About the Editors	xiii
Contents of Volume 2	xv

PART 1 COMPATIBILITY AND FUNCTIONALITY ISSUES IN APPLIED BIOMATERIALS

1	Molecular Mechanism of Biomaterial-Mediated Phagocyte Responses	3
	<i>Liping Tang</i>	
2	Hypersensitivity Associated with Metallic Biomaterials	15
	<i>Nadim Hallab, Joshua J. Jacobs, and Jonathan Black</i>	
3	Blood-Compatible Bioactive Polymers	25
	<i>Stéphane La Barre and Catherine Boisson-Vidal</i>	
4	Novel Modification Method of Bioprosthetic Tissue for Improved Calcification Resistance	49
	<i>Ki Dong Park, Young Ha Kim, and Won Kyu Lee</i>	
5	Biocompatibility of Silicone Gel Breast Implants	57
	<i>Deepak V. Kilpadi and Dale S. Feldman</i>	
6	Endothelialization of Vascular Prostheses	85
	<i>Gary L. Bowlin, Steven P. Schmidt, Stanley E. Rittgers, and Kristin J. Pawlowski</i>	

PART 2 DESIGN AND EVALUATION OF MATERIALS FOR VASCULAR APPLICATIONS

7	Collagen-Based Vascular Prostheses	121
	<i>Jerome A. Werkmeister, Glenn A. Edwards, and John A. M. Ramshaw</i>	
8	Surface Modifications of Mechanical Heart Valves: <i>Effects on Thrombogenicity</i>	137
	<i>Hoang S. Tran, Matthew M. Puc, Frank A. Chrzanowski, Jr., Charles W. Hewitt, David B. Soll, Bawa Singh, Nalin Kumar, Steven Marra, Vincent Simonetti, Jonathan Cilley, and Anthony J. DelRossi</i>	
9	The Importance of Radial Forces in Vascular Stent Design	145
	<i>P. B. Snowhill, J. L. Nosher, and F. H. Silver</i>	
10	Blood Leak-Proof Porous Vascular Grafts	161
	<i>Jin Ho Lee, Gilson Khang, and Hai Bang Lee</i>	
11	Formation of Neointima in Vascular Prosthesis Sealed with Autologous Adipose Tissue Fragments for Femoropopliteal Bypass ...	181
	<i>Yukio Ichikawa, Yasuharu Noishiki, Tamitaro Soma, Ichiya Yamazaki, Takayuki Kosuge, and Norihisa Karube</i>	

- 12 Clinical Improvement in Patients with Coronary and Peripheral Vascular Diseases Treated by LDL-Adsorption Using the Liposorber LA-15 System 189
Tetsuzo Agishi and Bruce Gordon
- 13 Development of a New Hybrid Coronary Stent Design with Optimized Biocompatible Properties 201
Armin Bolz, Claus Harder, Martin Unverdorben, and Max Schaldach

PART 3 BIOMATERIALS AS CARRIERS FOR BIOACTIVE AGENTS

- 14 Incorporation of Active Agent into Biodegradable Cement: *Encapsulation of Agent as Protection from Chemical Degradation During Cure and Effect on Release Profile* 225
Joseph D. Gresser, Hisanori X. Nagaoka, Debra J. Trantolo, Pattisapu R. J. Gangadharam, Yung-Yueh Hsu, and Donald L. Wise
- 15 New Synthetic Degradable Polymers as Carrier Materials for BMP 239
Kunio Takaoka, Shimpei Miyamoto, Naoto Saito, and Takao Okada
- 16 Use of Carrier Materials in Delivery of Bone Inductor Substances 251
Philip J. Boyne
- 17 Preclinical and Clinical Evaluation of Osteogenic Protein-1 (BMP-7) in Bony Sites 267
Stephen D. Cook, Samantha L. Salkeld, Laura P. Patron, and David C. Rueger
- 18 Enzyme-Based Artificial Liver Support: *A Computerized Expert System for Design, Optimization, and Operation Control* 279
Serge Guzy, Samuel Sideman, and Noah Lotan
- 19 Bupivacaine Release from Biopolymeric Depots for the Alleviation of Postoperative Pain 295
William A. Apruzzese, Joseph D. Gresser, Daniel B. Carr, Louis Shuster, Donald L. Wise, and Debra J. Trantolo
- 20 Biomaterial Implants for Treatment of Central Nervous System Diseases 307
Wei Chen, Bingqing Ji, and D. Robert Lu
- Index 335

Biomaterials Engineering and Devices: Human
Applications

Volume 1: Fundamentals and Vascular and Carrier
Applications

Wise, D.L.; Trantolo, D.J.; Lewandrowski, K.-U.; Gresser,
J.D.; Cattaneo, M.V. (Eds.)

2000, XVI, 344 p., Hardcover

ISBN: 978-0-89603-858-5
