
Contents

Preface	ix
Contributors	xvii
1 Asthma: Application of Cell and Molecular Biology Techniques to Unravel Causes and Pathophysiological Mechanisms Fan Chung and Ian Adcock	
2 Culture of Normal Human Airway Epithelial Cells and Measurement of Mucin Synthesis and Secretion Reen Wu	
3 Brush Biopsy and Culture of Airway Epithelial Cells: β -Adrenergic Receptor System Function Steven Kelsen, David Ciccolella, and Kathleen Brennan	
4 Isolation and Characterization of Human Airway Fibroblasts in Culture Jamila Chakir, Jeqan Dube, Michel Laviolette, Francine Goulet, Francois Augier, and Louis-Phillipe Boulet	
5 Flow Cytometric Analysis of Blood Monocytes and Alveolar Macrophages Marcia L. Taylor and Bruce Bochner	
6 Expression of IL-10 and GM-CSF in Blood Monocytes and Alveolar Macrophages Matthias John and Sam Lim	
7 MAP Kinase Expression in Eosinophils Patricia de Souza, Hannu Kankaaranta, Mark Giembycz, and Mark Lindsay	
8 Human Eosinophil Isolation and the Measurement of Apoptosis Hannu Kankaaranta, Patricia M. De Souza, Mark A. Giembycz, and Mark A. Lindsay	
9 Adhesion of T-Cells to Airway Smooth Muscle Cells Ali Lazaar and Reynold Panettieri	
10 Proliferation of Circulating T-Cells Mark Larche	

11	Differential Display Analysis of Inflammatory Genes in Airway Epithelium Lisa Schwiebert
12	Analysis of Transcription Factor Activation: NF κ B as a Regulator of Inflammatory Genes in Epithelial Cells Robert Newton and Ian Adcock
13	Transient Transgenic Approaches for Investigating the Role of GM-CSF in Pulmonary Inflammation and Immune Diseases Zhou Xing, Martin Stampfli, and Jack Gauldie
14	Quantitative Analysis of RANTES mRNA in Endobronchial Biopsies Using Polymerase Chain Reaction Neville Berkman
15	Intracellular Cytokine Staining for Analysis by Flow Cytometry Anthony Frew, Jacqueline Madden, and Petros Bakakos
16	Localization of IL-4 and IL-5 mRNA in Bronchial Biopsies Yutaka Nakamura, Pota Christodoupoulos, and Qutayba Hamid
17	Immunohistochemical Analysis of Adhesion Molecules in Airway Biopsies Susan Wilson and Stephen Holgate
18	Site-Directed Mutagenesis in the Investigation of β -Adrenoreceptor Exosite Stuart Green
19	Methods for Determining β_2 -Adrenoreceptor Genotype J. C. Dewar, A. P. Wheatley, and I. P. Hall
20	Modulation of β -Adrenoreceptor Expression in the Airways Judith Mak
21	Chemical Mutational Analysis of Glucocorticoid Receptor Stephen Lane and Tak Lee
22	Histone Acetylation and Deacetylation Kazuhiro Ito, Peter Barnes, and Ian Adcock
23	Genome-Wide Search for Asthma Genes Adel M. Mansur and John F. J. Morrison
