
Contents

Preface	v
List of Contributors	xi
1 Aqueous Two-Phase Systems: <i>A General Overview</i> <i>Rajni Hatti-Kaul</i>	1
PART I. PREPARATION AND CHARACTERIZATION OF AQUEOUS TWO-PHASE SYSTEMS	
2 The Phase Diagram <i>Anita Kaul</i>	11
3 Preparation of Aqueous Two-Phase Systems <i>Daniel Forciniti</i>	23
4 Measurement of Some Physical Properties of Aqueous Two-Phase Systems <i>Donald E. Brooks and Raymond Norris-Jones</i>	35
PART II. PARTITIONING TECHNIQUES	
5 Single-Step Partitioning in Aqueous Two-Phase Systems <i>Telma Teixeira Franco and Rajni Hatti-Kaul</i>	47
6 Partition by Countercurrent Distribution (CCD) <i>Hans-Erik Åkerlund</i>	55
7 Liquid–Liquid Partition Chromatography (LLPC) <i>Ulla-Britt Hansson and Christer Wingren</i>	65
PART III. PARTITIONING OF SOLUBLE MOLECULES AND PARTICULATES	
8 Metal Ion Separations in Aqueous Biphasic Systems and with ABEC™ Resins <i>Jonathan G. Huddleston, Scott T. Griffin, Jianhua Zhang, Heather D. Willauer, and Robin D. Rogers</i>	77
9 Partition of Amino Acids and Peptides in Aqueous Two-Phase Systems <i>I-Ming Chu and Wen-Yi Chen</i>	95
10 Predicting Partition Coefficients of Small Solutes Based on Hydrophobicity <i>Mark A. Eiteman</i>	107

11	Eukaryotic Cell Partition: <i>Experimental Considerations</i> James M. Van Alstine	119
12	Concentration and Purification of Viruses Lena Hammar	143
13	Isolation of Plant Plasma Membranes and Production of Inside-Out Vesicles Christer Larsson and Susanne Widell	159
14	Isolation of Inside-Out Thylakoid Vesicles Hans-Erik Åkerlund	167
15	Two-Phase Partitioning as a Method for Isolation of Tight Plasma Membrane Vesicles from <i>Saccharomyces cerevisiae</i> and from <i>Chlamydomonas reinhardtii</i> Birgitta Norling	177
16	Purification of Cyanobacterial Thylakoid, Plasma, and Outer Membranes by Two-Phase Partitioning Birgitta Norling	185
17	Purification of Plasma Membranes by Affinity Partitioning Bengt Jergil and Lars Ekblad	193
18	Studying the Influence of Salts on Partitioning of Proteins: <i>Isoelectric Point Determination</i> Daniel Forciniti	201
19	Partitioning of Chemically Modified Proteins: <i>A Method</i> <i>for Detection of the Resolution of Aqueous Two-Phase Systems</i> Telma Teixeira Franco	209
20	Detection and Analysis of Interactions by Two-Phase Partition Lars Backman	219
21	Cryopartitioning in Two-Phase Systems Containing Organic Solvents Göte Johansson	229
PART IV. ISOLATION AND PURIFICATION OF PROTEINS BY TWO-PHASE EXTRACTION		
22	Optimization of Extractions in Aqueous Two-Phase Systems Ulrich Menge	235
23	Two-Phase Extraction of Proteins from Cell Debris Kristina Köhler Van Alstine and Andres Veide	251
24	Aqueous Two-Phase Extraction of Proteins from Animal Tissue Michael J. Boland	259
25	Chaotropic Aqueous Two-Phase Systems: <i>Preparation and Uses</i> Daniel Forciniti	271
26	Temperature-Induced Phase Partitioning for Protein Purification Anita Kaul, Josefine Persson, and Folke Tjerneld	281

27	Extraction of Amphiphilic Proteins Using Detergent-Based Aqueous Two-Phase Systems Torsten Minuth	291
28	Use of Charged PEG and Dextran Derivatives for Biomolecule Partitioning Göte Johansson	303
29	Affinity Partitioning Using Poly(ethylene glycol) with Covalently Coupled Hydrophobic Groups Vithaldas P. Shanbhag and Poul Erik H. Jensen	315
30	Dye-Ligand Affinity Partitioning of Proteins Gerhard Kopperschläger and Jürgen Kirchberger	329
31	Metal Affinity Protein Partitioning Roberto Z. Guzmán and Javier E. García	347
32	Recovery of Proteins and Phase Components Göte Johansson	357
33	Combination of Extraction with Adsorption for Protein Purification Gabriel Raya-Tonetti and Nora I. Perotti	365
34	Integration of Extraction with Affinity Precipitation Masamichi Kamihira, Rajni Hatti-Kaul, and Bo Mattiasson	373
35	Affinity Partitioning Using Magnetic Two-Phase Systems Masamichi Kamihira	383
36	Large-Scale Extraction of Proteins Teresa Cunha and Raquel Aires-Barros	393
PART V. BIOCONVERSIONS IN TWO-PHASE SYSTEMS		
37	Extractive Bioconversion in Aqueous Two-Phase Systems Rajni Hatti-Kaul	413
38	Enzyme Reaction in Polymer–Polymer Organic Solvent Two-Phase System Bo Mattiasson	421
	Index	429
