

# Table of Contents

High Order Approximations for Compressible Fluid Dynamics on Unstructured and Cartesian Meshes . . . . .	1
<i>Rémi Abgrall, Thomas Sonar, Oliver Friedrich, Germain Billet</i>	
Discontinuous Galerkin Methods for Convection-Dominated Problems .	69
<i>Bernardo Cockburn</i>	
Adaptive Spectral Element Methods for Turbulence and Transition . . .	225
<i>Ronald D. Henderson</i>	
<i>hp</i> -FEM for Fluid Flow Simulation . . . . .	325
<i>Christoph Schwab</i>	
High Order ENO and WENO Schemes for Computational Fluid Dynamics . . . . .	439
<i>Chi-Wang Shu</i>	

High-Order Methods for Computational Physics

Barth, T.J.; Deconinck, H. (Eds.)

1999, VII, 587 p. 176 illus., Hardcover

ISBN: 978-3-540-65893-1
