Part I Classical Cytogenetics

Chapter 1

Tissue Culture

FRIEDEL WENZEL	3
----------------------	---

Subprotocol 1: Sampling, Transport, Storage	20
---	----

Subprotocol 2: Cryopreservation	26
---------------------------------------	----

Subprotocol 3: Bacterial and/or fungal contamination	33
--	----

Subprotocol 4: Mycoplasma Contamination	37
---	----

Subprotocol 5: Elimination of Mycoplasmas from Cell Cultures	45
---	----

Chapter 2

Chromosome Staining

ANGELIKA KÖHLER	52
-----------------------	----

Subprotocol 1: Giemsa Staining	55
--------------------------------------	----

Subprotocol 2: GTG-Banding	56
----------------------------------	----

Subprotocol 3: QFQ-Banding	59
----------------------------------	----

Subprotocol 4: C-Banding	60
--------------------------------	----

Subprotocol 5: NOR-Staining	62
-----------------------------------	----

Subprotocol 6: DA-DAPI Staining	64
---------------------------------------	----

Subprotocol 7: Replication Pattern (by BrdU-Incorporation)	65
--	----

Subprotocol 8: Sister Chromatid Differentiation (by BrdU Incorporation)	68
--	----

Subprotocol 9: Sex Chromatin Staining - X Chromatin (Barr Body) .	70
---	----

Subprotocol 10: Sex Chromatin Staining - Y-Chromatin (Y Body) ..	72
--	----

Chapter 3

Karyotyping and Data Interpretation

KARSTEN HELD	75
--------------------	----

Chapter 4	
Documentation	
PETER MINY AND ROLF-DIETER WEGNER	96

Part II Postnatal Diagnosis

Chapter 5	
Peripheral Blood	
IRIS BARTELS	115

Chapter 6	
Establishment of Permanent Growing Lymphoblastoid Cell Lines	
HEIDEMARIE NEITZEL	121

Subprotocol 1: Transformation of B Lymphocytes	
with B95-8 EB Virus	123
Subprotocol 2: Ficoll Separation of Unfractionated Mononuclear	
Leukocytes Obtained from Whole Blood	125
Subprotocol 3: Establishment of Cultures	126
Subprotocol 4: Freezing of Lymphoblastoid Cells	127
Subprotocol 5: Thawing of Lymphoblastoid Cells	128
Subprotocol 6: Chromosome Preparations	
from Lymphoblastoid Cells	129

Chapter 7	
Solid Tissues	
REGINE SCHUBERT AND GESA SCHWANITZ	132

Chapter 8	
Cells from Urine Sample	
HANNELORE KÖRNER, HENRIKE DIA AND CHRISTIANE BOMMER ...	142

Chapter 9	
Classical and Molecular Cytogenetics of Tumor Cells	
BRIGITTE SCHLEGELBERGER, SIMONE METZKE, SVETLANA HARDER,	
REINA ZÜHLKE-JENISCH, YANMING ZHANG, REINER SIEBERT	151
Subprotocol 1: Chromosome Analysis	152
Subprotocol 2: Fluorescence in Situ Hybridization	168

Chapter 10	
Cytogenetics of Meiotic Cells	
R. JOHANNISSON	186
Subprotocol 1: Air-Drying Method	188
Subprotocol 2: Surface Spreading Method Using Light Microscopy ..	190
Subprotocol 3: Surface Spreading Using Electron Microscopy	199
Subprotocol 4: Ejaculate	207

Part III Prenatal Diagnosis

Chapter 11	
Prenatal Diagnosis - An Introduction	
ROLF-DIETER WEGNER	213

Chapter 12	
Amniotic Fluid Cell Analysis	
INGO KENNERKNECHT, MAHMOUD DJALALI, GOTTHOLD BARBI, WALTER JUST AND WALTHER VOGEL	217

Chapter 13	
Chorionic Villi Sampling	
ROLF-DIETER WEGNER AND HOLGER TOENNIES	231
Subprotocol 1: Setting-up a Short Term Culture	235
Subprotocol 2: Chromosome Preparation from Short Term Culture	238
Subprotocol 3: Setting-up a Long Term Culture by Physical Maceration	239
Subprotocol 4: Setting-up a Long Term Culture by Enzymatic Dissociation	241
Subprotocol 5: Cell Harvest and Chromosome Preparation	242

Part IV Special Applications

Chapter 14	
Diagnosis of Chromosomal Instability Syndromes	
ROLF-DIETER WEGNER AND MARKUS STUMM	251

Chapter 15	
Flow Cytometric Testing for Syndromes with Chromosomal	
Instability, Aplastic Anemia and Related Hematological Disorders	
DETLEV SCHINDLER AND HOLGER HOEHN	269

Chapter 16	
Cell Fusion	
MARKUS STUMM AND ROLF-DIETER WEGNER	282

Chapter 17	
Origin of Trisomies	
GESA SCHWANITZ AND THOMAS EGGERMANN	291

Part V Molecular Cytogenetics

Chapter 18	
Fluorescence <i>in Situ</i> Hybridization	
GESA SCHWANITZ AND REGINE SCHUBERT	305
Subprotocol 1: Preparation of Slides	310
Subprotocol 2: Labelling of DNA Probes	313
Subprotocol 3: Denaturation and Hybridization	317
Subprotocol 4: Detection of Biotin Labelled Probes	319
Subprotocol 5: Amplification	322
Subprotocol 6: Simultaneous Two Colour Detection	323
Subprotocol 7: In Situ Hybridization with Unique Sequence Probes	324
Subprotocol 8: Preparation of Interphase Nuclei	326

Chapter 19	
Fluorescence <i>in Situ</i> Hybridization (FISH)	
Analysis in Human Sperm Cells	
EVELYN KO AND RENÉE MARTIN	335

Chapter 20	
Microdissection and Reverse Chromosome Painting	
GABRIELE SENGER, JÖRG WEIMER, UWE CLAUSSEN,	
AND ILSE CHUDоба	356

Chapter 21	
Comparative genomic hybridisation (CGH)	
TRAUDL HENN AND OSKAR A. HAAS	376

Part VI Techniques in Development

Chapter 22	
Fetal Cells in Maternal Blood	
DOROTHEE GÄNSHIRT, HENK S.P. GARRITSEN, WOLFGANG HOLZGREVE	401

Chapter 23	
Spectral Karyotyping in Clinical and Tumor Cytogenetics	
EVELIN SCHRÖCK, YUVAL GARINI, MICHAEL KÖHLER AND THOMAS RIED	416

Chapter 24	
Chromosome Analysis by Multiplex-FISH (M-FISH)	
MICHAEL R. SPEICHER	439

Subject Index	457
---------------------	-----

Diagnostic Cytogenetics

Wegner, R.-D. (Ed.)

1999, XIV, 460 p. 66 illus., 7 illus. in color., Ring binder
