

Contents

Preface	v
List of Contributors	ix
1 Complement as a Regulatory and Effector Pathway in Human Diseases V. Michael Holers	1
2 The Regulation of C1 Activation and its Role in Disease C. Erik Hack	33
3 Inhibition of Complement Serine Proteases as a Therapeutic Strategy Sthanam V. L. Narayana, Y. Sudhakara Babu, and John E. Volanakis	57
4 Complement Inhibitors Targeting C3, C4, and C5 Arvind Sahu, Dimitrios Morikis, and John D. Lambris	75
5 Complement Anaphylatoxins (C3a, C4a, C5a) and Their Receptors (C3aR, C5aR/CD88) as Therapeutic Targets in Inflammation Rick A. Wetsel, Jens Kildsgaard, and David L. Haviland	113
6 Modulation of Disease Using Recombinant Human Endogenous Complement Inhibitors Richard J. Quigg	155
7 Roles of Integrins CR3 and CR4 in Disease and Therapeutic Strategies Yu Xia and Gordon D. Ross	171
8 Inhibition of Complement in the Membrane Attack Pathway B. Paul Morgan	205
9 Evaluation of Complement Inhibitors Patricia C. Giclas	225

10	Use of Animal Models to Define Complement Functions Peter A. Ward, Boris J. Czermak, Markus Huber-Lang, Katherine Diehl, and Hans P. Friedl	237
	Index	255
