

# Contents

Chapter 1. Introduction	1
1.1. Overview and Motivation	1
1.2. Notation and Terminology	5
1.3. Sign Conventions	7
Chapter 2. Basic Compatibilities	21
2.1. General Nonsense	21
2.2. Smooth and Finite Maps	28
2.3. Projective Space and the Trace Map	32
2.4. Proofs of Properties of the Projective Trace	39
2.5. The Fundamental Local Isomorphism	52
2.6. Proofs of Properties of the Fundamental Local Isomorphism	56
2.7. Compatibilities between $(\cdot)^\#$ and $(\cdot)^b$	76
2.8. Gluing $(\cdot)^\#$ and $(\cdot)^b$	99
Chapter 3. Duality Foundations	105
3.1. Dualizing Complexes	105
3.2. Residual Complexes	125
3.3. The Functor $(\cdot)^!$ and Residual Complexes	133
3.4. The Trace Map $\mathrm{Tr}_f$ and Grothendieck-Serre Duality	146
3.5. Dualizing Sheaves and CM maps	153
3.6. Base Change for Dualizing Sheaves	164
Chapter 4. Proof of Main Theorem	175
4.1. Case of an Artinian Quotient	175
4.2. Case of Artin Local Base Schemes	182
4.3. Duality for Proper CM Maps in the Locally Noetherian Case	189
4.4. Conclusion of Proof of Duality Theorem	201
Chapter 5. Examples	217
5.1. Higher Direct Images	217
5.2. Curves	225
Appendix A. Residues and Cohomology with Supports	237
A.1. Statement of Results	237
A.2. Proofs	241
Appendix B. Trace Map on Smooth Curves	271

## CONTENTS

B.1. Motivation	271
B.2. Preparations	273
B.3. The Proof	277
B.4. Duality on Jacobians	283
Bibliography	291
Index	293
