## Part I. Cooperative Information Systems and Agents

---

<b>Introduction</b> .....	3
<b>1. From Business Processes to Cooperative Information Systems: An Information Agents Perspective</b>	
Michael P. Papazoglou and Willem-Jan van den Heuvel .....	10
1.1 Introduction .....	10
1.2 The Enterprise Framework .....	12
1.3 The Business Support Facilities .....	13
1.4 The Advanced Middleware Infrastructure .....	27
1.5 Concluding Remarks .....	35
<b>2. Social Abstractions for Information Agents</b>	
Munindar P. Singh and Michael N. Huhns .....	37
2.1 Introduction .....	37
2.2 Key Concepts .....	38
2.3 Social Abstractions .....	42
2.4 Commitments for Interoperation .....	44
2.5 Applications .....	47
2.6 Conclusions and Future Work .....	51
<b>3. Integration of Information from Multiple Sources of Textual Data</b>	
Sonia Bergamaschi and Domenico Beneventano .....	53
3.1 Introduction .....	53
3.2 The TSIMMIS Project .....	56
3.3 The MOMIS Project .....	65
3.4 Discussion and Final Remarks .....	76
<b>4. In-Context Information Management through Adaptive Collaboration of Intelligent Agents</b>	
Katia Sycara .....	78
4.1 Introduction .....	78
4.2 Brief Overview of RETSINA .....	80

4.3	Automated Information Context Refinement by an Interface Agent . . . . .	86
4.4	Learning of Information Retrieval Context . . . . .	90
4.5	Explicit Context Representation in Task Schemas . . . . .	91
4.6	Conclusion and Future Research . . . . .	99
 <b>5. A Framework for a Scalable Agent Architecture of Cooperating Heterogeneous Knowledge Sources</b>		
	Aris Ouksel . . . . .	100
5.1	Introduction and Objectives . . . . .	100
5.2	A Conceptual Framework for SCOPES . . . . .	102
5.3	Current State of Knowledge in Semantic Interoperability . . . .	107
5.4	Semantic Interoperability in SCOPES . . . . .	112
5.5	Conclusion and Extensions to SCOPES . . . . .	121
<hr/> <b>Part II. Rational Information Agents and Electronic Commerce</b> <hr/>		
	<b>Introduction</b> . . . . .	127
 <b>6. Agents as Mediators in Electronic Commerce</b>		
	Robert Guttman, Alexandros Moukas, and Pattie Maes . . . . .	131
6.1	Introduction . . . . .	131
6.2	Roles of Agents as Mediators in Electronic Commerce . . . . .	132
6.3	Agent Technologies for Electronic Commerce . . . . .	142
6.4	AmEC at the MIT Media Laboratory . . . . .	149
6.5	Conclusion and Future Directions . . . . .	152
 <b>7. Auctions and Multi-agent Systems</b>		
	Pablo Noriega and Carles Sierra . . . . .	153
7.1	Introduction . . . . .	153
7.2	The Fishmarket . . . . .	156
7.3	Towards a Formal Model . . . . .	168
7.4	Institutions . . . . .	172
7.5	Closing Remarks . . . . .	173
 <b>8. Strategic Reasoning and Adaptation in an Information Economy</b>		
	Edmund H. Durfee, Tracy Mullen, Sunju Park, José M. Vidal, and Peter Weinstein . . . . .	176
8.1	Introduction . . . . .	176
8.2	The Service Market Society . . . . .	180
8.3	The UMDL Ontology . . . . .	183

8.4	The UMDL Auctions .....	185
8.5	Simple Market Scenario - Price Takers .....	186
8.6	Strategic Agents.....	189
8.7	Learning Agents.....	193
8.8	System-Wide Adaptation .....	197
8.9	Conclusion .....	202
 <b>9. SharedPlans in Electronic Commerce</b>		
	Merav Hadad and Sarit Kraus .....	204
9.1	Introduction .....	204
9.2	The SharedPlan Model .....	206
9.3	The Benefits of Using SharedPlans in Electronic Commerce ..	212
9.4	The General SharedPlan System .....	217
9.5	Conclusion .....	230
 <b>10. Dynamic Supply Chain Structuring for Electronic Commerce Among Agents</b>		
	Daniel Dajun Zeng and Katia Sycara .....	232
10.1	Introduction .....	232
10.2	The LCT Supply Chain Model .....	235
10.3	LCT in Inventory Models with Constant Demand Rates .....	237
10.4	LCT in Periodic Review Stochastic Inventory Model .....	238
10.5	Computing Inventory Policies with Multiple Leadtime Options .....	244
10.6	Concluding Remarks .....	248
 <hr/> <b>Part III. Adaptive Information Agents</b> <hr/>		
	<b>Introduction</b> .....	253
 <b>11. Adaptive Choice of Information Sources</b>		
	Sandip Sen, Anish Biswas, and Sumit Ghosh .....	258
11.1	Introduction .....	258
11.2	A Categorization of Approaches to Developing Adaptive Information Agents .....	260
11.3	A State-Based Approach to Load Balancing.....	261
11.4	A Model-Based Approach to Load Balancing.....	270
11.5	Learning to Select Information Sources .....	274
11.6	Observations.....	277

**12. Personal Assistants for the Web: A MIT Perspective**

Henry Lieberman .....	279
12.1 Introduction .....	279
12.2 Intelligent Information Agents Can Break the Knowledge Bottleneck .....	280
12.3 Intelligent Information Agents and Conventional Information Retrieval .....	281
12.4 From Information Retrieval to Information Reconnaissance ..	282
12.5 Information Agents Can Help People Find Common Interests	285
12.6 Information Agents as Matchmakers .....	287
12.7 Agents for Electronic Commerce .....	289
12.8 Agents for Visualization of Information Spaces .....	291
12.9 Information Agents Can Be Controversial .....	292

**13. Amalthaea and Histos: MultiAgent Systems for WWW****Sites and Reputation Recommendations**

Alexandros Moukas, Giorgos Zacharia, and Pattie Maes .....	293
13.1 Introduction .....	293
13.2 Background and Related Work .....	295
13.3 Amalthaea .....	299
13.4 Histos .....	314
13.5 Conclusion and Future Work .....	321

**14. Scalable Web Search by Adaptive Online Agents: An InfoSpiders Case Study**

Filippo Menczer and Alvaro E. Monge .....	323
14.1 Introduction .....	323
14.2 Search Engines and Agents .....	325
14.3 Scalability .....	327
14.4 InfoSpiders .....	329
14.5 Case Study .....	337
14.6 Discussion .....	340

---

**Part IV. Mobile Information Agents and Security**

---

<b>Introduction</b> .....	351
---------------------------	-----

**15. Mobile Agents for Distributed Information Retrieval**

Brian Brewington, Robert Gray, Katsuhiro Moizumi, David Kotz, George Cybenko, and Daniela Rus .....	355
15.1 Introduction .....	355
15.2 Motivation .....	357

15.3 Survey of Mobile-Agent Systems.....	360
15.4 Application: The Technical-Report Searcher .....	367
15.5 Planning .....	377
15.6 Conclusion .....	394
<b>16. On Coordinating Information Agents and Mobility</b>	
Robert Tolksdorf.....	396
16.1 Introduction .....	396
16.2 Coordination and Mobility in Information Systems .....	396
16.3 Software Engineering for Multi Agent Systems .....	400
16.4 A Coordination Language for Mobility .....	403
16.5 Simple Coordination Patterns .....	406
16.6 Related Work and Conclusion .....	411
<b>17. Spawning Information Agents on the Web</b>	
Onn Shehory .....	412
17.1 Introduction .....	412
17.2 Why Is Spawning Necessary? .....	415
17.3 Requirements for Spawning .....	418
17.4 The Algorithm .....	420
17.5 Simulation: The Cloning Case.....	424
17.6 Spawning: Information Requirements Analysis .....	427
17.7 Related Work .....	428
17.8 Conclusion .....	430
<b>18. Mobile Agent Security</b>	
Christian F. Tschudin .....	431
18.1 Motivation .....	431
18.2 Is Code Mobility Dangerous? .....	431
18.3 Protecting the Host.....	433
18.4 Run-Time Checks and How To Avoid (Some of) Them.....	434
18.5 Authentication, Authorization, Allocation .....	434
18.6 Protecting the Mobile Agents .....	436
18.7 Detecting Agent Tampering.....	437
18.8 Preventing Agent Tampering.....	439
18.9 Secure or Open, Is This the Question? .....	443
18.10 Outlook .....	444
<b>References</b> .....	447
<b>About the Authors</b> .....	485
<b>List of Contributors</b> .....	495
