<b>1. Introduction</b>	1
1.1 Semiconductors: Basic Concepts	2
1.1.1 Band Structure	2
1.1.2 Excitons	5
1.1.3 Phonons in Semiconductors	6
1.1.4 Scattering Processes in Semiconductors	7
1.1.5 Carrier Relaxation: Four Regimes	9
1.1.6 Carrier Transport	11
1.2 Ultrafast Lasers	12
1.3 Ultrafast Spectroscopy Techniques	12
1.3.1 Pump-Probe Spectroscopy	13
1.3.2 FWM Spectroscopy	16
1.3.3 Luminescence Spectroscopy	18
1.3.4 Interferometric Techniques	20
1.3.5 Terahertz Spectroscopy	20
1.4 Interpretation of Results	21
1.4.1 FWM Spectroscopy	21
1.4.2 Pump-Probe Spectroscopy	21
1.4.3 Raman Spectroscopy	23
1.4.4 Luminescence Spectroscopy	23
1.4.5 Calculation of the Dynamics	24
1.4.6 Current Trends	26
1.5 Summary	26
<b>2. Coherent Spectroscopy of Semiconductors</b>	27
2.1 Basic Concepts	28
2.1.1 An Ensemble of Independent Two-Level Systems	29
2.1.2 Semiconductor Bloch Equations	41
2.1.3 Coherence Effects in Other Optical Experiments	47
2.1.4 Concluding Remarks	49
2.2 Dephasing of Excitons	49
2.2.1 Exciton-Exciton and Exciton-Free-Carrier Collisions in Quantum Wells	49
2.2.2 Exciton-Phonon Interactions	51
2.2.3 Localized Excitons	54
2.3 AC Stark Effect	57
2.4 Transient Spectral Oscillations	60

2.5	Exciton Resonance in FWM .....	61
2.6	Quantum Beats of Excitons .....	63
2.6.1	Beats from Discrete Excitonic Islands .....	64
2.6.2	HH-LH Beats .....	66
2.6.3	Quantum Beats of Magneto-Excitons .....	69
2.6.4	Distinction Between Quantum and Polarization Beats ..	70
2.6.5	Propagation Quantum Beats .....	74
2.6.6	Concluding Remarks .....	78
2.7	Interaction-Induced Effects:	
	Beyond the Independent-Level Approximation .....	78
2.7.1	Exciton-Exciton Interaction Effects .....	79
2.7.2	Biexcitonic Effects .....	89
2.8	Coherent Oscillations of an Electronic Wavepacket .....	96
2.9	Bloch Oscillations in a Semiconductor Superlattice .....	103
2.9.1	Semiclassical Picture .....	103
2.9.2	Tight-Binding Picture .....	104
2.9.3	Qualitative Quantum-Mechanical Picture .....	105
2.9.4	Observation of Bloch Oscillations in Semiconductor Superlattices .....	106
2.9.5	Influence of Excitons .....	108
2.9.6	Concluding Remarks .....	111
2.10	Coherent Spectroscopy of Free Electron-Hole Pairs .....	111
2.10.1	Transient Oscillations .....	111
2.10.2	Free-Carrier Dephasing in Bulk GaAs .....	112
2.10.3	Free-Carrier Dephasing in Intrinsic Quantum Wells ..	112
2.10.4	Free-Carrier Dephasing in Modulation-Doped Quantum Wells .....	113
2.10.5	Time-Resolved FWM from Modulation-Doped Quantum Wells .....	116
2.11	Coherent Phonons .....	117
2.12	Terahertz Spectroscopy of Semiconductor Nanostructures ..	120
2.12.1	Coherent Oscillations in a-DQWS .....	120
2.12.2	HH-LH Oscillations .....	124
2.12.3	Bloch Oscillations .....	126
2.12.4	Coherent Control of Charge Oscillations .....	128
2.12.5	Summary .....	131
2.13	Conclusions .....	131
<b>3.</b>	<b>Initial Relaxation of Photoexcited Carriers .....</b>	<b>133</b>
3.1	Non-thermal Distributions in GaAs .....	135
3.1.1	Pump-Probe Spectroscopy .....	135
3.1.2	Luminescence Spectroscopy .....	139
3.2	Intervalley Scattering in GaAs .....	144
3.3	Initial Carrier Relaxation in Quantum Wells .....	148
3.3.1	Spectral Hole-Burning in GaAs Quantum Wells .....	148

3.3.2	Non-thermal Holes in n-Modulation-Doped Quantum Wells . . . . .	153
3.3.3	Intersubband Scattering in Quantum Wells . . . . .	155
3.4	Summary and Conclusions . . . . .	160
<b>4.</b>	<b>Cooling of Hot Carriers . . . . .</b>	<b>161</b>
4.1	Simple Model of Carrier Energy-Loss Rates and Cooling Curves . . . . .	162
4.2	Cooling Curves: Early Measurements and Analysis . . . . .	166
4.3	Other Factors Influencing the Cooling Curves . . . . .	171
4.3.1	Pauli Exclusion Principle and Fermi-Dirac Statistics . .	171
4.3.2	Hot Phonons . . . . .	172
4.3.3	Screening and Many-Body Aspects . . . . .	175
4.4	Further Experimental Investigations of Energy-Loss Rates . .	183
4.4.1	Direct Measurement of the Energy-Loss Rates . . . . .	184
4.4.2	Bulk vs Quasi-2D Semiconductors . . . . .	190
4.5	Conclusions . . . . .	192
<b>5.</b>	<b>Phonon Dynamics . . . . .</b>	<b>193</b>
5.1	Phonon Dynamics in Bulk Semiconductors . . . . .	194
5.1.1	Phonon Generation in Bulk Semiconductors . . . . .	194
5.1.2	Phonon Detection by Raman Scattering . . . . .	196
5.1.3	Steady-State Results in GaAs . . . . .	196
5.1.4	Phonon Dynamics in GaAs . . . . .	198
5.1.5	Coherent Generation and Detection of Phonons . . . . .	202
5.1.6	Monte-Carlo Simulation of Phonon Dynamics in GaAs . . . . .	206
5.2	Phonon Dynamics in Quantum Wells . . . . .	208
5.2.1	Phonons in Quantum Wells . . . . .	208
5.2.2	Phonon Generation in Quantum Wells . . . . .	212
5.2.3	Phonon Detection by Raman Scattering . . . . .	213
5.2.4	Monte-Carlo Simulation of Phonon Dynamics in GaAs Quantum Wells . . . . .	214
5.2.5	Hot-Phonon Dynamics in GaAs Quantum Wells . . . . .	215
5.2.6	Determination of Phonon Occupation Number . . . . .	218
5.2.7	Experimental Determination of the Hot-Phonon Occupation Number and Dynamics . . . . .	220
5.3	Conclusions . . . . .	224
<b>6.</b>	<b>Exciton Dynamics . . . . .</b>	<b>225</b>
6.1	Basic Concepts . . . . .	225
6.1.1	Exciton States . . . . .	226
6.1.2	Exciton-Polaritons . . . . .	227
6.1.3	Exciton Fine Structure . . . . .	229
6.1.4	Dynamical Processes of Excitons . . . . .	231

6.2	Experimental Results: Non-resonant Excitation	236
6.2.1	Exciton-Formation Dynamics in GaAs Quantum Wells	236
6.2.2	Exciton Relaxation Dynamics in Cu <sub>2</sub> O	241
6.2.3	Spin Relaxation Dynamics in GaAs Quantum Wells	243
6.2.4	Recombination Dynamics of Thermalized Excitons in GaAs Quantum Wells	244
6.3	Experimental Results: Resonant Excitation	247
6.3.1	Pump-and-Probe Studies	248
6.3.2	Picosecond Luminescence Studies	251
6.3.3	Femtosecond Luminescence Studies	257
6.4	Conclusions	261
<b>7.</b>	<b>Carrier Tunneling in Semiconductor Nanostructures</b>	<b>263</b>
7.1	Basic Concepts: Optical Markers	264
7.2	Basic Concepts: Double-Barrier Structures	266
7.3	Basic Concepts: Asymmetric Double-Quantum-Well Structures	269
7.3.1	Optical Markers in a-DQWS	270
7.3.2	Non-resonant Tunneling	271
7.3.3	Resonant Tunneling	272
7.4	Tunneling in Double-Barrier Structures	278
7.4.1	Dependence on the Barrier Thickness	278
7.4.2	Dependence on Electric Field	278
7.4.3	Summary	280
7.5	Non-resonant Tunneling in Asymmetric Double-Quantum-Well Structures	281
7.5.1	Dependence on Barrier Thickness	282
7.5.2	Resonant Phonon-Assisted Tunneling	283
7.6	Resonant Tunneling in Asymmetric Double-Quantum-Well Structures	286
7.6.1	Resonant Tunneling of Electrons: Initial Studies	286
7.6.2	Resonant Tunneling of Holes: Initial Studies	288
7.6.3	Resonant Tunneling of Electrons and Holes: Further Studies	289
7.6.4	Unified Picture of Tunneling and Relaxation	291
7.6.5	Summary	293
7.7	Conclusions	293
<b>8.</b>	<b>Carrier Transport in Semiconductor Nanostructures</b>	<b>295</b>
8.1	Basic Concepts	295
8.1.1	Some Examples	297
8.2	Perpendicular Transport in Graded-Gap Superlattices	299
8.3	Carrier Sweep-Out in Multiple Quantum Wells	308
8.3.1	Hybrid Technique	309
8.3.2	All-Optical Studies of Carrier Sweep-Out	310

8.4	Carrier Capture in Quantum Wells . . . . .	314
8.4.1	Theoretical Predictions . . . . .	314
8.4.2	Experimental Studies . . . . .	316
8.4.3	Implications for Lasers . . . . .	320
8.4.4	Summary . . . . .	322
8.5	Conclusions . . . . .	323
<b>9.</b>	<b>Recent Developments . . . . .</b>	<b>325</b>
9.1	Nanostructures, Lasers and Techniques . . . . .	325
9.1.1	Semiconductor Nanostructures . . . . .	325
9.1.2	Ultrafast Lasers . . . . .	331
9.1.3	Measurement Techniques . . . . .	331
9.2	Coherent Spectroscopy . . . . .	335
9.2.1	Quantum Kinetics in Semiconductors . . . . .	336
9.2.2	Beyond the Semiconductor Bloch Equations . . . . .	345
9.2.3	Coherent Control in Semiconductors . . . . .	351
9.2.4	Phase Sensitive Measurements . . . . .	361
9.2.5	Exciton-Continuum Interaction . . . . .	365
9.2.6	Bloch Oscillations . . . . .	374
9.2.7	Coherent Phonons . . . . .	376
9.2.8	Plasmon-Phonon Oscillations . . . . .	377
9.2.9	HH-LH Resonance in the Continuum . . . . .	379
9.2.10	Biexcitons . . . . .	381
9.2.11	Coherent and Nonlinear Phenomena in Semiconductor Microcavities . . . . .	383
9.2.12	Coherence in Multiple Quantum-Well Structures and Bragg/Anti-Bragg Structures . . . . .	390
9.2.13	Coherent Properties of Quantum Wires and Dots . . .	395
9.3	Ultrafast Emission Dynamics . . . . .	398
9.3.1	Resonant Secondary Emission from Quantum Wells: Intensity . . . . .	398
9.3.2	Resonant Secondary Emission from Quantum Wells: Investigation by Phase-Locked Pulses . . . . .	401
9.3.3	Resonant Secondary Emission from Quantum Wells: Direct Measurement of Amplitude and Phase . . . . .	407
9.3.4	Microcavities . . . . .	410
9.4	The Incoherent Regime: Dynamics and High-Intensity Effects . . . . .	418
9.4.1	Carrier Dynamics . . . . .	419
9.4.2	Exciton Dynamics . . . . .	425
9.4.3	Quantum Wires: Capture and Relaxation Dynamics .	427
9.4.4	Quantum Wires: High-Density Effects . . . . .	432
9.4.5	Quantum Dots: Relaxation Dynamics . . . . .	435
9.4.6	Carrier-Transport Dynamics . . . . .	443
9.5	Epilogue . . . . .	446
