

Table of Contents

List of Contributors.....	xvii
1 Interdecadal Variability at Northern High Latitudes.....	1
LAWRENCE A. MYSAK	
1.1 Introduction.....	1
1.2 A feedback loop for interdecadal climate variability in the Arctic.....	8
1.3 Evidence for a Great Ice and Salinity Anomaly (GISA) event in the late 1980s.....	9
1.4 Possible sources for the precipitation and runoff anomalies in the Mackenzie basin: An attempt to verify the cyclogenesis-related links in the feedback loop.....	13
1.5 Models of the "Great Salinity Anomaly" (GSA) and other interdecadal variability in the Arctic and northern North Atlantic...	18
1.5.1 Simulations of the GSA.....	18
1.5.2 Models of coupled ice-ocean interdecadal oscillations.....	22
1.5.3 Interdecadal variability in ocean GCMs.....	23
1.5.4 The 50-year oscillation in the North Atlantic THC.....	23
2 Sea Surface Temperature Variability in the North Atlantic: Monthly to Decadal Time Scales	25
CLAUDE FRANKIGNOUL	
2.1 Introduction.....	25
2.2 Short-term variability.....	27
2.3 Decadal variability.....	34
2.3.1 Observations	34
2.3.2 Coupled ocean-atmosphere models	39
2.3.3 Thermocline response to stochastic wind stress forcing.....	44
2.3.4 Ocean-atmosphere feedback	46
2.4 Conclusions.....	47

3	Recent Decadal SST Variability in the Northwestern Pacific and Associated Atmospheric Anomalies	49
	HISASHI NAKAMURA AND TOSHIO YAMAGATA	
3.1	Introduction.....	49
3.2	Data.....	51
3.3	Characteristics of SST Variability over the NW Pacific	54
3.4	Dominant Decadal Variability in Winter	55
3.4.1	Spatial Structure.....	55
3.4.2	Time Evolution	59
3.4.3	Comparison with ENSO-Scale Variability	63
3.5	Dominant Decadal Variability in Summer.....	65
3.6	Discussion.....	70
4	Large Scale Modes of Ocean Surface Temperature Since the Late Nineteenth Century	73
	C. K. FOLLAND, D. E. PARKER, A. W. COLMAN R. WASHINGTON	
4.1	Introduction.....	73
4.2	Data.....	74
4.3	Low Frequency Variability in Marine Surface Temperatures	75
4.3.1	Global and Regional Time Series of SST and NMAT Anomalies.....	75
4.3.2	Power spectra.....	75
4.3.3	Spatial patterns of near bi-decadal ocean surface temperature variability	81
4.3.4	Synthesis of variability: Empirical Orthogonal Function (EOF) analysis	83
4.3.5	Extended EOF analysis of LF SST	90
4.3.6	Stability of the all seasons EOF analyses.	92
4.4	Relationships between marine surface temperatures and tropic-wide rainfall on multi decadal time-scales.....	93
4.5	Low Frequency relationships between marine surface temperatures and southern African rainfall	96
4.6	Discussion and conclusions.....	99
4.7	Appendix: Enhancement Of EOF Time Series For Missing Data	100
5	The Indian Summer Monsoon and its Variability.....	103
	JULIA SLINGO	
5.1	Introduction	103
5.2	Mean behavior of the Indian Summer Monsoon.....	105
5.3	Interannual to decadal variability and its relationship with El Niño	106

5.4	Understanding the factors that influence monsoon interannual variability	109
5.5	Subseasonal behaviour and its relevance to interannual variability	113
5.6	Potential Predictability of the Indian Summer Monsoon	116
6	Climate Variability in Northern Africa: Understanding Droughts in the Sahel and the Mahgreb	119
	M. NEIL WARD PETER J. LAMB, DIANE H. PORTIS MOSTAFA EL HAMLY, RACHID SEBBARI	
6.1	Introduction	119
6.2	Discussion of Data and Methods	121
6.3	The Boreal summer season July-September: The Sahelian rainy season	122
6.4	Transition seasons in tropical North Africa	128
6.5	Sub-tropical Northwestern Africa	132
6.6	Discussion	138
6.7	Appendix - Examples of Filtering Procedures	140
7	SST-Forced Experiments and Climate Variability	141
	ANTONIO NAVARRA	
7.1	Introduction	141
7.2	Ensembles of Simulations	145
7.2.1	The need for ensembles	145
7.2.2	Reproducibility	150
7.2.3	Manifolds	152
7.3	Evaluation of performance: skill and reproducibility	153
7.3.1	Information and ensemble	153
7.4	Skill and Reproducibility for 1961-1994	154
7.5	Longer time scales	159
8	Impact of Ensemble Size on the Assessment of Model Climate Signal	163
	Z.X. LI	
8.1	Introduction	163
8.2	Model and climate signal	163
8.3	Impact of ensemble size	165
8.4	Conclusion	168

9	Interannual and Decadal Variability in the Tropical Pacific	171
	SIMON F. B. TETT, MICHAEL K. DAVEY AND SARAH INESON	
9.1	Introduction.....	171
9.2	Data sources.....	172
9.3	Model Description.....	173
9.4	Climatology and Interannual Variability.....	175
9.4.1	Climatology.....	175
9.4.2	Inter-annual variance.....	178
9.4.3	Timeseries Analysis.....	182
9.4.4	SST and VAT propagation characteristics.....	186
9.4.5	Zonal windstress relationships to SST.....	189
9.5	Decadal variability in ENSO.....	191
9.6	Summary and Conclusions.....	192
10	The Decadal Variability of the Pacific with the MRI Coupled Models	197
	SEIJI YUKIMOTO	
10.1	Introduction.....	197
10.2	Models.....	197
10.3	Spatial structure of the decadal variability.....	198
10.4	Temporal structure of the decadal variability.....	203
10.5	Two distinct decadal modes in the AOGCM.....	204
10.6	Discussion about the inherent mechanism.....	211
11	Dynamics of Interdecadal Variability in Coupled Ocean-Atmosphere Models	213
	MOJIB LATIF	
11.1	Introduction.....	213
11.2	Interdecadal variability originating in the tropics.....	215
11.2.1	The Tropical Pacific.....	215
11.2.2	The Tropical Atlantic.....	217
11.3	Tropics-Midlatitudes Interactions.....	222
11.4	Midlatitude Decadal Variability Involving the Wind-driven Gyres.....	224
11.4.1	The North Pacific Gyre Mode.....	226
11.4.2	The North Atlantic Gyre Mode.....	229
11.4.3	Relative Roles of Stochastic and Deterministic Processes.....	235
11.5	Midlatitude Interdecadal Variability Involving the Thermohaline Circulation.....	236
11.6	Predictability at Decadal Time Scales.....	243
11.7	Discussion.....	249

12	Simulations of the Variability of the Tropical Atlantic	251
	M.J.ORTIZ BEVIA, W. CABOS NARVAEZ J. M. OBERHUBER	
12.1	Introduction	251
12.2	Simulation of the seasonal variability	254
12.3	The simulation E1 of the interannual variability.	256
12.4	Sensitivity experiments: simulations S1, S2 and E2.	258
12.5	The tropical Atlantic variability in a coupled general circulation model	261
12.6	Statistical Comparison of the simulated interannual variability.	261
12.6.1	The simulations E1 and E2.....	263
12.6.2	Simulations S1 and S2.....	265
12.6.3	The coupled ECHAM4/OPYC run.....	266
12.6.4	Comparison of statistical relationships among variables	266
12.7	Discussion.	270
13	North-Atlantic Decadal Climate Variability in a Coupled Atmosphere/Ocean/Sea-Ice Model of Moderate Complexity	275
	R. J. HAARSMA, F. M. SELTEN, J. D. OPSTEEGH, Q. LIU AND A. KATTENBERG	
13.1	Introduction	275
13.2	Description of the model	277
13.2.1	Atmospheric model	277
13.2.2	Ocean model.....	280
13.2.3	Sea-ice model	282
13.2.4	The coupled model	282
13.3	Climate of the atmosphere model.....	282
13.4	Climate of the ocean model.....	285
13.5	Climatology and variability of the coupled model	288
13.6	Decadal variability of the North-Atlantic.....	291
13.7	Conclusions	297
14	A Theory For Interdecadal Climate Fluctuations	301
	D. GU AND S.G.H. PHILANDER	
14.1	Introduction.....	301
14.2	The influence of the extra-tropical winds	302
14.3	A simple model of interdecadal variability.....	305

15	Decadal Variability of the Thermohaline Ocean Circulation	309
	STEFAN RAHMSTORF	
15.1	The thermohaline circulation as component of the climate system	309
15.2	Evidence for decadal variability of the thermohaline circulation	311
15.3	Physics of the thermohaline circulation.....	313
15.4	Basic variability mechanisms	318
15.4.1	Hasselmann's mechanism	318
15.4.2	Internal variability modes of the ocean.....	319
15.4.3	Forced variability	320
15.4.4	Coupled modes	321
15.5	Models with realistic geography.....	322
15.6	Idealized models	328
15.7	Conclusions.....	330
