

# Contents

<b>1. Background Mathematics</b> .....	1
1.1 Introduction .....	1
1.2 Vector and Matrix Norms .....	3
1.3 Gerschgorin's Theorems .....	7
1.4 Iterative Solution of Linear Algebraic Equations .....	10
1.5 Further Results on Eigenvalues and Eigenvectors .....	18
1.6 Classification of Second Order Partial Differential Equations ...	23
<b>2. Finite Differences and Parabolic Equations</b> .....	29
2.1 Finite Difference Approximations to Derivatives .....	29
2.2 Parabolic Equations .....	34
2.3 Local Truncation Error .....	41
2.4 Consistency .....	43
2.5 Convergence .....	46
2.6 Stability .....	48
2.7 The Crank–Nicolson Implicit Method .....	54
2.8 Parabolic Equations in Cylindrical and Spherical Polar Coordinates .....	59
<b>3. Hyperbolic Equations and Characteristics</b> .....	67
3.1 First Order Quasi-linear Equations .....	67
3.2 Lax–Wendroff and Wendroff Methods .....	72
3.3 Second Order Quasi-linear Hyperbolic Equations .....	80
3.4 Rectangular Nets and Finite Difference Methods for Second Order Hyperbolic Equations .....	90
<b>4. Elliptic Equations</b> .....	95
4.1 Laplace's Equation .....	95

4.2	Curved Boundaries .....	104
4.3	Solution of Sparse Systems of Linear Equations .....	113
<b>5.</b>	<b>Finite Element Method for Ordinary Differential Equations.</b>	<b>123</b>
5.1	Introduction .....	123
5.2	The Collocation Method .....	124
5.3	The Least Squares Method .....	127
5.4	The Galerkin Method .....	129
5.5	Symmetric Variational Formulation .....	132
5.6	Finite Element Method .....	144
5.7	Some Worked Examples .....	158
<b>6.</b>	<b>Finite Elements for Partial Differential Equations</b> .....	<b>165</b>
6.1	Introduction .....	165
6.2	Variational Methods .....	167
6.3	Some Specific Elements .....	170
6.4	Assembly of the Elements .....	173
6.5	Worked Example .....	177
6.6	A General Variational Principle .....	182
6.7	Assembly and Solution .....	183
6.8	Solution of the Worked Example .....	184
6.9	Further Interpolation Functions .....	190
6.10	Quadrature Methods and Storage Considerations .....	200
6.11	Boundary Element Method .....	202
<b>A.</b>	<b>Solutions to Exercises</b> .....	<b>207</b>
	<b>References and Further Reading</b> .....	<b>287</b>
	<b>Index</b> .....	<b>289</b>
