynchronous Search for Pareto-Optimality	137
7.2.3.1	Overview.....	138
7.2.3.2	Local Choice	139
7.2.3.3	Knowledge and Information Requirements	140
7.2.3.4	Message Types.....	141
7.2.3.5	Local Behaviour Strategy.....	142
7.2.3.6	Solution Detection	144
7.2.4	Applying the Nash Solution.....	146
7.2.5	Analysis.....	148
7.3	Related Work.....	150
7.4	Bottom Line	151
8	Road Traffic Management.....	153
8.1	Urban Traffic Management.....	153
8.1.1	Traffic Control Infrastructure.....	153
8.1.2	Decision Support for Real-Time Traffic Management	155

8.2	The TRYS Approach.....	156
8.2.1	Motivation.....	157
8.2.2	The Centralised TRYS Architecture	158
8.3	Multi-Agent TRYS.....	159
8.3.1	Motivation.....	160
8.3.2	The Multi-Agent TRYS Architecture	161
9	A Case Study.....	163
9.1	The Scenario.....	163
9.2	Local Problem Solving.....	165
9.2.1	Conceptual Model.....	165
9.2.2	Knowledge Model.....	168
9.2.2.1	Physical Network Structure	168
9.2.2.2	Problem Scenarios	169
9.2.2.3	Traffic Distribution Scenarios.....	169
9.2.2.4	Historic Traffic Demand	170
9.2.3	Reasoning.....	170
9.3	Co-ordination	172
9.3.1	Conceptual Model.....	172
9.3.2	Knowledge Model.....	175
9.3.2.1	Plan Interrelations	175
9.3.2.2	Agent Dependence.....	176
9.3.2.3	Norms.....	177
9.3.3	Reasoning.....	178
9.4	Implementation Issues.....	180
9.4.1	Knowledge Acquisition and Reuse	180
9.4.2	Process Arrangement	181
9.4.3	Object Hierarchy.....	183
9.5	Evaluation	184
9.5.1	Co-ordination Policy	185
9.5.2	Knowledge Requirements	187
9.5.3	Architecture.....	188
10	Conclusions.....	191
10.1	Contributions.....	191
10.2	Limitations	193
10.3	Future Work	194
Appendix	197
A.	Proofs.....	197
B.	Examples of Knowledge Bases	201
References	209
