1	Tortured Chains: An Introduction	1
	P.-G. de Gennes	
2	Polymer Solutions in Flow: A Non-Equilibrium Molecular Dynamics Approach	5
	C. Pierleoni, Y.-P. Ryckaert	
2.1	Introduction	5
2.2	Molecular Dynamics of Dilute Solutions of Chains in Homogeneous Flow	8
2.3	The Equilibrium Case	10
2.3.1	Systems Studied	10
2.3.2	The Static Structure Factor	11
2.3.3	Polymer Longest Relaxation Time	11
2.3.4	Dynamical Structure Factor	13
2.4	Polymers in Shear Flow	14
2.4.1	Phenomenological Framework for the Shear Flow Case	15
2.4.1.1	Gyration Tensor	16
2.4.1.2	Birefringence	17
2.4.2	Structure of Polymers in Shear Flow	18
2.4.2.1	Orientational Resistance	18
2.4.2.2	A Scaling Picture at Fixed Reduced Shear Rate	20
2.4.2.3	The Evolution of Scaling Exponents with the Reduced Shear Rate	23
2.4.3	Internal Dynamics of Chains Under Steady Shear Flow	24
2.4.3.1	Dynamics at Fixed β	27
2.4.3.2	β -Dependence of Dynamical Properties	30
2.5	Transient Behavior of a Nine-Bead Chain in Elongational Flow	33
2.6	Conclusions and Perspectives	35
	List of Symbols and Abbreviations	38
	References	39

3	Tethered Polymer Chains Under Strong Flows: Stems and Flowers	41
	F. Brochard-Wyart, A. Buguin	
3.1	Introduction	41
3.2	Chains Immersed in a Pure Solvent	43
3.2.1	Steady State in Uniform Flows	43
3.2.1.1	Good Solvent ($\nu = 3/5$)	43
3.2.1.2	Ideal θ Solvent ($\nu = 1/2$)	45
3.2.2	Tethered Chains in Shear Flow	46
3.2.2.1	Good Solvent	46
3.2.2.2	Ideal Chains	47
3.2.3	Relaxation processes: Stretch to Coil	48
3.2.3.1	Good Solvent ($\nu = 3/5$)	48
3.2.3.2	Ideal θ Solvent ($\nu = 1/2$)	49
3.3	Tethered Chains Immersed in a Polymer Solution	51
3.3.1	Friction on the Test Chain ($V \geq 0$)	51
3.3.2	Deformation Under Flow	53
3.3.2.1	Coil Regime	53
3.3.2.2	Trumpet Regime	53
3.3.2.3	Marginal Regime: Stem and Flower	54
3.3.2.4	Ideal Stokes Regime	55
3.4	Tethered Chains in Poor Solvents	56
3.4.1	Conformation of a Single Chain in a Poor Solvent	56
3.4.2	Force-Elongation Diagram Under Uniform Tension	57
3.4.3	Deformation Under Solvent Flow	59
3.4.3.1	Small Deformation: ($V < V_1$)	59
3.4.3.2	“Stem and Globule”: ($V_1 < V < V_2$)	59
3.4.3.3	Above V_2	61
3.4.3.4	Relaxation	61
3.5	Tethered Chains Confined in a Slit	61
3.5.1	Good Solvent	62
3.5.1.1	Uniform Tension	62
3.5.1.2	Uniform Flow	62
3.5.2	Ideal Chains	63
3.6	Concluding Remarks	64
	References	65
4	Osmotic Pressure in Solutions of Stretched Polymers	67
	Y. Rabin, S. Alexander	
4.1	Introduction	67
4.2	Semi-Dilute Solution of Stretched Polymers	67
4.3	Discussion	70
4.3.1	Instabilities in Steady Homogeneous Flows	71

4.3.2	Inhomogeneous Flows	71
	References	72
5	Stretching of Polyelectrolytes in Elongational Flow	73
	O. V. Borisov, A.A. Darinskii	
5.1	Introduction	73
5.2	Experimental Evidence	74
5.3	Early Theoretical Approaches	78
5.4	Equilibrium Conformation of the Polyelectrolyte Chain	80
5.4.1	Conformation in a Salt-Free Solution	80
5.4.2	Conformation in a Salt-Added Solution	85
5.5	Stretching Transition in the Polyelectrolyte Chain	88
5.5.1	Stretching in a Salt-Free Solution	88
5.5.2	Stretching in a Salt-Added Solution	92
5.6	Conclusions and Discussion	95
	List of Symbols and Abbreviations	97
	References	98
