Contents

Part I Molecular Biology Techniques

Chapter 1
Structure and Function of the Human Genome
FRIEDHELM HILDEBRANDT 3

Chapter 2
Enzymatic Modification of DNA and RNA
KAI-OLAF NETZER 24

Subprotocol 1: Restriction Endonucleases 24
Subprotocol 2: Exonucleases, Other Nucleases and Ligases 33
Subprotocol 3: Phosphatases – CIP Reaction 36
Subprotocol 4: Kinases 37
Subprotocol 5: DNA-Dependent DNA Polymerases – E. Coli DNA Polymerase 1 and Klenow Enzyme 40
Subprotocol 6: T4 and T7 DNA Polymerase 42
Subprotocol 7: RNA-Dependent DNA Polymerases 44
Subprotocol 8: DNA – Dependent RNA Polymerases 47
Subprotocol 9: Terminal Deoxynucleotidyl Transferase (TdT) 49

Chapter 3
Purification and Nucleic Acids From Eukaryotic Cells
HANS GERD NOTHWANG AND FRIEDHELM HILDEBRANDT 50

Subprotocol 1: Extraction of Nucleic Acids 50
Subprotocol 2: Isolation of Genomic DNA From Mammalian Cells . . 56
Subprotocol 3: Isolation of Cytoplasmic RNA 60
Subprotocol 4: Rapid Preparation of Total RNA by Acid Guanidinium Thiocyanate/Phenol/Chloroform/ Extraction 64
Subprotocol 5: Preparation of Poly(A)$^+$ RNA 67

Chapter 4
Electrophoresis of DNA and RNA Fragments
FENG QIAN AND GREGORY G. GERMINO 71

Subprotocol 1: The Recovery of DNA Fragments 75
Subprotocol 2: Electrophoresis of RNA 77

Chapter 5
Single-Strand Conformation Polymorphism (SSCP) Analysis
FENG QIAN AND GREGORY G. GERMINO 83

Chapter 6
Denaturing Gradient Gel Electrophoresis
KAI-OLAF NETZER 86

Chapter 7
Introduction of Pulsed-Field Gel Electrophoresis (PFGE)
FENG QIAN AND GREGORY G. GERMINO 96

Chapter 8
Pulsed-Field Gel Electrophoresis: Protocols
GUDRUN A. RAPPOLD, KARIN RIED, ALBRECHT KLINK,
ERCOLE RAO AND BIRGIT WEISS 103

Subprotocol 1: Preparation and Processing of High Molecular DNA in Agarose Blocks 104
Subprotocol 2: Preparation of Size Markers 106
Subprotocol 3: Restriction Enzyme Digestion of DNA in Agarose Blocks 108
Subprotocol 4: Gel Electrophoresis 110

Chapter 9
Radioactive Labeling of DNA and RNA Probes
PETER IGARASHI 114

Subprotocol 1: End-Labeling Using T4 Polynucleotide Kinase 114
Subprotocol 2: End-Labeling Using the Exchange Kinase Reaction . . 116
Subprotocol 3: Labeling 3' Ends with Terminal Transferase (Forward Reaction) 117
Subprotocol 4: Random-Prime Labeling 118
Subprotocol 5: Riboprobes 121

Chapter 10
Hybridization Methods (Southern and Northern Blotting)
KAI-OLAF NETZER 126

Subprotocol 1: Preparation of Dot Blots for DNA 129
Subprotocol 2: Preparation of Southern Blots for Genomic DNA . . . 131
Subprotocol 3: Hybridization of DNA Blots 135
Subprotocol 4: Preparation of RNA Dot Blots 139
Subprotocol 5: Preparation of Northern Blots 140
Subprotocol 6: Hybridization of RNA Blots 143
Subprotocol 7: Membrane Stripping 147

Chapter 11
Specimen Preparation Techniques for Cytogenetic Analysis by Fluorescence in situ Hybridization
STEFAN JOOS, MARTIN BENTZ, ANTON H. N. HOPMAN AND PETER LICHTER 148

Subprotocol 1: Cultivation of Blood Lymphocytes 149
Subprotocol 2: Preparation of Metaphase Chromosomes and Interphase Nuclei from Blood Lymphocytes 151
Subprotocol 3: Pepsin Digestion of Blood Lymphocytes 153
Subprotocol 4: Preparation of Fibroblasts for FISH (Adherently Growing Cells) 154
Subprotocol 5: Treatment of Blood Smears 155
Subprotocol 6: Bone Marrow Smears 156
Subprotocol 7: Clinical Material Obtained from Solid Tumors: Pretreatment of Slides with Poly-L-Lysine 157
Subprotocol 8: Preparation of Single Cell Suspensions from Solid Tumor Material 158
Subprotocol 9: Preparation of Frozen Sections 160
Subprotocol 10: Paraffin-Embedded Tissue Sections 161

Chapter 12
Chromosome Analysis by Fluorescence in situ Hybridization
MARTIN BENTZ, STEFAN JOOS AND PETER LICHTER 166

Subprotocol 1: Specimen Preparation 170
Subprotocol 2: Probe Labelling by Nick Translation 171
Subprotocol 3: Dot-Blot Assay to Test Labelling 174
Subprotocol 4: Probe Mixture and Denaturation for Fluorescence in situ Hybridization 175

Subprotocol 5: Denaturation of the DNA on the Slides 176
Subprotocol 6: Detection 178
Subprotocol 7: Chromosomal in situ Suppression (CISS) Hybridization 179
Subprotocol 8: Signal Amplification 181
Subprotocol 9: Multicolor Fluorescence in situ Hybridization 182

Chapter 13
Sequencing
KLAUS DEICHMANN 186

Subprotocol 1: Standard protocol for T7 DNA polymerase (Sequenase^{TM}) 194
Subprotocol 2: Standard Protocol for Sequencing with Taq Polymerase 197
Subprotocol 3: Denaturing Polyacrylamide Sequencing Gels 200

Chapter 14
Polymerase Chain Reaction
FRIEDHELM HILDEBRANDT AND IVA SINGH-SAWHNEY 207

Chapter 15
Cloning Vectors
ANNETTE DEICHMANN AND KLAUS DEICHMANN 226

Subprotocol 1: Transformation of Bacteria with Recombinant Plasmid Using the Ca^{++}-Precipitation Method (Mandel 1970) 234
Subprotocol 2: Transformation of Bacteria with Recombinant Plasmid by Electroporation (Dower 1988) 238
Subprotocol 3: Transformation of Bacteria with Recombinant Bacteriophage DNA 241
Subprotocol 4: "Mini-Prep" Method for Plasmid Isolation 245
Subprotocol 5: Chromatographic Method for Plasmid Preparation . . 247
Subprotocol 6: Large-Scale Preparation of Bacteriophage DNA (Replicative Form (RF)) 249

Part II Strategies for Gene Isolation and Characterization

Chapter 16
Cloning Strategies: An Overvierw
FRIEDHELM HILDEBRANDT 257

Chapter 17
Genomic Libraries
LUITZ F. ONUCHIC AND GREGORY G. GERMINO 261

Chapter 18
cDNA Libraries
LUITZ F. ONUCHIC AND GREGORY G. GERMINO 273

Chapter 19
cDNA Library Screening
JOHANN PETER HOSSLE 288

Subprotocol 1: Plating of a λgt11 cDNA Library 296
Subprotocol 2: Hybridization Screening - cDNA Sequences as Probes 298
Subprotocol 3: Immuno-Screening 300
Subprotocol 4: Purification of Phage Particles, DNA Isolation and Subcloning 306

Chapter 20
Expression Cloning with *Xenopus* Oocytes
DANIEL MARKOVICH, ANDREAS WERNER AND HEINI MURER 310

Chapter 21
Transgenic Animals
ECKART SCHOTT, MARTIN PAUL AND DETLEV GANTEN 319

Chapter 22
Expression in Eukaryotic Cells: Gene Transfer Using Retroviral Vectors
MARTIN MARX 337

Subprotocol 1: Synthesis of the Insert 339
Subprotocol 2: Purification 340
Subprotocol 3: Ligation of the Insert into the Vector 340
Subprotocol 4: Transfection of *E. coli* HB101 and Plasmid DNA Isolation 341
Subprotocol 5: Assay for the Presence of the DNA Insert 343

Subprotocol 6: Transfection of ψ2 Packaging Cells 344
Subprotocol 7: Infection of ψAM Packaging Cells 348
Subprotocol 8: Infection of Target Cells 348

Chapter 23
Positional Cloning and Linkage Analysis
FRIEDHELM HILDEBRANDT AND HEYMUT OMRAN 352

Part III Protein Methods

Chapter 24
Protein Techniques
ROBERT F. REILLY 367

Subprotocol 1: In Vitro Translation and Immunoprecipitation 367
Subprotocol 2: Western Blotting 375
