

Contents

1 The Role of Formal Specifications	1
<i>Marie-Claude Gaudel, Gilles Bernot</i>	
1.1 The role of specifications in software development	1
1.2 Formal specifications	3
1.3 Requirement engineering and validation	6
1.4 Refinements	8
1.5 Mechanization of formal specifications	10
2 Algebraic Preliminaries	13
<i>Donald Sannella, Andrzej Tarlecki</i>	
2.1 Many-sorted sets	13
2.2 Signatures and algebras	14
2.3 Homomorphisms and congruences	16
2.4 Term algebras	18
2.5 Signature morphisms	20
2.6 Equations	22
2.7 Presentations and theories	22
2.8 Equational calculus	25
2.9 Initial models	26
2.10 Variations on a theme	27
3 From Total Equational to Partial First-Order Logic	31
<i>Maura Cerioli, Till Mossakowski, Horst Reichel</i>	
3.1 Conditional axioms	35
3.2 Partial data types	47
3.3 Partial first-order logic	57
3.4 More advanced problems	97
4 Institutions: An Abstract Framework for Formal Specifications	105
<i>Andrzej Tarlecki</i>	
4.1 Working with an arbitrary logical system	105
4.2 Institutions	107
4.3 Flat specifications in an arbitrary institution	113
4.4 Institutions with composable signatures	115
4.5 Entailment relations	119
4.6 Specifications in an arbitrary institution	123
4.7 Further remarks	128

II Contents

5 Specification Semantics	131
<i>Horst Reichel</i>	
5.1 Isomorphism class semantics	133
5.2 Loose semantics	140
5.3 Constraints	144
5.4 Observability	151
5.5 Data types and systems as fixed points	156
6 Structuring and Modularity	159
<i>Fernando Orejas</i>	
6.1 Introduction	159
6.2 Preliminaries	159
6.3 Basic operations for building specifications	162
6.4 Parameterizations and parameter passing	172
6.5 Modules and modular systems	189
7 Refinement and Implementation	201
<i>Hartmut Ehrig, Hans-Jörg Kreowski</i>	
7.1 Introduction	201
7.2 Examples	204
7.3 Implementation concepts	211
7.4 Syntactic aspects	220
7.5 Composition	224
7.6 Refinement of modular specifications	227
7.7 Implementation of modular systems	235
8 Specification Languages	243
<i>Donald Sannella, Martin Wirsing</i>	
8.1 Introduction	243
8.2 Existing specification languages	244
8.3 Design decisions	252
8.4 Future trends	271
9 Term Rewriting	273
<i>Hélène Kirchner</i>	
9.1 Rewriting as an abstract reduction system	274
9.2 Rewriting as a relation on terms	278
9.3 Rewriting as a logic for concurrent computations	293
9.4 Superposition and simplification	298
9.5 Order sorted rewriting	306
9.6 Inductive proofs	312
9.7 Further reading	320

10 Proof in Flat Specifications	321
<i>Peter Padawitz</i>	
10.1 Introduction	321
10.2 Standard specifications	325
10.3 Final semantics and bisimilarity	339
10.4 Gentzen proofs and program synthesis	346
10.5 Confluence and consistency	352
10.6 Implicit induction	365
10.7 Unfolding and explicit induction	369
10.8 Goal solving	379
11 Proof Systems for Structured Specifications and Their Refinements	385
<i>Michel Bidoit, María Victoria Cengarle, Rolf Hennicker</i>	
11.1 Introduction	385
11.2 The kernel specification language	387
11.3 Noncompositional proof systems	395
11.4 Structured proof systems	402
11.5 Proof systems for refinement	405
11.6 Parameterization	406
11.7 Reachability and observability operators	415
12 Object Specification	435
<i>Hans-Dieter Ehrich</i>	
12.1 Introduction	435
12.2 Basic concepts	436
12.3 A denotational class model	445
12.4 Class specification in the small	449
12.5 Class specification in the large	452
12.6 Object systems	458
12.7 Related work	462
12.8 Concluding remarks	464
13 Algebraic Specification of Concurrent Systems	467
<i>Egidio Astesiano, Manfred Broy, Gianna Reggio</i>	
13.1 Process algebras	469
13.2 Algebraic specification of static data types	478
13.3 Dynamic-data types (A3)	500
13.4 Dynamic data-types (A4)	510
13.5 Conclusion	518
A Specifications of data types used by Bit	520

14 Formalization of the Development Process	521
<i>David Basin, Bernd Krieg-Brückner</i>	
14.1 Introduction	521
14.2 Simple schematic development rules	531
14.3 General development rules	548
14.4 Developments	555
14.5 Conclusions	561
Bibliography	563
Subject Index	611
Author Index	617

Algebraic Foundations of Systems Specification

Astesiano, E.; Kreowski, H.-J.; Krieg-Brückner, B. (Eds.)

1999, XII, 616 p., Hardcover

ISBN: 978-3-540-63772-1
