

# Contents

<b>1</b>	<b>Introduction .....</b>	<b>1</b>
	What are Multimedia Systems? .....	1
	Multimedia Delivery Systems .....	4
	Multimedia Interactivity .....	5
	What Topics does the Book Cover? .....	6
	Bibliography .....	6

## Part I

<b>2</b>	<b>Perception and Data Coding .....</b>	<b>9</b>
	Introduction .....	9
	Perception of Multimedia Data .....	9
	perception of Sound .....	10
	Perception of Static Image Data .....	13
	Perception of Moving Image Data .....	15
	Capture of Multimedia Data .....	16
	Capturing Sound .....	17
	Capturing Static Image Data .....	19
	Capturing Video Data .....	22
	Coding Multimedia Data .....	24
	Coding Sound .....	25
	Coding Still Images .....	26
	Coding Video Data .....	29
	Coding/Decoding Hardware .....	31
	Conclusion .....	32
	Bibliography .....	32
<b>3</b>	<b>Organising and Delivering Multimedia Objects .....</b>	<b>33</b>
	Introduction .....	33
	A Classification of Multimedia Presentations .....	34
	What is Required of a Multimedia Presentation Design Tool? ...	37
	Characteristics of Practical Design Tools .....	38
	Implementing Multimedia Presentations Using HTML .....	39
	Good Design Prattice .....	41
	Manipulating Multimedia Content .....	41
	Conclusion .....	45
	Bibliography .....	46

<b>4</b>	<b>Hardware to Support Multimedia Systems</b>	<b>47</b>
	Introduction	47
	The Multimedia PC	48
	Peripheral Devices	49
	Kiosk Systems	55
	Conclusions	57
	Bibliography	57

## Part II

<b>5</b>	<b>Multimedia Interactivity</b>	<b>61</b>
	Introduction	61
	The Future of Multimedia Communication Systems	62
	Theoretical Foundations	67
	Conclusion	73
	Bibliography	73
<b>6</b>	<b>Speech Generation</b>	<b>75</b>
	Introduction	75
	Physiology	76
	Historical Speech Generating Machines	79
	Synthesis from Stored Segments	81
	Synthesis from Rules	82
	Summary	87
	Bibliography	88
<b>7</b>	<b>Speech Recognition</b>	<b>89</b>
	Introduction	89
	Principles Underlying Speech Recognition	90
	Architecture of a Speech Recognition System	92
	Representation	93
	Classification	93
	Recognition	95
	Summary	99
	Bibliography	100
<b>8</b>	<b>Head Pointing Devices</b>	<b>101</b>
	What is a Head Pointing Device?	101
	Where Would Head Pointing Device Be Used?	102
	The Video Based Head Pointing Device: Hardware	103
	Possible Software Solutions	107
	Conclusions	119
	Bibliography	120

<b>9</b>	<b>Gesture Recognition</b>	<b>121</b>
	Introduction	121
	Example Systems	122
	Requirements	127
	Identifying and Describing Hands and Fingers in Video Sequences	127
	Tracking Hands and Fingers in Video Sequences	132
	Representing Gestures	133
	Recognising Gestures	134
	Summary and Conclusions	134
	Bibliography	135
<b>10</b>	<b>Motion Following and Interpretation</b>	<b>137</b>
	Introduction	137
	Activity Understanding Systems	138
	Information Delivery Systems	143
	Video Surveillance and Monitoring	146
	Conclusion	150
	Bibliography	150
<b>11</b>	<b>Synthesising a Visual Response</b>	<b>153</b>
	Introduction	153
	Feedback	153
	An Overview of Methods of Generating and Animating Head Models	155
	Facial Animation Systems	160
	Conclusions	161
	Bibliography	162
	<b>Conclusions</b>	<b>163</b>
	The Current State of Multimedia Systems	163
	What of the Future?	165
	<b>Appendices</b>	<b>167</b>
	HTML – Hypertext Markup Language	167
	Mathematical Techniques	179
	Publicly Available Software	185
	<b>Index</b>	<b>189</b>

Multimedia Systems

Delivering, Generating and Interacting with Multimedia

Morris, T.

2000, XI, 191 p. 16 illus., Softcover

ISBN: 978-1-85233-248-8
