Preface	v
Contributors	xiii
PART I PURIFICATION OF MUCIN	
1 Isolation of Large Gel-Forming Mucins	3
<i>Julia R. Davies and Ingemar Carlstedt</i>	
2 Preparation of Membrane Mucin	15
<i>Kermit L. Carraway</i>	
PART II DETECTION AND QUANTITATION OF MUCIN	
3 Histologically Based Methods for Detection of Mucin	29
<i>Michael D. Walsh and Jeremy R. Jass</i>	
4 Detection and Quantitation of Mucins Using Chemical, Lectin, and Antibody Methods	45
<i>Michael A. McGuckin and David J. Thornton</i>	
5 The Gastrointestinal Adherent Mucous Gel Barrier	57
<i>Adrian Allen and Jeffrey P. Pearson</i>	
6 Quantitation of Biosynthesis and Secretion of Mucin Using Metabolic Labeling	65
<i>Jan Dekker, B. Jan-Willem Van Klinken, Hans A. Büller, and Alexandra W. C. Einerhand</i>	
PART III SEPARATION, IDENTIFICATION, AND PHYSICAL CHARACTERIZATION OF MUCINS	
7 Separation and Identification of Mucins and Their Glycoforms	77
<i>David J. Thornton, Nagma Khan, and John K. Sheehan</i>	
8 Heterogeneity and Size Distribution of Gel-Forming Mucins	87
<i>John K. Sheehan and David J. Thornton</i>	
PART IV RHEOLOGY OF MUCIN	
9 Rheology of Mucin	99
<i>Jeffrey P. Pearson, Adrian Allen, and David A. Hutton</i>	

PART V MUCIN PEPTIDE ANALYSIS

- 10** Amino Acid Analysis of Mucins **113**
Jun X. Yan and Nicole H. Packer
- 11** Identification of Glycosylation Sites in Mucin Peptides
 by Edman Degradation **121**
Natasha E. Zachara and Andrew A. Gooley
- 12** Synthetic Peptides for the Analysis and Preparation
 of Antimucin Antibodies **129**
Andrea Murray, Deirdre A. O'Sullivan, and Michael R. Price
- 13** Mucin Domains to Explore Disulfide-Dependent Dimer Formation **143**
Sherilyn L. Bell and Janet F. Forstner

PART VI CARBOHYDRATE STRUCTURAL ANALYSIS OF MUCINS

- 14** Monosaccharide Composition of Mucins **159**
Jean-Claude Michalski and Calliope Capon
- 15** O-Linked Oligosaccharide Chain Release and Fractionation **181**
Elizabeth F. Hounsell
- 16** Structural Analysis of Mucin-Type O-Linked Oligosaccharides **191**
*André Klein, Gérard Strecker, Geneviève Lamblin,
 and Philippe Roussel*
- 17** Measurement of Sulfate in Mucins **211**
Mathew J. Harrison and Nicole H. Packer

PART VII MUCIN BIOSYNTHESIS

- 18** Biosynthesis of Mucin Cell and Organ Culture Methods
 for Biosynthetic Study **219**
*Anthony P. Corfield, Neil Myerscough, Alexandra W. C. Einerhand,
 B. Jan-Willem Van Klinken, Jan Dekker, and Christos Paraskeva*
- 19** Metabolic Labeling Methods for the Preparation
 and Biosynthetic Study of Mucin **227**
*Anthony P. Corfield, Neil Myerscough, B. Jan-Willem Van Klinken,
 Alexandra W. C. Einerhand, and Jan Dekker*
- 20** Identification of Mucins Using Metabolic Labeling,
 Immunoprecipitation, and Gel Electrophoresis **239**
*B. Jan-Willem Van Klinken, Hans A. Büller,
 Alexandra W. C. Einerhand, and Jan Dekker*
- 21** Mucin Precursors: Identification and Analysis
 of Their Intracellular Processing **249**
*Alexandra W. C. Einerhand, B. Jan-Willem Van Klinken,
 Hans A. Büller, and Jan Dekker*

22	Inhibition of Mucin Glycosylation	261
	<i>Guillemette Huet, Philippe Delannoy, Thécia Lesuffleur, Sylviane Hennebicq, and Pierre Degand</i>	
23	O-Linked Chain Glycosyltransferases	273
	<i>Inka Brockhausen</i>	

PART VIII MUCIN GENE DETECTION

24	Mucin cDNA Cloning	297
	<i>Jean-Pierre Aubert and Nicole Porchet</i>	
25	Northern Blot Analysis of Large mRNAs	305
	<i>Nicole Porchet and Jean-Pierre Aubert</i>	
26	Southern Blot Analysis of Large DNA Fragments	313
	<i>Nicole Porchet and Jean-Pierre Aubert</i>	
27	<i>In Situ</i> Hybridization Techniques for Localizing Mucin mRNA	323
	<i>Ilene K. Gipson</i>	
28	Detection of Mucin Gene Polymorphism	337
	<i>Lynne E. Vinall, Wendy S. Pratt, and Dallas M. Swallow</i>	

PART IX PREPARATION OF ANTIMUCIN ANTIBODIES

29	Polyclonal and Monoclonal Techniques	353
	<i>Francisco X. Real, Carme de Bolós, and Egbert Oosterwijk</i>	
30	Monoclonal Antibodies to Mucin VNTR Peptides	369
	<i>Pei Xiang Xing, Vasso Apostolopoulos, Jim Karkaloutsos, and Ian F. C. McKenzie</i>	

PART X ENZYMATIC DEGRADATION OF MUCINS

31	Mucinase Activity	385
	<i>Roger M. Stark, Rebecca Wiggins, Elizabeth Walley, Sally J. Hicks, Gulnaz A. Gill, Stephen D. Carrington, and Anthony P. Corfield</i>	
32	Proteinase Activity	393
	<i>David A. Hutton, Adrian Allen, and Jeffrey P. Pearson</i>	
33	Glycosidase Activity	403
	<i>Anthony P. Corfield and Neil Myerscough</i>	
34	Assays for Bacterial Mucin-Desulfating Sulfatases	417
	<i>Anthony M. Robertson, Douglas I. Rosendale, and Damian P. Wright</i>	

PART XI MUCIN-BACTERIAL INTERACTIONS

- 35** Mucin-Bacterial Binding Assays **429**
Nancy A. McNamara, Robert A. Sack, and Suzanne M. J. Fleiszig
- 36** Growth of Mucin Degrading Bacteria in Biofilms **439**
George T. Macfarlane and Sandra Macfarlane

PART XII CELLULAR AND HUMORAL RESPONSES TO MUCINS

- 37** Generation of MUC1 Cytotoxic T-Cells in Mice
 and Epitope Mapping **455**
Vasso Apostolopoulos, Ian F. C. McKenzie, and Geoffrey A. Pietersz
- 38** Analysis of the Frequency of MHC-Unrestricted MUC1-Specific
 Cytotoxic T-Cells in Peripheral Blood
 by Limiting Dilution Assay **463**
John R. McKolanis and Olivera J. Finn
- 39** Expression of MUC1 in Insect Cells
 Using Recombinant Baculovirus **471**
Pawel Ciborowski and Olivera J. Finn
- 40** Mucin Antigen Presentation Using Dendritic Cells **487**
Joy Burchell, Rosalind Graham, and Joyce Taylor-Papadimitriou
- 41** Detection of Humoral Immune Responses to Mucins **495**
Silvia von Mensdorff-Pouilly, Claus Vennegoor, and Joseph Hilgers
- Index **501**
