Part 1: Crew Scheduling

| | |
|---|------------|
| Solution of Large-Scale Railway Crew Planning Problems: The Italian Experience | 1 |
| Alberto Caprara, Matteo Fischetti, Pier Luigi Guida, Paolo Toth and Daniele Vigo, ITALY | |
| Crew Pairing for a Regional Carrier | 19 |
| Guy Desaulniers, Jacques Desrosiers and Arielle Lasry, CANADA and Marius M. Solomon, USA | |
| An Improved ILP System for Driver Scheduling | 43 |
| Sarah Fores, Les Proll and Anthony Wren, UK | |
| An Exact Algorithm for the Vehicle and Crew Scheduling Problem | 63 |
| Knut Haase and Christian Friberg, GERMANY | |
| Driver Scheduling Using Genetic Algorithms with Embedded Combinatorial Traits | 81 |
| Ann S.K. Kwan, Raymond S.K. Kwan, and Anthony Wren, UK | |
| An Integrated Approach to Extra-Urban Crew and Vehicle Scheduling | 103 |
| Andrea Gaffi and Maddalena Nonato, ITALY | |
| Producing Train Driver Schedules under Differing Operating Strategies | 129 |
| Ann S.K. Kwan, Raymond S.K. Kwan, Margaret E. Parker and Anthony Wren, UK | |
| Integrated Scheduling of Buses and Drivers | 155 |
| Anthony Wren, UK and Nicolau D. Fares Gualda, BRASIL | |

Part 2: Vehicle Scheduling and Service Design

Object Oriented Bus Vehicle Scheduling – The BOOST System 179

Raymond S.K. Kwan and Mohammad A. Rahin, UK

Solving Large-Scale Multiple-Depot Vehicle Scheduling Problems 195

Andreas Löbel, GERMANY

Exact Algorithms for the Multi-Depot Vehicle Scheduling Problem Based on Multicommodity Network Flow Type Formulations 223

Marta Mesquita and José Paixão, PORTUGAL

Timetable Synchronization for Buses 247

Avishai Ceder and Ofer Tal, ISRAEL

Transportation Service Network Design: Models and Algorithms 261

Cynthia Barnhart and Daeki Kim, USA

Locomotive Assignment Using Train Delays 283

Koorush Ziarati, François Soumis and Jacques Desrosiers, CANADA

Part 3: Real-Time Control, Demand Responsive Systems and Information Systems

Optimal Real-Time Control Strategies for Rail Transit Operations During Disruptions 299

Susan W. O'Dell and Nigel H.M. Wilson, USA

Modeling Real-Time Control Strategies in Public Transit Operations 325

Xu Jun Eberlein, Nigel H.M. Wilson and David Bernstein, USA

Knowledge-Based Decision Support System for Real-Time Train Traffic Control 347

Alexander Fay and Eckehard Schnieder, GERMANY

| | |
|---|-----|
| Requirements for, and Design of, an Operations Control System for Railways | 371 |
| Leena Suhl and Taïeb Mellouli, GERMANY | |
| Telebus Berlin: Vehicle Scheduling in a Dial-a-Ride System | 391 |
| Ralf Borndörfer, Martin Grötschel, Fridolin Klostermeier and Christian Küttner, GERMANY | |
| Advanced Technologies in the Design of Public Transit & City Information Systems | 423 |
| Joachim R. Daduna and Kamen Danowski, GERMANY | |

Appendix 1 List of Authors

Appendix 2 List of the Presented Papers Which are not Included in this Volume
