

Table of Contents

Synchrotron SAXS and WAXD Study of Polymer Crystallization in Confined Microdomains L.-Z. Liu and B. Chu	1
Structure Development in Side Group Liquid Crystalline Diblock Copolymers C.O. Osuji, J.T. Chen, G. Mao, C.K. Ober, and E.L. Thomas	9
Crystallization Behavior and Properties of Polyolefins R.G. Alamo and C. Chi	29
Modeling of Side-Chain Liquid Crystal Polysiloxanes B.L. Farmer and G.M. Podojil	39
Polymorphic and Polytypic Transformations during Crystallization of Long-Chain Compounds F. Kaneko	45
Fluorescence Studies on Molecular Interaction and Dynamics of Liquid Crystalline Polymers K. Horie, H.-W. Huang, and M. Shimada	55
Molecular Rheology of Glassy Polymers K. Osaki and T. Inoue	67
Polymer-Solvent Organization in Relation to Chain Microstructure J.-M. Guenet	71
Polymer-Surfactant Interaction in Thermoreversible Gels F. Tanaka	81
Viscoelastic Phase Separation and Transient Formation of Spongelike Patterns H. Tanaka	91
Dielectric Studies of Order-Disorder Transition in Solutions of Styrene-Isoprene Block Copolymers K. Adachi	101

VIII

Long Wavelength Composition Fluctuations in Diblock Copolymers K. Chrissopoulou, F. Rittig, and G. Fytas	109
Structure and Ordering Processes of Diblock Copolymer Associates in Solution T. Nose	115
Amphipathic Synthetic and Biological Macromolecules in Aqueous Media C.L. McCormick, R.S. Armentrout, G.C. Cannon, and G.G. Martin	125
The Interactions of Hydrophobically-Modified Poly-(N-Isopropylacrylamides) with Liposomes F.M. Winnik and A. Polozova	141
Controlled Association of Macromolecules in Water: Hydrophobized Polymers and Proteins K. Akiyoshi, Y. Sasaki, K. Kuroda, A. Ueminami, and J. Sunamoto	151
Macro to Microdynamics of Threadlike Micelles T. Shikata	159
Self-Organized Nanostructures with a Single Polymer Chain K. Yoshikawa	169
Solution Properties of Polymacromonomers Consisting of Polystyrene K. Terao, Y. Nakamura, and T. Norisuye	179
Frictional Behavior of Self-Assembled Polymer Brushes S.M. Kilbey II, P. Schorr, and M. Tirrell	187
