## Contents

<b>A General Survey and Recent Advances in the Activation of Unreactive Chemical Bonds by Metal Complexes</b>	
R.A. Gossage, G. van Koten . . . . .	1
<b>Activation of C–H Bonds. Stoichiometric Reactions</b>	
W.D. Jones . . . . .	9
<b>Activation of C–H Bonds: Catalytic Reactions</b>	
F. Kakiuchi, S. Murai . . . . .	47
<b>Catalytic Activation of Methane and Ethane by Metal Compounds</b>	
A. Sen . . . . .	81
<b>Cleavage of Carbon–Carbon Single Bonds by Transition Metals</b>	
M. Murakami, Y. Ito . . . . .	97
<b>Activation of Si–Si Bonds by Transition-Metal Complexes</b>	
M. Suginome, Y. Ito . . . . .	131
<b>Activation of C–O Bonds: Stoichiometric and Catalytic Reactions</b>	
Y.-S. Lin, A. Yamamoto . . . . .	161
<b>Activation of Otherwise Unreactive C–Cl Bonds</b>	
V.V. Grushin, H. Alper . . . . .	193
<b>Activation of the N–N Triple Bond in Molecular Nitrogen: Toward its Chemical Transformation into Organo-Nitrogen Compounds</b>	
M. Hidai, Y. Mizobe . . . . .	227
<b>Metal Reagents for Activation and Functionalization of Carbon–Fluorine Bonds</b>	
T.G. Richmond. . . . .	243
<b>Author Index</b> . . . . .	271

Activation of Unreactive Bonds and Organic Synthesis

Murai, S. (Ed.)

1999, IX, 267 p., Hardcover

ISBN: 978-3-540-64862-8
