Introduction

- How to Use This Book
- How to Use the Tips in This Book
- Code Naming Conventions
- Getting the Example Source Code
- Getting Updates to the Example Code
- Contacting the Author

Chapter 1 Some Hot Tips to Get You Started

- Setting Up the Visual Basic Design Environment
- Deleting Multiple Items in a ComboBox and ListBox
- Adding Cut, Copy, Paste, and Undo Features Quickly
- Moving Files without All the Work

Chapter 2 Tips on Working with Strings and Arrays ..

- Returning an Array of Fixed Length Strings
- Avoiding “Array Locked” Errors
- New Visual Basic 6 String/Array Features

Chapter 3 Tips on Working with Controls

- Using the Validate Event instead of LostFocus
- Verifying that TextBox Entries Are All Nonempty
- Automatic Selection of Text
- Keeping Text Highlighted When the Focus Moves Away from a Control
- Ignoring Keyboard Characters in a TextBox Control
- Using a TextBox Control to Get the Effect of a Scrolling Form
- Turning Off Word Wrap in a RichTextBox Control
- Adding the Default Context Menu to a RichTextBox
- Using a RichTextBox to Add a Quick Save/Load File Capability
- Toggling ListView Sorting Order Like You Can with Explorer
- Removing Selected Items from a ListView Control
- Getting the Number of Items Selected in a ListView Control
- Grid Printing Made Easy
- Clicking an Object Using the Windows API
- Viewing an Oversized Picture Using Scroll Bars
- Extending the Timer Control to Intervals beyond the 65.5-Second Range
- Using the SysInfo Control to Determine When the Hardware Environment Changes
- Using Windowless Controls to Make Properties Read/Write at Runtime
- Taking Advantage of Adding Controls Dynamically at Runtime

Chapter 4 Disk and File Tips and Tricks

- Getting a File Name from a Path (Before Visual Basic 6)
- Getting a File Name from a Path (After Visual Basic 6)
- Creating a Full Directory Path
- An Optional Way to Create a Full Directory Path
- Finding a File in Drives or Folders
- Copying Files by Using Version Checking
- Copying Files with a Progress Indicator
- Finding the Path of a Loaded File
- Finding the Total Space Available on a Drive
- The New File System Objects
- Retrieving Drive Information using File System Objects
- Using the Scripting Engine to Work Recursively on the Directory Structure

Chapter 5 Tips and Tricks to Use with Forms

- Adding a Form to the Add Form Dialog Box
- Making a Form Elastic
- Making a Form Stay on Top of All Other Windows
- Adding Items to a ControlBox Menu
- Tileing a Bitmap across a Form
- Displaying Forms within a Form
- Bringing MDI Forms to the Top
- Making MDI Child Forms Act Modally
- Automating an Options Dialog Form
- Creating Non-Rectangular Forms

Chapter 6 Tips from the World of Win32s API

- Detecting a Sound Card or Speaker Driver
- Launching Programs or Files from Your Application
- Rolling Your Own GUIDs
- Verifying a User's Log-in Password
- Getting the Current User's Name
- Getting a Machine Name
- Opening or Closing the CD-ROM Door
- Getting a List Separator Based on Geographic Locale
- Creating Improved DoEvents for NT Users
- Adding Pop-Up Help to Your Program
- Adding Quick Search to ListBoxes and ComboBoxes

Chapter 7 Tips on Visual Basic and the Internet

- Using the WebBrowser Control to Build a Customized Browser
- Using the Application Wizard to Build Your Special-Purpose Browser
- Watching for Backslashes in Web Addresses
- Printing HTML Documents with the WebBrowser Control
- Using the Internet Transfer Control to Smart Mine the Web
- Using the Internet Transfer Control to Get Stock Prices
(And Other Kinds of Data Mining)
- Avoiding the OpenURL Method for Time-Consuming Data Transfers
- Accessing IIS Objects from a Visual Basic ActiveX DLL
- Determining whether RAS Is Connected

Chapter 8 Database Tips for Visual Basic and Microsoft Access

- Getting Up to Speed on Access Versions
- Three Secret Techniques to Document Your Code in Microsoft Access
- Unloading Your Database Workspace
- Dealing with Enter Keystrokes When Exporting Databases to Text Files
- Avoiding SQL Query Problems from Erroneous Single Quotes
- Dealing with Null Database Fields
- Filling a ComboBox with Data Quickly and Easily
- Adding Security to Access Database Diagrams
- Opening a Secured Access (Jet) Database with ADO
- Determining Which Version of the Microsoft Data Access Component You're Running
- Using the New Commands that Bring Access Closer to ANSI SQL
- Working with ActiveX Data Objects
- Investing in Microsoft Office Developer
- Getting a Handle on Data Source Names
- Becoming Familiar with Access 2000 Data Access Pages
- Enabling Row-Level Locking
- Creating Crosstab Queries
- Emulating Access Forms in Visual Basic
- Giving the Right Password
- Finding Important New Information on Integrating Access and SQL Server
- Discovering Resources for Migrating from Access to SQL Server

Chapter 9 Tips and Tricks on Some Advanced Stuff

- An Introduction to the AddressOf Operator
- Detecting whether Your Program Is Running in the Integrated Development Environment
- Using the SHFormatDrive Function to Format Drives
- Visual Basic Runtime Files
- ActiveX Components and Long File Names
- Registering and Unregistering COM Objects Easily

Chapter 10 Miscellaneous but Nevertheless Super-Useful Tips

- Changing the MousePointer with Class
- Converting Hours to Minutes
- Displaying 3D Text without a Control
- Fixing the “License Information for This Component Not Found” Error.
- Disabling Dr. Watson on Windows NT
- Running Programs at Startup
- Discovering the COMCTL32.OCX, COMCT232.OCX, MSChart.OCX Controls Upgrades
- Getting the Screen Resolution
- Determining Who’s Logged onto the Computer
- Invoking the Windows Shortcut Wizard
- Fixing the “Could not be Loaded” Error
- Fixing the “Can’t find project or library” Compile Error
- Restoring the Visual Basic IDE Back to Its Original State

Appendix A Touring the VS Tips & Tricks Web Site

- VB Tips & Tricks Newsletter
- Programming Tips
- Advanced Programming Techniques
- Software Development
- Component Products and Reviews
- VB Dave’s Corner
- VB Tips & Tricks Report Cards
- Free Software Contest, Downloads, and More

Appendix B Visual Basic Information Resources

- Web Sites
- Publications
- User Groups
- Newsgroups
- Visual Basic Insiders Technical Summit
- Microsoft Developers Network

Appendix C The APIGID32.DLL Library

- Numeric Functions
- Pointer and Buffer Routines
- FileTime Functions
- Miscellaneous
