Introduction	1
---------------------	----------

Part I

Approaches to the Problem of Monetary Non-Neutrality	5
---	----------

Chapter 1: Empirical evidence on the non-neutrality of money from macroeconomic data	9
1.1. Selected evidence on the (non-)neutrality of money	10
1.2. Problems of empirical work in monetary macroeconomics	12
A) Mismeasurement in macroeconomic aggregates	
B) Problems of isolating causalities	
Chapter 2: Theories of nominal rigidity and monetary non-neutrality	15
2.1. Explaining monetary non-neutrality and nominal rigidity by assuming that all agents are fully rational	16
2.2. Explaining monetary non-neutrality by assuming that some agents are not fully rational	20
Chapter 3: Money illusion	22
3.1. The psychology behind money illusion	25
3.2. Potential relevance of money illusion to economics	28
A) Money illusion as a disequilibrating force	
B) Labor markets	
C) Further areas where money illusion may be of economic relevance	
Chapter 4: Why can money illusion and strategic complementarity cause monetary non-neutrality?	36
A) Bounded rationality and monetary non-neutrality	
B) Money illusion and strategic properties	
Chapter 5: Summary of part I and hypotheses	46
5.1. Summary	46
5.2. Hypotheses	48

Part II

Experimental Study 51

Chapter 1: Are experiments in macroeconomics possible? 53

- A) What is experimental economics?
- B) What is an experimental design?
- C) Macroeconomics as an indirectly experimental science

Chapter 2: Experimental design to isolate causes of monetary non-neutrality 60

- 2.1. General description of the experimental design 60
- 2.2. Experimental procedures and parameters 62
- 2.3. Description of treatments 66
 - 2.3.1. Variation of representation 66
 - A) Real representation
 - B) Semi-real representation
 - C) Nominal representation
 - 2.3.2. Variation of the strategic property 72
- 2.4. Advantages of the present experimental design in the investigation of monetary non-neutrality 76

Part III

Results of Experimental Study 79

Chapter 1: Non-neutrality with strategic complementarity 81

- A) Nominal rigidity
- B) Monetary non-neutrality
- C) Best reply behavior
- D) Price expectations
- E) Loss decomposition
- F) Subjective confidence in price expectation
- G) Summary of chapter 1

Chapter 2: Does money illusion matter? 96

- 2.1. Specification of hypotheses to be tested 97
- 2.2. The effect of nominal representation given strategic complementarity 98
 - A) Nominal rigidity
 - B) Monetary non-neutrality
 - C) Best reply behavior
 - D) Price expectations
 - E) Confidence in price expectation
- 2.3. The effect of representation given strategic substitutes 114
 - A) Nominal rigidity
 - B) Monetary non-neutrality
- 2.4. Summary of chapter 2 117

Chapter 3: The effects of strategic complements and strategic substitutes	119
3.1. Specification of hypotheses to be tested	19
A) Specification of hypothesis H_{A2}	
B) Specification of hypothesis H_{A3}	
3.2. The effect of strategic substitutes vs. complements when the environment is represented in nominal terms	123
A) Nominal rigidity	
B) Monetary non-neutrality	
C) Best reply behavior	
D) Price expectations	
E) Confidence in price expectations	
3.3. The effect of strategic properties when the environment is represented in real terms	135
A) Nominal rigidity	
B) Monetary non-neutrality	
C) Best reply behavior and expectations	
Chapter 4: Summary of results	140
 Part IV	
Discussion of Results	145
 Chapter 1: Empirical relevance of results	147
A) Biases in favor of monetary neutrality	
B) Biases against monetary neutrality?	
C) Extensions and suggestions for further research	
 Chapter 2: Implications for economic theory and policy	159
2.1. Money illusion and the rationality paradigm	159
2.2. Implications for macroeconomic theory	163
2.3. Implications for economic policy	165
 Appendices	169
 Appendix A1. Instructions	170
Appendix A2. Income tables	179
Appendix A3. Mathematical appendix	200
