

CONTENTS

Vocal folds as a vibro-impact system <i>P S Landa</i>	1
Behaviour of granular materials in the field of vibration <i>M Saeki and E Takano</i>	11
To the general theory of hand-held percussion machines <i>V I Babitsky</i>	19
Free manifolds of dynamical billiards <i>V V Beletsky, E I Kugushev, E L Starostin</i>	29
Vibro-impact processes in systems with multiple impact pairs and distributed impact elements <i>V L Krupenin</i>	39
The impact based transportation process in a vibratory feeder <i>P Wolfsteiner and F Pfeiffer</i>	49
The effectiveness of the impact damper with granular material <i>I Yokomichi, Y Araki, M Aisaka and H Kusano</i>	59
Dynamics of gear-pair systems with backlash <i>S Theodossiades and S Natsiavas</i>	69
Nonlinear stability analysis of a single mass rotor contacting a rigid backup bearing <i>H Ecker</i>	79
Influence of contact and impacts on the dynamics of an elastic rotor with an elastic retainer bearing <i>G Wegener, R Markert</i>	89
Wavelets transform in analysis and control of a piezoelectric vibroconverter with impact <i>V F Poterasu</i>	99
Stability improvement of the vibro-impact discrete systems <i>J Awrejcewicz and K Tomczak</i>	109
Stability of periodic motions in systems with unilateral constraints <i>A P Ivanov</i>	119

On the calculation of resonance oscillations of the vibro-impact systems by the averaging technique <i>V S Burd and V L Krupenin</i>	127
Systems with high degree of nonlinearity as vibro-impact ones – asymptotic approaches <i>I V Andrianov</i>	137
Simulation of liquid sloshing impact in moving structures <i>V N Pilipchuk and R A Ibrahim</i>	141
Exact solutions for a discrete systems undergoing free vibro-impact oscillations <i>L I Manevitch, M A F Azeez and A F Vakakis</i>	151
Asymptotic study of damped one-dimensional oscillator with close to impact potential <i>O V Gendelman and L I Manevitch</i>	159
Interaction between impulses and impacts in the nonlinear dynamics of an impacting system: a non-classical bifurcation <i>S Lenci and G Rega</i>	167
Dynamics of an impact unit for percussion machines <i>S A Kember and V I Babitsky</i>	177
The influence of asymmetries on the double impact oscillator dynamics <i>F Peterka and O Szöllös</i>	187
Dynamics of non-linear vibro-impact systems <i>P Z Lugovoy and V I Gouliaev</i>	195
Subharmonic response of a single-barrier vibro-impact system to a narrow-band random excitation <i>M F Dimentberg, D V Iourtchenko</i>	205
Strain solitons in solids: physics, numerics and fracture <i>A M Samsonov, G V Dreiden, A V Porubov, I V Semenova</i>	215
Multiple impacts of a bar with external dry friction <i>L V Nikitin</i>	221
Solving wave propagation problems symbolically using computer algebra <i>B Hu, P Eberhard and W Schiehlen</i>	231
Stiction modeling: first order differential equation approximation for nonholonomic inequality constraint <i>A P Kovacs</i>	241
Vibro-impacts induced by non-linear resonances in hertzian contacts <i>J Perret-Liaudet and J Sabot</i>	251
Effect of prestressing on durability at repeated impacts <i>I Dumitru, S Babeu, T Babeu, L Marsavina</i>	261
Identification of damage in bars using PZT sensors and regression techniques <i>K T Feroz and S O Oyadiji</i>	269

Laser vibrometry for impact measurements <i>N A Halliwell, S A Kember and S J Rothberg</i>	279
On the attainable performance of shock control by visco-elastic bumper <i>A M Veprik and V I Babitsky</i>	289
Interaction analysis of mechanical system and hydraulic impact buffer <i>V Cech</i>	299
Dynamics of the impact force generator <i>B Blazejczyk-Okolewska and K Czolczynski</i>	309
Driver seat suspension design and identification for commercial vehicles <i>I Szepessy and I Wahl</i>	319
Two-grooved automatic nail machine <i>S Vasilishin and V Roizman</i>	329
Analytical and numerical methods for the analysis of the stitch forming devices of blindstitch sewing <i>D Delichev and Z Tcherneva-Popova</i>	337
Author Index.....	345
